Goyal's ISC Economics Question Bank with Model Test Papers for Class 12 Semester 2 Examination 2022 Springer Nature
As International Relations enters its second century as an academic discipline, leading expert Knud Erik Jørgensen provides a provocative assessment of its past, present and future. In this book, Jørgensen traces International Relations scholarship, from its formative interwar years through to rapid growth in students and researchers in the wake of globalization. He examines the resultant widening of scholarship in the field, and the effects that this has had on the global discipline. The result is a concise and challenging appraisal of International Relations, one which both celebrates its value and maps possible future directions.

Why does 1919 deserve further study and debate a hundred years later? What lessons for global history may we learn from the world order created at the end of the Great War? Drawing insight from the global turn of the past several decades that has forced us to reconsider the most important world events and processes since the French Revolution and especially the growing interest in World War I as a global conflict that extended far beyond the borders of Europe, this volume explores the global political ramifications of the treaties prepared at the Paris Peace Conference in 1919 by focusing on key topics: how the Paris Peace Conference re-shaped the geo-political configurations of the Middle East, the importance of transformations in Asia and particularly China in the immediate postwar period, the shifts in Southeastern Europe, new feminist movements in Central Europe, and the pre-history of neoliberalism. Read together, the papers demonstrate how the peace treaties signed in 1919 and 1920 marked a profound transformation on local, national, continental, and global scales.

Handbook Bibliometrics Taylor & Francis

Continuing advances in science and technology offer the promise of providing tools to meet global challenges in health, agriculture, the environment, and economic development; some of the benefits are already being realized. However, such advances have the potential to challenge the oversight systems for responsible conduct of life sciences research with dual use potential – research that may have beneficial applications but that also could be misused to cause harm. Between June 10 and 13, 2018, more than 70 participants from 30 different countries and 5 international organizations took part in an international workshop, The Governance of Dual Use Research in the Life Sciences: Advancing Global Consensus on Research Oversight, to promote global dialogue and increased common understandings of the essential elements of governance for such research. Hosted by the Croatian Academy of Sciences and Arts in Zagreb, Croatia, the workshop was a collaboration among the InterAcademy Partnership, the Croatian Academy, the Croatian Society for Biosafety and Biosecurity, and the U.S. National Academies of

Sciences, Engineering, and Medicine. This publication summarizes the presentations and discussions from the workshop.

ICT Systems Security and Privacy Protection Springer Nature

This book contains contributions from an international scientific conference, “Smart Nations: Global Trends In The Digital Economy”, which was organized by the State University of Management (Moscow). By presenting international research on the issues of the Smart Nations concept, this book includes topics such as smart business in a "smart city", digital marketing systems and Smart Nations phenomenon: social and business aspects. The conference proceedings cover legal, informational, technological and other aspects of socio-economic development in the context of digital innovations. This work provides significant value for scientists, teachers and students of higher educational institutions and specialists, who are researching socio-economic development issues in the era of smart technologies.

Bibliometrics and altmetrics are increasingly becoming the focus of interest in the context of research evaluation. The Handbook Bibliometrics provides a comprehensive introduction to quantifying scientific output in addition to a historical derivation, individual indicators, institutions, application perspectives and data bases. Furthermore, application scenarios, training and qualification on bibliometrics and their implications are considered.

ISC Economics Book 1 Class 11 Springer

This book presents a comprehensive analysis of the relations between US philanthropic foundations (in particular the Rockefeller Foundation and the Carnegie Endowment for International Peace) and the League of Nations. Generations of students and scholars have learned that the US, having played a key role in the creation of the League of Nations in 1919, did not join the organization and stood aloof from its activities during the whole interwar period. This book questions this idea and argues that, even though the US was not a de jure member of the League of Nations, the financial, human, and intellectual investment of foundations brought about the de facto integration of the US within the League system and also modified the latter's

architecture. The book describes the Americanization of the League and shows how it resulted from three strategies pursued throughout the interwar period: that of US foundations, that of the Secretariat, and that of the US federal government. The book also shows the limits of this Americanization and analyzes the role of the European experts in the coproduction of the postwar international order together with the US government. This book will be of interest to historians and political scientists, as well as undergraduate and graduate students in interdisciplinary programs of international relations.

