Cracking the Intercollegiate General Surgery FRCS Viva 2e Elsevier Health Sciences

This new book is targeted at higher trainees in orthopaedic surgery preparing for the second part of the FRCS (Tr & Orth) exam. Mirroring the exam structure, the content enables the candidate to practise key topics for discussion. The book lends itself well to exam preparation.
Viva Tutorials for Surgeons in Training Cambridge University Press
 Landmark Papers in General Surgery will give surgeons, surgical trainees and other healthcare professionals an expert appraisal of key papers, and fast access to the evidence base behind current clinical practice in General Surgery. Each chapter draws together a fascinating selection of the most important clinical trials across every subspecialty within General Surgery, as selected and appraised by a panel of experts. Organized according to a common format, each discussion offers a clear structure by which to appraise the medical literature. Following a background summary of each trial, experts discuss the impact of the research and critique the methods used, giving the reader rapid understanding of the paper's place within the wider field of research. This emphasis on the tools of critical appraisal is enhanced by an introductory chapter equipping the reader with the skills required to knowledgeably appraise a research paper.

For clinicians needing to keep abreast of the vast scope of medical research, this book will prove an interesting and timesaving resource, but it will also appeal to allied health professionals keen to improve the depth of their understanding of surgery. By bringing together the evidence base with expert guidance on critical appraisal, higher surgical trainees preparing for the academic and specialty sections of the FRCS exit examination will also find the text invaluable as a means of consolidating and nuancing their knowledge.

FRCS General Surgery Viva Topics and Revision Notes CRC Press
 The range of topics which you may be questioned on during a final ENT Viva exam can be very varied. Viva Training in ENT ensures you can answer any question confidently and comprehensively, this book provides you with over 430 examples, mirroring exactly the format of the examination questions and covering all the relevant areas of the curriculum. Dedicated chapters on topics such as rhinology, head and neck, otology and paediatrics take you through the types of scenarios that you are likely to face, often presenting you with a clinical example and asking you a range of questions to test not only your diagnostic skills, but also your supporting knowledge. Three further chapters cover the clinical section of the exam involving patients, and the operative surgery and communication skills stations. These chapters provide both example scenarios and general advice on how to impress the examiners, giving you a thorough grounding in how best to communicate your knowledge and complete tasks calmly and methodically. For each question, detailed model answers and explanatory notes are provided, along with links to relevant websites and key journal articles for further reference. Questions are supplemented with over 85 illustrations and photographs, allowing you to review real examples of the conditions about which you will be questioned. For any candidate wishing to complete the FRCS (ORL-HNS) or the DOHNS Viva with professionalism and a real depth of knowledge, this book's detail and variety of information will be invaluable. Its clear layout and topical structure also make it ideal for surgeons wishing to refresh their clinical knowledge.

Essential Clinical Anesthesia Cambridge University Press
 Demonstrates how to prepare for their surgical clinical examination, And how to examine and take a history from a patient. This title has cases to work through that they encounter on the wards and in the exam. It includes lists of frequently asked questions with clear answers.

Cracking the Intercollegiate General Surgery FRCS Viva Churchill Livingstone

This title is directed primarily towards health care professionals outside of the United States. It will be of interest to Candidates for the Fellowship in General Surgery of the Royal College of Surgeons and equivalent examinations, in particular the

Fellowship of the Australian College of Surgeons. It describes the anatomical knowledge required for the 45 most common general surgical procedures. Covers approximately 60 of the commonest operations in general surgery that need to be mastered during higher surgical training Each chapter covers the anatomy that will be encountered during the operation Includes notes on anatomical variations that may be encountered Fully illustrated with clear line drawings Matches the knowledge expected of candidates for the General Surgical Fellowship Totally redesigned with new artwork More on endoscopic procedures Greater coverage of anatomical variation that the surgeon will encounter **TOP KNIFE: The Art & Craft of Trauma Surgery** Springer
What are the indications for necrosectomy? How you perform an EUA for acute peri-anal sepsis? What do you understand by the term Early Goal-Directed Therapy (EGDT)? Remember: this is a consultant's exam, and giving a range of options is not good enough. You must tell the examiner what you as a consultant are going to do. The FRCS is a uniquely challenging prospect; highly detailed, wide-ranging and encompassing both theory and practice. Preparation for this exam can be very difficult, and resources tailored to it are scarce. As the consolidated notes of a recent successful candidate, this book is an essential resource when preparing for the viva. The wide variety of questions require you to define, diagnose or choose between treatment options, while MCQs and SBAs help you to objectively evaluate your progress - a unique supplement to your study plan. Answers provided are comprised of an invaluable combination of detailed written answers and lists that will remind you of key points and help you structure your preparation.
Passport for the Orthopedic Boards and FRCS Examination CBS Publishers & Distributors Private Limited
This unique collection of multiple choice questions (MCQs) is specifically written to help surgical trainee candidates prepare for Part One of the FRCS general surgery exit examination, which features MCQs on general surgery. The book helps candidates gauge the types of questions likely to be asked and the extent of preparation required for this examination. The wide range of surgical topics covered, including general surgery and emergency surgery in addition to endocrine, vascular, upper GI, hepatobiliary, colorectal and transplant surgery, also makes it a useful revision text for MRCS examination candidates.
Clinical Cases and OSCEs in Surgery E-Book CRC Press
With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery. The book assists readers in their preparation for examinations and to test their knowledge of the principles and practice of surgery as outlined within Bailey & Love. Sub-divided

