Commission to Investigate the Armenian
Events of 1915 SAGE Publications
The aim of the Ebook series of Research
Topics in Agricultural & Applied Economics
(RTAAE) is to publish high quality
economic researches applied to both the
agricultural and non-agricultural sectors of
the economy. The subject areas of this
Ebook series

*Researching Tourism, Leisure and
Hospitality for Dissertations and Theses*
Springer Science & Business Media

This book presents the current state of
research in information systems and
digital transformation. Due to the global
trend of digitalization and the impact of
the Covid 19 pandemic, the need for
innovative, high-quality research on
information systems is higher than ever. In
this context, the book covers a wide range
of topics, such as digital innovation,
business analytics, artificial intelligence,
and IT strategy, which affect companies,
individuals, and societies. This volume

gathers the revised and peer-reviewed
papers on the topic "Management"
presented at the International Conference
on Information Systems, held at the
University of Duisburg-Essen in 2021.
Research Topics in Graph Theory and Its
Applications Oxford University Press
This volume, edited by Grace Veach,
explores leading approaches to
foregrounding information literacy in first-
year college writing courses. Chapters
describe cross-disciplinary efforts
underway across higher education, as well
as innovative approaches of both writing
professors and librarians in the classroom.

This seminal work unpacks the disciplinary implications for information literacy and writing studies as they encounter one another in theory and practice, during a time when "fact" or "truth" is less important than fitting a predetermined message. Topics include reading and writing through the lens of information literacy, curriculum design, specific writing tasks, transfer, and assessment.

Research topics in software evolution and maintenance UTB GmbH

Designing and writing a qualitative dissertation methodology chapter can be done! Qualitative Dissertation Methodology: A Guide for Research Design and Methods functions as a dissertation advisor to help students construct and write a qualitative methodological framework for their research. Drawing from the challenges author Nathan Durdella has experienced while supervising students, the book breaks down producing the dissertation chapter into smaller pieces and goes through each portion of the methodology process step by step. With a warm and supportive tone, he walks students through the process from the very start, from choosing chairs

and developing qualitative support networks to outlining the qualitative chapter and delving into the writing. By the end of the book, students will have completed the most challenging chapter of a qualitative dissertation and laid a strong foundation for the rest of their dissertation work. Corresponding videos featuring the author help concepts come alive for your students.

Key Concepts in Event Management
Springer

This book explores and expands upon the core topics in the current academic debate within event management research. Emerging areas and innovative methodologies are organised into three themes: Events in Society, Event Consumers, and the Event Organization. Research Design for Business & Management Springer Nature
This book constitutes the refereed proceedings of the 19th International Conference on Knowledge Engineering and Knowledge Management, EKAW 2014, held in Linköping, Sweden, in November 2014. The 24 full papers and 21 short papers presented were carefully reviewed and selected from 138 submissions. The

papers cover all aspects of eliciting, acquiring, modeling, and managing knowledge, the construction of knowledge-intensive systems and services for the Semantic Web, knowledge management, e-business, natural language processing, intelligent information integration, personal digital assistance systems, and a variety of other related topics.

Events - Future, Trends, Perspectives
Lannoo Uitgeverij

Event-based systems are a class of reactive systems deployed in a wide spectrum of engineering disciplines including control, communication, signal processing, and electronic instrumentation. Activities in event-based systems are triggered in response to events usually representing a significant change of the state of controlled or monitored physical variables. Event-based systems adopt a model of calls for resources only if it is necessary, and therefore, they are characterized by efficient utilization of communication bandwidth, computation capability, and energy budget. Currently, the economical use of constrained technical resources is a critical issue in various application

domains because many systems become increasingly networked, wireless, and spatially distributed. Event-Based Control and Signal Processing examines the event-based paradigm in control, communication, and signal processing, with a focus on implementation in networked sensor and control systems. Featuring 23 chapters contributed by more than 60 leading researchers from around the world, this book covers: Methods of analysis and design of event-based control and signal processing Event-driven control and optimization of hybrid systems Decentralized event-triggered control Periodic event-triggered control Model-based event-triggered control and event-triggered generalized predictive control Event-based intermittent control in man and machine Event-based PID controllers Event-based state estimation Self-triggered and team-triggered control Event-triggered and time-triggered real-time architectures for embedded systems Event-based continuous-time signal acquisition and DSP Statistical event-based signal processing in distributed detection and estimation Asynchronous spike event coding technique with address

event representation Event-based processing of non-stationary signals Event-based digital (FIR and IIR) filters Event-based local bandwidth estimation and signal reconstruction Event-Based Control and Signal Processing is the first extensive study on both event-based control and event-based signal processing, presenting scientific contributions at the cutting edge of modern science and engineering.

Multiculturalism in the College

The books in this bite-sized new series contain no complicated techniques or tricky materials, making them ideal for the busy, the time-pressured or the merely curious. Essays and Dissertations Made Easy is a short, simple and to-the-point

guide to applied psychology. In just 96 pages, the reader will learn all about why we do the things we do. Ideal for the busy, the time-pressured or the merely curious, Essays and Dissertations Made Easy is a quick, no-effort way to break into this fascinating topic.

