The study of security market imperfections, namely the predictability of equity stock returns, is one of the fundamental research areas in financial modelling. These anomalies, which are not consistent with existing theories, concern the relation between stock returns and variables, such as firm size and earnings-to-price ratios, and

seasonal effects, such as January and turn-of-the-month. This book provides the most complete and current account of work in the area. Leading academics and investment researchers have combined to produce a comprehensive coverage of the subject, including both cross-sectional and time series analyses, as well as discussing the measurement of risk and prediction models that have been used by institutional investors. The studies cover many worldwide markets including the US, Japan, Asia, and Europe. The book will be invaluable for courses in financial engineering,

investment and portfolio management, and as a reference for investment professionals seeking an up-to-date source on return predictability.

This book explores the nature and uniqueness of leadership in Iceland within a business and economic context. Starting with an analysis of Iceland's geographical location, historical development and societal culture, the authors critically examine the major elements of the Icelandic business environment from an individual to a global level, and from economic prosperity to financial collapse. They particularly focus on leadership and human resource management within this unique societal culture and discuss the

specific issues that are unique to Iceland, i.e. entrepreneurship, gender egalitarianism, equality, low power-distance, reflecting on, and orienting within contemporary leadership theories. The book covers a variety of analytical methods and cases, providing a unique introduction to leadership in Iceland, and opening avenues for further research into this relatively new phenomenon.

*A History of Psychology* places social, economic, and political forces of change alongside psychology's internal theoretical and empirical arguments, illuminating how the external world has shaped psychology's development, and, in turn, how the late twentieth century's psychology has shaped society. Featuring extended treatment of

important movements such as the Enlightenment and the Scientific Revolution, the textbook approaches the material from an integrative rather than wholly linear perspective. The text carefully examines how issues in psychology reflect and affect concepts that lie outside the field of psychology's technical concerns as a science and profession. This new edition features expanded attention on psychoanalysis after its founding as well as new developments in cognitive science, artificial intelligence, and behavioral economics. Throughout, the book strengthens its exploration of psychological ideas and the cultures in which they developed and reinforces the connections between psychology, modernism, and postmodernism. The

textbook covers scientific, applied, and professional psychology, and is appropriate for higher-level undergraduate and graduate students.

Adapted from David M. Newman's best-selling *Sociology: Exploring the Architecture of Everyday Life*, this briefer, streamlined version continues to show students how to see the "unfamiliar in the familiar," inspiring them to think critically about their own lives and social contexts. As in the full

text, the author's approachable writing style and lively personal anecdotes make the Brief Edition a text that "reads like a real book." It uses the metaphors of "architecture" and "construction" to help students understand that society is not something that exists "out there," independently of themselves; it is a human creation that is planned, formed, maintained, or altered by individuals. Rather than surveying every subfield in sociology, the Brief Edition focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures.

If some couple get married today, it seems as though they're just as likely to

get divorced as remain married but why? The Rev. Fr. Anthony Mary Odinka Nwachukwu considers that question in this booklet that, when first published, quickly sold more than forty thousand copies in Nigeria by the National Catholic Council of Women Organization of Nigeria. He examines the various steps that individuals particularly married people can take to achieve happy relationships. Learn how to: see what is truly important when considering a potential life partner; take preliminary steps to improve the chances of enjoying a successful marriage; share each other's joys, frustrations, and sorrows; and apply creative intelligence and caution in your marriage. The author also notes that whenever suspicion sets in or occurs in a marriage, partners begin to hide certain

information from each other, thereby robbing themselves, and others (including their own children) of moral values. Achieve peace and unity in everyday relationships and boost your chances of enjoying a lifelong union with the Guide in *The 50 Steps to Happy Marriage*.