Oswaal ISC 10 Sample Question Papers Class 11 Accountancy, Economics, Commerce, English Paper-1 & 2 (Set of 5 Books) For 2024 Exams (Based On The Latest CISCE/ISC Specimen Paper) Routledge

This proceedings book reflects the alternative way of development of the modern global economic system. It sets evolutionary development in opposition to revolutionary leap. The search for the best way to develop the world economy in the present and future is carried out. The social environment and the human-centered development of the modern global economic system have been explored. The features of training of personnel for the modern global economic system through the development of vocational education and training have been studied. Sustainable development, energy and food security have been identified as significant milestones of the progress of the modern global economic system. Innovations and digital technologies have been suggested as the drivers of growth and development of the modern global economic system. Consideration has been given to the institutional framework and legal groundwork for the development of the modern global economic system. The fundamentals have been identified and recommendations have been put forward for improving governmental regulation, financial and capital investment support for integration in the modern

global economic system. The book includes the best works based on the results of the 22nd International Research-to-Practice Conference “Current Issues of the Global Economy” which was held on June 19, 2020, at the Peoples’ Friendship University of Russia (PFUR) (Moscow, Russia) and the 14th National Research-to-Practice Conference “A New Paradigm of Social and Economic Development in the Age of Intelligent Machines,” which was held on May 14–16, 2020 (Nizhny Novgorod, Russia), VIII International Research-to-Practice Conference “Multipolar Globalization and Russia,” which was held on May 21–23, 2020 (Rostov-on-Don, Russia), III All-Russian Research-to-Practice Conference “Power, Business, and Education: The Ascent to Man,” which was held on May 21–22, 2020 (Krasnoyarsk, Russia), International Research-to-Practice Conference “Current Issues and Ways of Industrial Development: Engineering and Technologies,” which was held from September 28, 2020, till October 1, 2020 (Komsomolsk-on-Amur), and the 15th National Research-to-Practice Conference “New Models of Behavior of Market Players in the Conditions of Digital Economy,” which was held on October 29–30, 2020, at Ufa State Oil Technical University, Institute of Economics and Service (Ufa, Russia). The target audience of the book consists of scholars studying the features of development of the global economic system at the present stage and the prospects for its future progress.

Proceedings of the 2nd International Conference Engineering Innovations and Sustainable Development Routledge

This book presents the contributions from the 2nd International Conference Engineering Innovations and Sustainable Development, held in Samara, Russia on April 20–21, 2023. By presenting international research on various sustainability issues, it includes topics such as current trends in industrial and agricultural development, innovations in the construction and transport sectors, problems concerning the financing of innovative activities and governmental support for innovations, and engineering competences and skills in the era of new technologies. It also covers the economic, environmental, and informational aspects of sustainable development in the context of innovations. Finally, the book addresses theoretical and practical aspects by studying the phenomenon of sustainability and engineering development in terms of comparing international experiences. It provides significant value for scientists, teachers,

and students of higher educational institutions, and specialists, who are researching sustainable development issues in the era of engineering innovations.

Communicating a message effectively needs precision—be it verbal or non-verbal. At the professional front, the accuracy of the message to be shared becomes all the more important as the business decisions may depend on the same. This book, in its second edition, continues to detail on the pre-requisites of communicating effectively in the corporate environment and generally. Beginning with an overview of business communication, the book educates on the principles of communication—oral and written. Divided into nine chapters, the first two chapters deal with oral communication and the next seven deal with different forms of written communication. The book teaches how to write effective letters and prepare persuasive resumé. The chapters are well-supported with many examples and illustrative exhibits wherever required. A new chapter (Chapter 9) has been added titled ‘Writing to Communicate’ which presents incorrect use of language and phrases that rob the text, be it a report or a letter, of authenticity and credibility. The chapter also presents correct use of the examples and the rationale or logic in the form of explanations. Designed as a textbook for the management students, this book would be equally useful for the management professionals and executives. Key features • Observes a simple pattern of Read-Comprehend-Test-Follow • Discusses strategies for identification and improvisation of communication skills (both oral and written) • Provides numerous examples and illustrations that facilitate proper grasp of the topics discussed.

Oswaal ISC 10 Sample Question Papers Class 11 History For 2024 Exams (Based On The Latest CISCE/ ISC Specimen Paper) Springer Advertising Confluence offers a unique blend of both traditional

and contemporary social media thinking about advertising and integrated brand promotions throughout the world. Dr. Arora Anshu and Dr. Sabine Bacouel-Jentjens bring together articles that analyze creative social advertising in US, France, and Tunisia and offer a wide spectrum of advertising confluence from both the developed and emerging world. Contributors focus on both empirical studies with practical application as well as examinations of theoretical and methodological developments in the field of advertising studies. In all, they examine the wide range of global and local advertising strategies, the depth of integrated marketing communications, and the future of social media advertising.

