After years of working on a string of sitcoms, Phil Doran found himself on the outside looking in. Just as he and his peers had replaced the older guys when he was coming up the ranks, it was now happening to him. And it was freaking him out. He came home every night angry, burned-out, and exhausted. After twenty-five years of losing her husband to Hollywood, Doran's wife decided it was finally time for a change—so on one of her many solo trips to Italy she surprised her husband by purchasing a broken-down 300-year-old farmhouse for them to restore. The Reluctant Tuscan is about the author's transition from being a successful but overworked writer-producer in Hollywood to rediscovering himself and his wife while in Italy, and finding happiness in the last place he expected. In the witty tone that made him a success as a writer in Hollywood, The Reluctant Tuscan captivates those who simply love a good travel narrative as well as anyone who loves the quirky humor of Bill Bryson, Dave Barry, and Jerry Seinfeld.

In these pages, the authors of the widely-acclaimed The Wellness Syndrome throw themselves headlong into the world of self-optimization, a burgeoning movement that seeks to transcend the limits placed on us by being merely human, whether the feebleness of our bodies or our mental incapacities. Cederström and Spicer, though willing guinea pigs in an extraordinary (and sometimes downright dangerous) range of techniques and technologies, had hitherto undertaken little by way of self-improvement. They had rarely seen the inside of a gym, let alone utilized apps that deliver electric shocks in pursuit of improved concentration. But, in the course of a year spent researching this book, they wore head-bands designed to optimize meditation, attempted to boost their memory through learning associative techniques (and failed to be admitted to MENSAs), trained for weightlifting competitions, wrote what they (still) hope might become a bestselling Scandinavian detective story, enrolled in motivational seminars and tantra sex workshops, attended new-age retreats and man-camps, underwent plastic surgery, and experimented with vibrators and productivity drugs. André even addressed a London subway car whilst (nearly) naked in an attempt to boost attention. Somewhat surprisingly, the two young professors survived this year of rigorous

research. Further, they have drawn deeply on it to produce a hilarious and eye-opening book.

Written in the form of two parallel diaries, Desperately Seeking Self-Improvement provides a biting analysis of the narcissism and individual competitiveness that increasingly pervades a culture in which social solutions are receding and individual self-improvement is the only option left.

NEW YORK TIMES BESTSELLER • Giada De Laurentiis lavishly explores her food roots and the lifestyle traditions that define la bella vita, with the contemporary California twist that has made her America's most beloved Italian chef. For Giada, a good meal is more than just delicious food—it's taking pleasure in cooking for those you love, and slowing down to embrace every moment spent at the table. In Giada's Italy, she returns to her native Rome to reconnect with the flavors that have inspired the way she cooks and shares what it means to live la dolce vita. Here she shares recipes for authentic Italian dishes as her family has prepared them for years, updated with her signature flavors. Her Bruschetta with Burrata and Kale Salsa Verde is a perfect light dinner or lunch, and Grilled Swordfish with Candied Lemon Salad can be prepared in minutes for a quick weeknight meal. Sartu di Riso is a showstopping entrée best made with help from the family, and because no meal is complete without something sweet, Giada's Italian-inflected desserts like Pound Cake with Limoncello Zabaglione and Chianti Affogato will keep everyone at the table just a little bit longer. Filled with stunning photography taken in and around Rome, intimate family shots and stories, and more recipes than ever before, Giada's Italy will make you fall in love with Italian cooking all over again.

The very best of Italian cooking with Michela, Romina and Emanuela in Simply Italian. 'Wales and Italy, family and food: for us, these four things are inextricably linked and at the root of our upbringing. Whether at the family home in Wales or when we spend holidays in the small hilltop village we are from in northern Italy, we have always heard Dad say that 'la tavola' (the table) is the

central focus of our lives. It's where we cook, eat and socialise as a family.' Michela, Emanuela and Romina Chiappa grew up in Wales in the heart of a close-knit Italian community where food was always at the centre of family and social gatherings. Whether searching for porcini in the hills near their parents' home, or making pasta for Christmas Eve with the whole family, to sharing food at the annual Welsh-Italian summer picnic, the three sisters have been immersed in the Italian way of cooking all their lives. In their first cookbook they share their cherished family recipes, including all the pasta dishes recently seen in their Channel 4 series *Simply Italian*. From snacks, soups and salads, to mains, side dishes and desserts, *Simply Italian* brings you good, simple, fresh Italian food. Michela works as an agent in a sports management company, as well running a coffee and pizza café in Cardiff with her husband. Of the sisters, she's the risotto expert and also loves to make pasta sauces. Romina works for a luxury fashion brand in London, and loves to bake for friends and family. Emanuela runs an online business selling bespoke homemade gifts for children, and works as a nanny. She loves to cook time-consuming meals and entertain large groups.

Who are computer hackers? What is free software? And what does the emergence of a community dedicated to the production of free and open source software--and to hacking as a technical, aesthetic, and moral project--reveal about the values of contemporary liberalism? Exploring the rise and political significance of the free and open source software (F/OSS) movement in the United States and Europe, *Coding Freedom* details the ethics behind hackers' devotion to F/OSS, the social codes that guide its production, and the political struggles through which hackers question the scope and direction of copyright and patent law. In telling the story of the F/OSS movement, the book unfolds a broader narrative involving computing, the politics of access, and intellectual property. E. Gabriella Coleman tracks the ways in which hackers collaborate and examines passionate manifestos, hacker humor, free software project governance, and festive hacker conferences. Looking at the ways that hackers sustain their productive freedom, Coleman shows that these activists, driven by a commitment to their work, reformulate key ideals including free speech, transparency, and meritocracy, and refuse restrictive intellectual protections. Coleman demonstrates how hacking, so often marginalized or misunderstood, sheds light on the continuing relevance of liberalism in online collaboration.

For centuries, experts have argued that learning was about memorizing information: You're supposed to study facts, dates, and details; burn them into your memory; and then apply that knowledge at opportune times. But this approach to learning isn't nearly enough for the world that we live in today, and in *Learn Better* journalist and education researcher Ulrich Boser demonstrates that how we learn can matter just as much as what we learn. In this brilliantly researched book, Boser maps out the new science of learning, showing how simple techniques like comprehension check-ins and making material personally relatable can help people gain expertise in dramatically better ways. He covers six key steps to help you "learn how to learn," all illuminated with fascinating stories like how Jackson Pollock developed his unique painting style and why an ancient Japanese counting device allows kids to do math at superhuman speeds. Boser's witty, engaging writing makes this book feel like a guilty pleasure, not homework. *Learn Better* will revolutionize the way students and society alike approach learning and makes the case that being smart is not an innate ability—learning is a skill everyone can master. With Boser as your guide, you will be able to fully capitalize on your brain's remarkable ability to gain new skills and open up a whole new world of possibilities.
