 InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Floating Ocean Platform OECD
 Use this guide to get help with consumer purchases, problems and complaints. Find consumer contacts at hundreds of companies and trade associations; local, state, and federal government agencies; national consumer organizations; and more.

A Cognitive Psychology of Mass Communication John Wiley & Sons
 A showcase collection of 178 outstanding resume samples with a bonus section that includes 16 resumes printed on special papers.

Canadian Business Crown
 Author Barbara J. Linsley has created a wonderful, exciting and compelling fact-based fiction work which parallels the journeys of two young girls along the Oregon Trail. Becky, who travels in a wagon train on the Trail in the 1840's and her modern-day counterpart Jenna who travels the Trail in modern times with her mother in their truck and camper. This story is based on facts taken from actual diaries of travelers on the Oregon Trail and the extensive study of history books. This makes perfect sense since Barbara J. Linsley is a trained school teacher who has worked in the New York school system for more than 20 years, helping students learn to love the study of history.

Twelve Years a Slave by Solomon Northup Department of the Army
 ProfScam reveals the direct and ultimate reason for the collapse of higher education in the United States— the selfish, wayward, and corrupt American university professor.

Lean Supply Chain CQ Press
 The Blackwell Handbook of Judgment and Decision Making is a state-of-the art overview of current topics and research in the study of how people make evaluations, draw inferences, and make decisions under conditions of uncertainty and conflict. Contains contributions by experts from various disciplines that reflect current trends and controversies on judgment and decision making. Provides a glimpse at the many approaches that have been taken in the study of judgment and decision making and portrays the major findings in the field. Presents examinations of the broader roles of social, emotional, and cultural influences on decision making. Explores applications of judgment and decision making research to important problems in a variety of professional contexts, including finance, accounting, medicine,

public policy, and the law.

This new edition of the Carnegie Classification of Higher Education groups American colleges and universities according to their missions and similarity of their programs and purposes. In this 1994 edition, for the first time, institutions are classified according to the highest level of degree conferred, and a new category is introduced—tribal colleges and universities. A foreword by Ernest L. Boyer reveals trends in higher education as indicated by changes in the classification. Preliminary figures and tables offer data on percentage of institutions within each classification area, enrollment by type of institution, and changes in enrollment over time. Part I then lists public and private institutions by state within the following classification areas: research universities (levels I and II); doctoral universities (levels I and II); master's (comprehensive) colleges and universities (levels I and II); baccalaureate (liberal arts) colleges I; baccalaureate colleges II; associate of arts colleges; and specialized institutions (religion and theology, medical, other health professions, engineering and technology, business and management, art, music, design, law, teachers colleges, and tribal colleges and universities). An index lists institutions alphabetically, along with their respective classifications. (JDD)

The New Cool Jossey-Bass

In this new edition of the irreverent, celebrated bestseller, master copywriter Luke Sullivan looks at the history of advertising, from the good, to the bad, to the ugly. Updated to cover online advertising, this edition gives you the best advertising guidance for traditional media and all the possibilities of new media and technologies. You'll learn why bad ads sometimes work, why great ads fail, and how you can balance creative work with the mandate to sell.

Transport, Energy and CO2 CRC Press

Offers information & advice to help consumers gain knowledge about their rights & about how to make the right choices. Includes: corporate consumer contacts; better business bureaus; trade association & other dispute resolution programs; state, county & city government consumer offices; selected federal agencies; military commissary & exchange contacts; media programs; occupational & professional licensing boards; legal help; consumer credit counseling services; consumer groups & much more. Especially helpful for consumer complaints or problems.

Disaster Policy and Politics K & B Products

Praise for the previous edition: "... highly recommended for high school, public, and academic libraries."

Who's who in Interior Design Oxford University Press, USA
 Never cross a master of the bow . . . A young archer bent on

revenge against the knight who impoverished his family encounters an enigmatic stranger who promises him a far more potent form of retribution. But when Thomas finds himself hurled by magic to fight battles in faraway lands, he soon discovers that the vengeance his mysterious benefactor offers could change not only one archer's destiny, but that of the entire world. A masterful short historical fantasy full of magic, archery, and intrigue by the author of the acclaimed Greatcoats and Spellslinger series.

Blackwell Handbook of Judgment and Decision Making Regnery Publishing

In FY 1990, Congress directed the Secretary of the Navy to commission a study by the National Academy of Sciences for the production of an integrated technology plan for the evolution of aircraft carriers in the first half of the twenty-first century. The House-Senate conferees emphasized "that the product of this study is to be a technology plan for the evolution of sea bases for the most efficient and economical accommodation of tactical air power in the first half of the twenty-first century". Based on this broad charter of evaluating sea bases, an examination of the floating ocean platform concept was included in the study. The floating ocean platform is a generic description of a large, relatively stationary or slowly mobile, platform that can be positioned in most areas of the ocean, and can serve a variety of purposes. The present report was the author's input to the study. It was based on technical analyses, literature reviews and surveys, and discussions/visits with the main groups and organizations involved in developing the floating ocean platform. All discussion material was unclassified, as are the contents of this report. All the external inputs and discussions, too numerous to mention, made this report possible, and are greatly appreciated. The first part of this report is the summary narrative that was submitted by the author to the Technology Group of the study. The second part is the viewgraphs that were presented to the Technology Group by the author on 12 February 1991. The third part is a selected bibliography of studies on the floating ocean platform over the past two decades, with over three thousand references identified.

E. Davon Kelly presents a challenge to each of us by asking, "What will your legacy be?" In his book, you will follow the journey of one man who shares life lessons learned on the basketball courts to his application of those lessons in his multi-million dollar businesses. At the end of each chapter, the author presents questions for the reader to answer that will help guide self-discovery of the legacy question.