The Anaesthesia Science Viva Book Cambridge University Press
This textbook is based on the curriculum for US, UK, Canadian and Australasian Orthopedic trainees. It offers an in-depth summary of the knowledge needed to pass the boards and FRCS examination in Trauma and Orthopedic surgery. The focus is on basic information on every orthopedic subspecialty, including: surgical anatomy, basic sciences, adult reconstruction, pediatric orthopedics, foot and ankle surgery, orthopedic pathology, the spine, sports surgery, upper limb, wrist and hand surgery, and orthopedic traumas. All sections are written by experts in the respective field and utilize a consistent bullet-point format, chosen to facilitate the learning experience and help readers memorize and organize knowledge. A clear and concise "take-home message" section precedes each topic, and key references are highlighted at the end of each chapter.
Basic Science for the MRCS OUP Oxford
SBAs and EMQs for the MRCS Part A is an invaluable guide to sitting and passing the examination, which tests the candidates on their knowledge of the basic sciences as applied to surgical practice. Based on the highly successful Insider Medical MRCS Examination Clinical Course, this book facilitates the pathway for a novice clinician to pass this ch
Surgical Critical Care Vivas CRC Press
Comprehensive textbook of operative surgery. It is a practical manual aimed at the surgeon who is about to carry out an operation, rather than just a description of the principles suitable for an examiner. Although it is directed primarily towards health care professionals outside of the United States, it is also intended as a vade mecum for a trained surgeon anywhere.

Surgery MCQs and EMQs JP Medical Ltd
The clinical practice of anesthesia has undergone many advances in the past few years, making this the perfect time for a new

state-of-the-art anesthesia textbook for practitioners and trainees. The goal of this book is to provide a modern, clinically focused textbook giving rapid access to comprehensive, succinct knowledge from experts in the field. All clinical topics of relevance to anesthesiology are organized into 29 sections consisting of more than 180 chapters. The print version contains 166 chapters that cover all of the essential clinical topics, while an additional 17 chapters on subjects of interest to the more advanced practitioner can be freely accessed at www.cambridge.org/vacanti. Newer techniques such as ultrasound nerve blocks, robotic surgery and transesophageal echocardiography are included, and numerous illustrations and tables assist the reader in rapidly assimilating key information. This authoritative text is edited by distinguished Harvard Medical School faculty, with contributors from many of the leading academic anesthesiology departments in the United States and an introduction from Dr S. R. Mallampati. This book is your essential companion when preparing for board review and recertification exams and in your daily clinical practice.
Postgraduate Paediatric Orthopaedics CRC Press

This comprehensive and up to date revision text covers all essential topics in critical care, emergency and general surgery as well as critical appraisal of research papers, basic statistics and data manipulation for the academic section. This essential revision guide provides you with the vital points for each topic, presented in a concise, structured manner and referenced where appropriate. It is essential reading for anyone preparing for the FRCS General Surgery exam.
War Surgery Radcliffe Publishing
The Royal College of Surgeons' of England two-day "definitive surgical trauma skills course" is run by the authors. The course began in 1997 but a new syllabus has recently been put in place. The focus is on thoracic, abdominal and vascular injuries, caused by both penetrating trauma, such as a knife, and ballistic trauma caused by guns. This Manual accompanies the course and its aim is to "demystify the body" and show how to control massive blood loss. Interventions, whether they be military or civilian, are described in full, and techniques derived from the battlefield and world-wide hotspots in trauma —are exemplified within this book.
MCQs for FRCS CRC Press
Brings together what every trainee orthopaedic surgeon needs to know about approaching paediatric cases for examinations and clinical practice.