Advertising Confluence Oswaal Books

This book offers a multidisciplinary analysis of emerging technologies and their impact on the new international security environment across three levels of analysis. While recent technological developments, such as Artificial Intelligence (AI), robotics and automation, have the potential to transform international relations in positive ways, they also pose challenges to peace and security and raise new ethical, legal and political questions about the use of power and the role of humans in war and conflict. This book makes a contribution to these debates by considering emerging technologies across three levels of analysis: (1) the international system (systemic level) including the balance of power; (2) the state and its role in international affairs and how these technologies are redefining and challenging the state's traditional roles; and (3) the relationship between the state and society, including how these technologies affect individuals and non-state actors. This provides specific insights at each of these levels and generates a better understanding of the connections between the international and the local when it comes to technological advance across time and space. The chapters examine the implications of these technologies for the balance of power, examining the strategies of the US, Russia, and China to harness AI, robotics and automation (and how their militaries and private corporations are responding); how smaller and less

powerful states and non-state actors are adjusting; the political, ethical and legal implications of AI and automation; what these technologies mean for how war and power is understood and utilized in the 21st century; and how these technologies diffuse power away from the state to society, individuals and non-state actors. This volume will be of much interest to students of international security, science and technology studies, law, philosophy, and international relations.

[Oswaal ISC 10 Sample Question Papers Class 12 Economics For Board Exams 2024 \(Based On The Latest CISCE/ ISC Specimen Paper\)](#) Allied Publishers

S Chand's ISC Economics (for Classes XI and XII) has been revised strictly according to the latest syllabus prescribed by Council for the Indian School Certificate Examinations, New Delhi. Each book of this series is enriched with economic explanation of both Micro and Macro Economic Theories, with practical examples, diagrams, mathematical formulae, derivations and numerical sums both solved and unsolved.

[EFFECTIVE BUSINESS COMMUNICATION](#) Springer

This introduction to International Relations shows how discussions of war, wealth, peace and power stretch back well over 500 years. It traces international ideas from medieval times, through the modern ages up to the collapse of the Soviet empire. It shows how ancient ideas still affect the way we perceive world politics. This is the 3rd edition of an accessible and popular text. It introduces the ways theologians like Augustine and Aquinas wrestled with the nature of the state and laid down rules of war that are still in use. It shows how Renaissance humanists like Machiavelli and Bodin developed our secular understanding of state sovereignty. The book argues that contract philosophers like Hobbes, Locke and Rousseau introduced concepts that laid the basis for the scholarly field of International Relations, and that Enlightenment thinkers followed up with balance-of-power theories, perpetual-peace projects and visions of trade and peaceful interdependence. These classic international theories

have been steadily refined by later thinkers by Marx, Mackinder and Morgenthau, by Waltz, Wallerstein and Wendt who laid the foundation for the contemporary science of International Relations (IR). The book places international arguments, perspectives, terms and theories in their proper historical setting. It traces the evolution of IR theory in context. It shows that core ideas and IR approaches have been shaped by major events and that they have often reflected the concerns of the Great Powers. Yet, it also makes clear that the most basic ideas in the field have remained remarkably constant over time.

[Proceedings of Topical Issues in International Political Geography](#) S. Chand Publishing

This proceedings book addresses the main issues of contemporary political geography and international relations, providing a platform for discussion and collaboration of experts in the fields of Political Geography, Geopolitics, International Relations, etc. Participants from all over the world consider the controversies and challenges posed by globalization, focusing, in particular, on the ideologies of globalization and regionalism, migration crises, prevention of ethnic conflicts, and measures to promote sustainable development. The content of the book may be interesting to expert community, academics and popular audience.

[Oswaal ISC 10 Sample Question Papers Class 12 Accounts, Economics, Commerce, English Paper-1 & 2 \(Set of 5 Books\) For Board Exams 2024 \(Based On The Latest CISCE/ISC Specimen Paper\)](#) Springer Nature

This book is the third volume in a trilogy that traces the development of the academic subject of International Relations, or what was often referred to in the interwar years as International Studies. This volume explores how International Relations progressed through the 20th century looking specifically at World War II, from the looming world war to the post-War reconstruction in Europe. This one of a kind project takes on the task of reviewing the development of IR, aptly published in celebration of the discipline's centenary.