September 11 Routledge

Car ownership is set to triple by 2050, trucking activity will double

and air travel could increase fourfold. This book examines how to enable mobility without accelerating climate change. It finds that if changes are made to the way people travel, adoption of technologies to improve vehicle efficiency and a shift to low-CO₂ fuels, it is possible to move onto a different pathway where transport CO₂ emissions by 2050 are far below current levels, at costs that are lower than many assume. The report discusses the prospects for shifting more travel to the most efficient modes and reducing travel growth rates, improving vehicle fuel efficiency by up to 50% using cost-effective, incremental technologies, and moving toward electricity, hydrogen, and advanced biofuels to achieve a more secure and sustainable transport future. If governments implement strong policies to achieve this scenario, transport can play its role and dramatically reduce CO₂ emissions by 2050.

Profscam Infobase Publishing

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

DIANE Publishing

A report on genius inventor Dean Kaman's FIRST program follows a team of brilliant, misfit high school students through the program's 2009 robotics competition, during which the teens under the guidance of a dedicated teacher confronted other hopefuls in stadiums throughout the country.

Hey, Whipple, Squeeze This John Wiley & Sons

In this fifth edition of *A Cognitive Psychology of Mass Communication*, author Richard Jackson Harris continues his examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge influences our attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics – sex, violence, advertising – to lesser-studied topics, such as values, sports, and entertainment education. The fifth and fully updated edition offers: highly accessible and engaging writing contemporary references to all types of media familiar to students

substantial discussion of theories and research, including interpretations of original research studies a balanced approach to covering the breadth and depth of the subject discussion of work from both psychology and media disciplines. The text is appropriate for Media Effects, Media & Society, and Psychology of Mass Media coursework, as it examines the effects of mass media on human cognitions, attitudes, and behaviors through empirical social science research; teaches students how to examine and evaluate mediated messages; and includes mass communication research, theory and analysis.

Challenge and Cheer OECD Publishing

An ideal combination of communication theory and practical advice, *Communicating About Health: Current Issues and Perspectives, Fourth Edition*, is an indispensable resource for readers looking to improve their communication abilities in the health care field. Written by Athena du Pre—an experienced researcher and noted scholar—the text offers an excellent balance of theory and practice; research and pedagogy; coverage of patient/caregiver issues; and material on the current, historical, and philosophical backgrounds of communication in health care. In addition to enhancing features found in the previous edition, this new edition includes a greater emphasis on theory, narrative, and technology in order to reflect changes in the health industry. What's New to the Fourth Edition? * A new chapter—eHealth, mHealth, and Telemedicine—describes the global impact of smartphone and tablet technology, tailored health messages, and the Internet on the health industry * A new chapter, Health Care Administration, Human Resources, Marketing, and PR, provides in-depth coverage of the contributions and communication strategies involved in leadership, morale, service excellence, community engagement, and more * An expanded discussion of communication not only involves physicians and nurses but also pharmacists, allied health personnel, dentists, therapists, and others * New features—Can You Guess?, What Do You Think?, Check It Out!, and In Your Experience—offer a higher level of engagement with students and stimulate critical thinking and discussion Support Package (contact your Oxford sales representative or call 800-280-0280 to request these resources) * An interactive website, known as a Prezi, is available for each chapter at www.oup.com/us/dupre and includes videos, activities, discussion questions, key points, and more. Suitable for use in class or online. * An Instructor's Manual and Test Bank, available both in print and online at www.oup.com/us/dupre, features

sample syllabi, test questions, self-assessment activities, background reading, and more.

History of Wireless CRC Press

The artificial intelligence (AI) landscape has evolved significantly from 1950 when Alan Turing first posed the question of whether machines can think. Today, AI is transforming societies and economies. It promises to generate productivity gains, improve well-being and help address global challenges, such as climate change, resource scarcity and health crises.

Network World Rutgers University Press

Important new insights into how various components and systems evolved Premised on the idea that one cannot know a science without knowing its history, *History of Wireless* offers a lively new treatment that introduces previously unacknowledged pioneers and developments, setting a new standard for understanding the evolution of this important technology. Starting with the background-magnetism, electricity, light, and Maxwell's Electromagnetic Theory—this book offers new insights into the initial theory and experimental exploration of wireless. In addition to the well-known contributions of Maxwell, Hertz, and Marconi, it examines work done by Heaviside, Tesla, and passionate amateurs such as the Kentucky melon farmer Nathan Stubblefield and the unsung hero Antonio Meucci. Looking at the story from mathematical, physics, technical, and other perspectives, the clearly written text describes the development of wireless within a vivid scientific milieu. *History of Wireless* also goes into other key areas, including: The work of J. C. Bose and J. A. Fleming German, Japanese, and Soviet contributions to physics and applications of electromagnetic oscillations and waves Wireless telegraphic and telephonic development and attempts to achieve transatlantic wireless communications Wireless telegraphy in South Africa in the early twentieth century Antenna development in Japan: past and present Soviet quasi-optics at near-mm and sub-mm wavelengths The evolution of electromagnetic waveguides The history of phased array antennas Augmenting the typical, Marconi-centered approach, *History of Wireless* fills in the conventionally accepted story with attention to more specific, less-known discoveries and individuals, and challenges traditional assumptions about the origins and growth of wireless. This allows for a more comprehensive understanding of how various components and systems evolved. Written in a clear tone with a broad scientific audience in mind, this exciting and thorough treatment is sure to become a classic in the field.
