**A Dictionary of the English Language Exhibiting the Origin, Orthography, Pronunciation and Definitions of Words** North Atlantic Books

Reprint of the original, first published in 1874. The publishing house Anatiposi publishes historical books as reprints. Due to their age, these books may have missing pages or inferior

quality. Our aim is to preserve these books and make them available to the public so that they do not get lost.

Webster's Complete Dictionary of the English Language ... revised ... by C. A. Goodrich ... and N. Porter ... assisted by Dr. C. A. F. Mahn ... New edition of 1880, with a supplement of new words, and an additional appendix of biographical names.

(Authorized and unabridged edition.) With a portrait UBC Press  
 Migraine Art includes more than 300 powerful illustrations and paintings created by migraine sufferers from around the world. It provides a thoroughly unique window into the subjective world of the migraine sufferer. The idea of collecting migraine art started with a number of public competitions in the 1980s, which encouraged artists, both amateur and professional, to illustrate the pain, the visual disturbances, and the effect migraines had on their lives. The book includes hundreds of these submissions as well as detailed descriptions of different types of migraine visual phenomena. Covering such topics as migraine signs, triggers, and treatments, as well as types of visual hallucinations and somatic

sensations and experiences, the book offers a comprehensive view of the migraine experience. Each category of visual disturbance is accompanied by related artwork. A description of migraine visual experiences of famous historical figures, such as Blaise Pascal and Lewis Carroll, provide historical background on the topic. The book also includes a history of four Migraine Art competitions and information about the Migraine Art collection.

**A dictionary of the English language. To which are added, a synopsis of words differently pronounced and Walker's Key to the classical pronunciation of Greek, Latin and Scripture proper names. Revised and enlarged, by C.A. Goodrich** Oxford University Press, USA

In his rich and learned new book about the naturalization of foreigners, Peter Sahlins offers an unusual and unexpected contribution to the histories of immigration, nationality, and citizenship in France and Europe. Through a study of foreign citizens, Sahlins discovers and documents a premodern world of legal citizenship, its juridical and administrative fictions, and its social practices. Telling the story of naturalization from the sixteenth to the early nineteenth centuries, *Unnaturally French* offers an original interpretation of the continuities and ruptures of absolutist and modern citizenship, in the process challenging the historiographical centrality of the French Revolution. *Unnaturally French* is a brilliant synthesis of social, legal, and political history. At its core are the tens of thousands of foreign citizens whose exhaustively researched social identities and geographic origins are presented here for the first time. Sahlins makes a signal contribution to the legal history of nationality in his comprehensive account of the theory, procedure, and practice of naturalization. In his political history of the making and unmaking of the French absolute monarchy, Sahlins considers the shifting policies toward immigrants, foreign citizens, and state membership. Sahlins argues that the absolute citizen, exemplified in Louis XIV's attempt to tax all foreigners in 1697, gave way to new practices in the middle of the eighteenth century. This "citizenship revolution," long before 1789, produced changes in private and in political culture that led to the abolition of the distinction between foreigners and citizens. Sahlins shows how the Enlightenment and the political failure of the monarchy in France laid the foundations for the development of an exclusively political citizen, in opposition to the absolute citizen who had been above all a legal subject. The author completes his original book with a study of naturalization under Napoleon and the Bourbon Restoration. Tracing the twisted history of the foreign citizen from the Old Regime to the New, Sahlins sheds light on the continuities and ruptures of the revolutionary process, and also its consequences.

Catalog of the Modern Greek Collection, University of Cincinnati  
Lerner Publishing Group

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

**The Churches of the Crusader Kingdom of Jerusalem: A Corpus: Volume 1, A-K (excluding Acre and Jerusalem)**

Cornell University Press

In 1747, Julien Offroy de La Mettrie anonymously published a pamphlet that scandalized Europe. The Dutch government, the most tolerant in Europe, decreed its destruction, and made every effort to learn who wrote it. La Mettrie fled to Berlin, where he was forced to live in exile for the rest of his life. His crime? He had argued that thought was produced by the brain--a dangerous assault, in the eyes of his contemporaries, on the soul. Not for the last time, the science of the human mind had outgrown human

imagination. Written by an international team of scientists, *The Enchanted Loom* offers a sweeping look at the history of neuroscience from the philosophy of Aristotle to the advent of Artificial Intelligence. This collection of accessible, intriguing essays is supplemented by over 350 spectacular illustrations, many in color, with thorough and informative captions written by the scientists themselves. The authors discuss Descartes's contributions to thought about the brain, alongside brilliant artistic studies of the central nervous system that he and masters like da Vinci executed. They show how phrenology--the long discredited study of skull shape and mental faculties--actually represented a breakthrough in thinking about localized brain functions, and how the advent of the microscope and other equipment led to new discoveries. The contributors bring the story up to the present day, unfolding the emergence of the modern neurosciences, advances in molecular biology, and the debate over how infants learn language. In addition, the book offers a short history of computers and recent thought about whether the mind works like computer software. Noted contributors include Larry Squire, writing on memory; Solomon Snyder, discussing psychopharmacology; and John Dowling on vision. Colorful, intelligent, informative, *The Enchanted Loom* offers an authoritative and enjoyable look at the history of a complex and fascinating science.

**Resources in Education** Cambridge University Press

In the 1970s, Hydro-Québec declared "We Are Hydro-Québec." The slogan symbolized the intimate ties that had emerged between hydroelectric development in the North and French Canadian aspirations in the South. Caroline Desbiens focuses on the first phase of the James Bay hydroelectric project to explore how this culture of hydroelectricity hastened the erasure of Aboriginal homelands and the manipulation of Northern Quebec's material landscape. She concludes that truly sustainable resource development will depend on all actors bringing an awareness of their cultural histories and visions of nature, North, and nation to the negotiating table.

**Bibliography of Agriculture**

This is the first volume in a three-volume set which will present a complete gazetteer of the 400 church buildings known to have existed in the Crusader Kingdom of Jerusalem. Each entry features a description, historical explanation and, where possible pictorial representation.

**Rewriting Roman History in the Middle Ages**

The Bamberg version of the "Historia Romana" represents a fascinating witness to the transition from Latin to vernacular literature, which the author relates to the intellectual and ideological milieu of the Ottonians. This book presents the first edition of the paraphrase contained in the manuscript Bamberg, Hist. 3.