Ethnography Essentials Goodfellow Publishers Ltd

Events - future, trends, perspectives provides insights into many of the recent developments within the diverse event industry. International scholars and experts with backgrounds in multiple related fields have taken up exciting research topics and offer perspectives, thoughts and views on a number of current and future issues and challenges. The topics are as diverse as the industry itself and include discussions on gender and diversity, disruptive technologies, sustainability, psychological effects, the co-creation of experiences, the future of event education and many more. Vivid case studies and best practice examples are used to illustrate current and future developments and to spark discussion and debate amongst scholars, practitioners and students alike. The Corona crisis

(Covid-19) is having a massive impact on the events industry. Due to the editorial deadline of this book in February 2020, this topic could not be considered in this edition. We ask for your understanding.

Now in its second edition, this bestselling text has been fully revised and updated, and includes two new chapters looking at conducting mixed methods research, as

well as analysing mixed methods research.
Qualitative Research Topics in Language Teacher Education John Wiley & Sons
 In a straightforward manner, Semenza identifies the obstacles along the path of the academic career and offers tangible advice. Fully revised and updated, this edition's new material on advising, electronic publishing, and the post-financial crisis humanities job market will help students negotiate the changing landscape of academia.

Service Learning, Educational Innovation and Social Transformation
 BRILL

This book considers a number of research topics in graph theory and its applications, including ideas devoted to alpha-discrepancy, strongly perfect graphs, reconstruction conjectures, graph invariants, hereditary classes of graphs, and embedding graphs on topological surfaces. It also discusses applications of graph theory, such as transport networks and hazard assessments based on unified networks. The book is ideal for developers of grant proposals and researchers interested in exploring new areas of graph theory and its applications.

Research Topics on Brain Mapping

Springer

A timely and up-to-date "go-to" reference work for business events, The Routledge Handbook of Business Events explores and critically evaluates the key debates and controversies inherent to this rapidly expanding subject of study and industry. The volume brings together leading specialists from a range of disciplinary backgrounds and geographical regions, to provide state-of-the-art theoretical reflection and empirical research on management aspects as well as economic, social and environmental impacts and external factors such as transportation. The book incorporates the varied expertise of some 30 expert authors to provide a definitive collection of statements in this field, accompanied by illustrative and engaging case studies embodying real-life scenarios and examples on an international scale. This book is an excellent resource for students, researchers and academics of Events, as well as those of related studies in particular Tourism, Hospitality, Sport, Leisure, Marketing, Business and Development Studies.

Teaching Information Literacy and Writing Studies Taylor & Francis

Family, Body, Sexuality and Health is Volume III of the Encyclopedia of Women & Islamic Cultures. In almost 200 well written entries it covers the broad field of family, body, sexuality and health and Islamic cultures.

A Guide to Practitioner Research in Education

Bloomsbury Publishing USA
Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor, and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. Each annual volume contains manuscripts on such diverse topics as

research on college students and faculty, governance and planning, advances in research methodology, economics and finance, and curriculum and instruction. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world. It encompasses: Comprehensive reviews of contemporary and emerging issues in postsecondary education - Hundreds of citations in a wide range of scholarly journals, including all leading journals of higher education and many other social science and professional journals - An indispensable resource for administrators, researchers and policymakers - Published annually since 1985.

Research Methodologies for Business Management Springer Nature

This book serves as a starting point for people looking for a deeper principled understanding of REST, its applications, its limitations, and current research work in the area and as an architectural style. The authors focus on applying REST beyond Web applications (i.e., in enterprise environments), and in reusing established and well-understood design patterns. The book examines how RESTful systems can

be designed and deployed, and what the results are in terms of benefits and challenges encountered in the process. This book is intended for information and service architects and designers who are interested in learning about REST, how it is applied, and how it is being advanced.

Critical Event Studies Cambridge Scholars Publishing

Research Design for Business & Management is a logical and practical book which makes no assumptions about your prior research knowledge. It will instead provide you with a clear understanding of the commonly used methods in business and management research, and enable you to tackle the fundamental elements of the research process. This book: contains conversation boxes which answer and discuss the typical research questions you may have focuses on the judgement calls that you will need to make in your research

uniquely demonstrates the circular relationships between research elements ensuring that you can relate chapters to your research process in real life provides key insights into what the examiners and journals will look for in your research to help you get the best possible grades Goodfellow Publishers Ltd

"I found this text to be exactly what we were looking for to give our students a good understanding of the contemporary issues that affect the Events industry. I have recommended this as essential reading. It is well written and the format makes it an easy read raising key issues and challenging theory." - Tanya Bellingham, School of Tourism & Hospitality, University of Plymouth "An essential events management reference handbook which addresses a number of key issues within the industry. A very interesting read!" - Thomas Fletcher,

Liverpool John Moores University In recent years we have seen an enormous growth of festivals and event activity and the literature within the field is consequently huge. In order to make sense of this rapid and dynamic development, students are dependent on a book that can lead them through the myriad of theoretical frameworks offered. This book naturally situates itself in the middle of this need, offering a comprehensive and illuminating account of the festival and event field. Written with academic rigour yet accessible at the same time, Quinn proves herself to be an outstanding communicator and stimulator of knowledge. International in content and timely in its up to date coverage of key topics, this will be an invaluable reference source for students from of Event Management, Hospitality Management, Tourism Management, and Sport and Leisure Management.
