Announcing the biggest, best, most innovative book ever on paper craft. Even better, this is not about how to use costly, artsy paper, but how to turn stuff around the house—magazines and shopping bags, candy wrappers and paint sample cards, wrapping paper, old maps, and paper towel tubes—into stunning jewelry, gifts, home decor, party favors, and much more. Chances are you've seen the author's cutting-edge work in the windows of Anthropologie, where she is the chain's merchandising manager. An inveterate crafter who creates projects and styles photo shoots for magazines like *Parents* and *Vogue* Knitting, Kayte Terry takes the most versatile of materials and the most basic of crafts (remember snipping valentines out of construction paper?), and creates something completely transformative. Turn a sheaf of any white or graph paper into an amazing Scrap Happy Globe Lantern for the dining room. Fashion colored tissue paper into Songbird Votives, leftover raffle tickets into a Prizewinning Bowl, that out-dated pile of holiday catalogs into a picture frame. There's a necklace made of playing cards, a gum wrapper bracelet, and barrettes made by quilling—a paper technique that goes back to the Renaissance. Every project is photographed in full color, and includes step-by-step illustrations and instructions. Truly a book that shows how to think outside the (cardboard) box.

In the past 10-15 years, the major welding machine manufacturers have developed small, efficient welders for home shop use. Many of these even draw from a standard 120v outlet. For the price of a low to mid-range table saw, a home welder can buy a good quality MIG welding machine. According to welding service stores, up to one third of their customers are home hobbyists. This book is aimed at the beginning to intermediate level home welder—anyone who wishes to use welding to repair or create objects around the home. An overview of welding basics, materials, metal forming, and safety will be followed by step-by-step how-to projects with full color photos. Featured projects include simple shop furniture, baker's shelf, arbor, garden gate, and garden bench. A trip to any yard and garden center will show the current popularity of metal trellises, archways, furniture, and decorative art. Many of these pieces are prohibitively expensive, yet most are fabricated using the most basic of welding and metal forming techniques and inexpensive materials. Junior colleges, community education programs, and local art councils regularly offer welding courses for the home hobbyist or artist. Until now, no book has covered welding basics and provided detailed how-to projects with easy-to-follow photographs and steps.
