This report on the educational needs of American gifted and talented students identifies indicators of an educational crisis, describes the current status of education for these students, and presents recommendations to meet the educational needs of

these students. Indicators demonstrating the need for change include the relatively poor performance by American students on international tests and the small number of students performing at the highest levels on National Assessment of Educational Progress tests. Recent studies have shown that gifted and talented elementary school students have mastered 35-40% of the curriculum in five basic subjects before they begin the school year;

most regular classroom teachers make few, if any, provisions for talented students; highest achieving students study less than an hour a day; and only 2 cents out of every \$100 spent on K-12 education supports special opportunities for talented students. A review describes how gifted and talented students are currently identified, the number of students served, the kind of support available, the kind of education most gifted and talented students receive, and

characteristics of effective programs for these students. Seven recommendations are offered: (1) set challenging curricular standards; (2) establish high-level learning opportunities; (3) ensure access to early childhood education; (4) increase learning opportunities for disadvantaged and minority children with outstanding talents; (5) broaden the definition of gifted (a broadened definition based on the federal Javits Gifted and Talented Education Act is

offered); (6) encourage appropriate teacher training and technical assistance; and (7) match world performance. (Contains 43 references.) (DB)

**CogAT Practice Test (Grade 7 and 8)** Gifted and Talented Test Preparation Team Top Grader has been coaching children on the gifted and talented tests for more than three years.

When we got requests from parents to coach their children on the CogAT®, we went looking around for practice material on this test. While we started with what was 'available' in the market, we quickly realized that we could give these children a much better preparation if we developed quality content on our own. So our academicians got on the job. After reviewing a lot of study material on CogAT® available both online and in print, we found that there is a void

when it comes to high-quality, structured, and relevant content for the CogAT® test. This book is an attempt to fill that void; every question in this book has been carefully developed to provide children with the most appropriate content for practice. What's even better is that all the questions in this book are in 'full-color', something that is essential to simulate the real CogAT® test experience but is hard to find in the current marketplace. Although we cannot guarantee that the

content of this book will help every child ace the CogAT®, we do assure you, based on our experience coaching prospective CogAT® test takers, that if a child solved all the problems available in the two practice tests in this book, his or her chances of getting a high score will improve greatly. If you feel your child needs personal attention and hand-holding to prepare for the CogAT®, we encourage you to take advantage of our one-on-one online tutoring for the

CogAT® test at [www.top-grader.com](http://www.top-grader.com). The Top Grader team wishes you and/or your child 'best of luck' for the CogAT® test! We value your feedback to help us improve our products and services, hence if you have any questions, comments, or suggestions, please do not hesitate to reach out to us at [feedback@top-grader.com](mailto:feedback@top-grader.com).