Psychiatry is arguably the most misunderstood specialty in modern medicine and psychiatrists are often thought of as part physician, part confessor, part police officer, and part shaman. In *Demystifying Psychiatry*, two eminent psychiatrists offer an illuminating look at the entire field, offering a clear and informative portrait of a medical specialty often clouded in myth. Zorumski and Rubin range from a basic discussion of what psychiatry is, to the types of illnesses psychiatrists treat,

the training of psychiatrists, the treatment of psychiatric disorders (covering medications, psychotherapy, lifestyle interventions, electroconvulsive therapy, and much more), and how families can help with treatment. They caution the consumer about practices that should raise red flags. The book also covers new trends in psychiatry and explores the future of the field, predicting that major advances in genetics and neuroscience will lead to rapid and amazing changes in psychiatry. The book concludes with extensive reference materials that will be valuable both to general readers and medical practitioners.

Research shows that five strategies

correlate with the successful completion of a dissertation:·Establishing a consistent writing routine·Working with a support group·Consulting your advisor·Understanding your committee's expectations·Setting a realistic and timely scheduleBuilding on these insights, this book is for anyone who needs help in preparing for, organizing, planning, scheduling, and writing the longest sustained writing project they have encountered, particularly if he or she is not receiving sufficient guidance about the process, but also for anyone looking to boost his or her writing productivity.The author uncovers much tacit knowledge, provides advice on working with dissertation advisors and committee members, presents proven techniques for the prewriting and writing

stages of the dissertation, sets out a system for keeping on schedule, and advocates enlisting peer support. As Peg Boyle Single states, "my goal is quite simple and straightforward: for you to experience greater efficiency and enjoyment while writing. If you experience anxiety, blocking, impatience, perfectionism or procrastination when you write, then this system is for you. I want you to be able to complete your writing so that you can move on with the rest of your life." Few scholars, let alone graduate students, have been taught habits of writing fluency and productivity. The writing skills imparted by this book will not only help the reader through the dissertation writing process, but will serve her or him in whatever career she or he embarks

on, given the paramount importance of written communication, especially in the academy. This book presents a system of straightforward and proven techniques that are used by productive writers, and applies them to the dissertation process. In particular, it promotes the concept of writing networks – whether writing partners or groups – to ensure that writing does not become an isolated and tortured process, while not hiding the need for persistence and sustained effort. This book is intended for graduate students and their advisers in the social sciences, the humanities, and professional fields. It can further serve as a textbook for either informal writing groups led by students or for formal writing seminars offered by departments or graduate colleges. The

techniques described will help new faculty advise their students more effectively and even achieve greater fluency in their own writing.

step investigation into human nature, considering why so many people get angry, producing an intense response without any good reason. Through her experience and professional studies, author Dr. Christine Onu offers antidotes to those hidden reasons causing people appear to be sick when there is no actual sickness. There are many problems plaguing society today for which the root causes are not self-evident. We are naturally inclined to think and care for ourselves and our own safety more than we think or care for others. But nobody is an island; we need each other for life to be more meaningful. While there is absolute need for each of us to take proper care of ourselves, we should also be interested in the needs and progress of others. *Beyond the Iceberg* explores

the value of psychology as a necessary tool to deal with and understand human behaviors and the problems that arise in interpersonal relationships, so that we are better able to resolve conflicts when they arise. Each of us creates our own life story and reality—who we are as human beings. *Beyond the Iceberg* considers the hidden emotions that create problems in our relationships, at work, and at home, while examining the causes for our psychological challenges and possible solutions.

It often seems that there is more confusion than consensus regarding tourism theory. Does tourism have theories it can truly own, or does it just borrow from other academic disciplines? It can be difficult to understand the theories and conceptual frameworks available, and how to apply these ideas to a research endeavour. This book reviews theoretical perspectives on tourism from planning and management, through marketing and host communities to the tourism consumers themselves. Covering issues such as tour guiding, rural tourism development and destination image, it provides a complete guide to the industry. Including pedagogical features throughout, this book is an accessible approach to a controversial subject.

Expert advice in a back-to-basics handbook on how to beat the market-the classic way In *Investment Psychology Explained* Martin J. Pring, one of the most respected independent investment advisors in the world, argues that in the revisionist '90s there are no quick, magical paths to market success.

