The treatment of cancer in young women and men is increasingly turning from focusing purely on survival to a recognition of the long-term effects of treatment on subsequent quality of life. In this regard, fertility is a very high priority for patients. This is the first book to explain the latest techniques in fertility preservation. Chapters cover fertility preservation in both women and men, management of cancer in pregnancy, egg donation and surrogacy, hormone replacement options, counselling and ethical issues. A multidisciplinary team of over 60 specialists were involved in this work, with contributions from leading obstetricians, medical oncologists, gynaecological oncologists, urologists and fertility specialists. The book is formally supported by the Association of Cancer Physicians (ACP). This highly patient-centred, readable text will be of value to a wide range of clinicians and physicians, and doctors in training, in their daily work.

If you are a new young adult librarian or an experienced librarian with little time to plan and execute programs for teens, this book is for you! For each month in the calendar year, two or three programs popular with teens are presented with instructions, sample flyers, letters, and checklists. From simple programs such as a candy raffle to more complex programs such as a mystery night, librarians can keep their teen calendar full of activities with a minimum of effort. Programs that tie into both school events and national events for teens are included as well as those that can be presented at an individual library. Suggestions for programs range from a poetry contest to a summer job program. Instructions for ongoing procedures for soliciting teens' opinions are provided: a monthly question board, candy raffle, starting and running a Teen Advisory Board and so on. Basic skills for all YA librarians are emphasized in each of the programs; these skills include booktalking, working with the schools, and marketing your programs within the library and to the community. By creating variations in each of the programs, young adult librarians will have a wealth of ideas in this book to keep their YA program calendar filled for years to come.

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government. **Joint Ethics Regulation (JER)**, John Wiley & Sons
Before the Second World War and long before the second wave of feminism, Virginia Woolf argued that women's experience, particularly in the women's movement, could be the basis for transformative social change. Grounding Virginia Woolf's feminist beliefs in the everyday world, Naomi Black reclaims *Three Guineas* as a major feminist document. Rather than a book only about war, Black considers it to be the best, clearest presentation of Woolf's feminism. Woolf's changing representation of feminism in publications from 1920 to 1940 parallels her involvement with the contemporary women's movement (suffragism and its descendants, and the pacifist, working-class Women's Co-operative Guild). Black guides us through Woolf's feminist connections and writings, including her public letters from the 1920s as well as "A Society," A Room of One's Own, and the introductory letter to *Life As We Have Known It*. She assesses the lengthy development of *Three Guineas* from a 1931 lecture and the way in which the form and illustrations of the book serve as a feminist subversion of male scholarship. Virginia Woolf as Feminist concludes with a discussion of the continuing relevance of Woolf's feminism for third-millennium politics.

Over the past two decades, experimental economics has moved from a fringe activity to become a standard tool for empirical research. With experimental economics now regarded as part of the basic tool-kit for applied economics, this book demonstrates how controlled experiments can be a useful in providing evidence relevant to economic research. Professors Jacquemet and L'Haridon take the standard model in applied econometrics as a basis to the methodology of controlled experiments. Methodological discussions are illustrated with standard experimental results. This book provides future experimental practitioners with the means to construct experiments that fit their research question, and new comers with an understanding of the strengths and weaknesses of controlled experiments. Graduate students and academic researchers working in the field of experimental economics will be able to learn how to undertake, understand and criticise empirical research based on lab experiments, and refer to specific experiments, results or designs completed with case study applications.

This book develops a performative and relational approach to gendered and sexualised bodies conceived as distinct from the more limited individualistic idea of sexual identity and orientation that is at play within notions of progress in contemporary transnational sexual politics. Focusing on the psychosocial dimension of sexual life, Sabsay challenges accepted ideas of increased emancipation, and the steady extension of rights, offering instead a critique of the liberal imaginary that is at the base of the sexual rights-bearing subject. The book offers a notion of sexual embodiment that provides an alternative to individualism, one that is social, radically relational and

psychically divided, and that implies a different conception of democratic sexual politics for our time. This book brings together political and cultural analysis of sexual rights discourse with a strong theory of the relational subject whose political investments and articulations depend on a political imaginary. This is a highly original and methodical text which will be of particular interest to academics and scholars of gender and sexuality studies, sociology, politics and psychology.