Rather, he emphasizes the timeless values of hard work, patience, and self-discipline-and much more. Drawing on the wisdom of creative investors such as Jesse Livermore, Humphrey Neill, and Barnard Baruch, as well as his own experience, Pring shows how to: \*

- Overcome emotional and psychological impediments that distort decision making
- \* Map out an independent investment plan-and stick to it
- \* Know when to buck herd opinion-and "go contrarian"
- \* Dispense with the myths and delusions that drag down other investors
- \* Resist the fads and so-called experts whose siren call to success can lead to disaster
- \* Exploit fast-breaking news events that rock the market
- \* Deal skillfully with brokers and money managers
- \* Learn and understand the

rules that separate the truly great investors and traders from the rest. Reading *Investment Psychology Explained* will give you a renewed appreciation of the classic trading principles that, through bull and bear markets, have worked time and again. You'll see, with the help of numerous illustrative examples, what goes into making an effective investor-and how you can work toward achieving that successful profile.

“The Reverend Father Anthony Odinakachi Nwachukwu, Ph.D., Psy.D., has ventured into uncharted territory in this provocative and stimulating study of the creative integration of spiritual psychology and the West African mind.

His insightful probing into the inner workings of the human mind and spiritual development as epitomized in human relationships is a major contribution to the related fields of West African studies, spiritual psychology, and religious consciousness”. John H. Morgan, President Ph.D. (Hartford), D.Sc. (London), Psy.D. (FH/Oxford) Senior Fellow of Foundation House, Oxford. “If discipline [i.e. - doing the right thing when no one is watching] and sound moral living are the measurements for solid education, self-fulfillments, religious practices and healthy relationships, then, the book has said it all. It has, not only, provided the various management strategies that resuscitate broken relationships, but also, created conscious inner strengths that keep the

healthy ones alive, both in the private and public sectors. I recommend that everybody joins Nwachukwu in this timely opportunity and the 21st century campaign for sound radical changes in the individual lives and society”.

Anthony J. Grieco, MD, MACP, Professor of Medicine, NYU School of Medicine  
 “The African erudite author once more avails every reader of his psychological insight into the secrets of maintaining a healthy relationship. While promoting a positive and optimistic attitude, he gets to the root of the illusions, presumptions and projections that impact negatively on its attainment. The author's reflections in a way seem to have translated the Tillichian idea of the paradoxical co-existence of the good and the bad into its psychological, ethical

and practical relevance. I highly recommend this book to everyone who is out to make his life a success story”. Dr.-theol. Sylvester I. Ihuoma, Delegate for Africans, University of Muenster, Germany. \* “Wow! This book is more of the GPS system that guides each individual life”. It is actually a book for every rational person”. Joan Bareth, (NM, NYU) \* “Many authors have written on a variety of related subjects on human relationships. But this book practically touches on every aspect of human life, political, socio-religious, spiritual etc and this makes it unique for everybody to read”. Mr. Andrew Clerico (Fixed Income Portfolio Manager, NY) “Sex has no religion - I agree. Your book is as exciting as the Action Alert Tonic - AAT you have provided for the young

The Igbo people in Nigeria continue to make some movements toward Christianity, but many fail to practice the faith properly. Tribal traditions and old beliefs continue to be mixed with Christian concepts. By exploring the problem from a psychological and pastoral perspective, author Bartholomew N. Okere seeks to discover ways to advance the Christian faith. Okere, an ordained Catholic priest, asks serious questions about the nature of

religion: Can someone believe in a supernatural being without any proof that the being is affecting his life? Can the notion of God be therapeutic in any sense, especially when people face different life-threatening situations? Can a hungry person sing and praise God on empty stomach? Can the name of God be employed for political gains? The Christian religion in Nigeria has dramatically affected the people of Igboland. Discover why this is so important, and learn more about faith, religion, and life in Nigeria in *An Appraisal of the Growth of the Christian Faith in Igboland*.
