The beloved bestselling collection of common sense wisdom from a celebrated psychologist and military veteran who proves it's never too late to move beyond the deepest of personal losses. After service in Vietnam, as a surgeon for the 11th Armored Cavalry Regiment in 1968-69, at the height of the war, Dr. Gordon Livingston returned to the U.S. and began work as a psychiatrist. In that capacity, he has listened to people talk about their lives--what works, what doesn't, and the limitless ways (many of them self-inflicted) that people find to be unhappy. He is also a parent twice bereaved; in one thirteen-month period he lost his eldest son to suicide, his youngest to leukemia. Out of a lifetime of experience, Gordon Livingston has extracted thirty bedrock truths, including: We are what we do. Any relationship is under the control of the person who cares the least. The perfect is the enemy of the good. Only bad things happen quickly. Forgiveness is a form of letting go, but they are not the same thing. The statute of limitations has expired on most of our childhood traumas. Livingston illuminates these and twenty-four

other truths in a series of carefully hewn, perfectly calibrated essays, many of which focus on our closest relationships and the things that we do to impede or, less frequently, enhance them. Again and again, these essays underscore that "we are what we do," and that while there may be no escaping who we are, we have the capacity to face loss, misfortune, and regret and to move beyond them--that it is not too late. Full of things we may know but have not articulated to ourselves, *Too Soon Old, Too Late Smart* offers solace, guidance, and hope to everyone ready to become the person they'd most like to be.

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to

overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both

our species' immense success and the origins of human uniqueness.

Die vorliegende Publikation vereint auf empirischer Basis theoretische und praktische Perspektiven auf das Marketingübersetzen für die Automobilbranche im Sprachenpaar Deutsch-Polnisch. Die differente gesellschaftlich-kulturelle Entwicklung sowie Diskrepanzen im Automobilbau in beiden Ländern stellen den interlingualinterkulturellen Transfer deutscher Marketingtexte ins Polnische vor besondere Herausforderungen. Die Analyse der Übersetzungsprobleme erfolgt am Beispiel der Marketingtextsorte Kundenzeitschrift in Anlehnung an den funktionalen Ansatz der Translationswissenschaft. In die wissenschaftliche Beschreibung integriert die Autorin das berufspraktische Konzept der Transkreation, das in die modellhafte Darstellung dieses translatorischen Bereichs einfließt. This publication combines, on an empirical basis, the theoretical and practical perspectives on marketing translation for the automotive industry in the language pair German-Polish. The different sociocultural development as well as discrepancies in the automotive industry in both countries pose special challenges for the interlingual-intercultural transfer

of German marketing texts into Polish. The analysis of the translation problems is carried out using the example of the marketing text type customer magazine, following the functional approach of translation studies. In the scientific description, the author integrates the professional-practical concept of transcreation, which flows into the model representation of the interlingual-intercultural transfer of marketing texts.

By the end of the twentieth century certain new media had established themselves which have profoundly changed communication among lovers. SMS and email in particular have created new relational forms and forms of intimacy. From declarations of love on talk shows to televised dating games and marriage quiz shows, television offers a panoply of wildly popular theatrical communications of love. Does the neglecting of traditional communication media, such as love letters and the telephone, cause the intermingling of intimacy with the public sphere and hence the abrogation of it? From the disciplines of sociology, history, cultural and media studies and linguistics, this book offers answers to this question by analyzing and discussing new media from various perspectives. Contributions by Eva Illouz, Joachim R. Höflich, Friedrich Krotz, Helga Kotthoff, Karl Lenz, Sabine Maasen, and others.

Durch Verstehen zum Verständnis... Für ein stressarmes Zusammenleben mit Hunden, Spaß am Umgang mit ihnen und gute Erziehungserfolge sind Verständnis und Verständigung unverzichtbare Grundlagen, die sich zuerst einmal der Mensch erarbeiten muss. Im ersten Band dieser Buchreihe finden Hundehalter deshalb informatives und leicht verständliches Basiswissen, das für eine Verbesserung der Bindung zu unseren vierbeinigen Partnern und zur Steigerung des Vertrauensverhältnisses von entscheidender Bedeutung ist. Band 2 ergänzt dieses Wissen im Bereich Gesundheitsvor- und -fürsorge, während Band 3 sich schließlich speziell möglichen Lösungsstrategien bei bestehendem Problemverhalten widmet. Menschen und Hunde haben viele Gemeinsamkeiten - aber auch Einiges, was sie voneinander trennt. Die Unterschiede zu kennen, heißt, Licht ins Dunkel zu bringen und neue Wege zu entdecken. Denn Vieles, was von Menschen als Ungehorsam interpretiert wird, ist in Wirklichkeit nichts anderes als fehlgedeutetes artspezifisches Verhalten. Diese Missverständnisse zu identifizieren, zukünftig zu vermeiden und einen Weg zu finden, sich dem Vierbeiner gegenüber klarer auszudrücken, führt in der Folge dazu, das gegenseitige Vertrauen zu optimieren und den Spaß am Zusammenleben mit Hunden zu vervielfachen.

Overwhelmed by the strength of the Allied air and ground forces, following the D-Day landings and subsequent bitter fighting in Normandy, the Germans were compelled to abandon their efforts to hold France and much of the Low Countries and retreat to the

Rhine.??The Wehrmacht Archive helps reveal the experience of German soldiers and armed forces personnel as they withdrew through a remarkable collection of translated original orders, diaries, letters, after-action reports and other documentation. ??The book also draws upon Allied technical evaluations of weapons, vehicles and equipment, as well as transcripts of prisoner of war interrogations. The reader will learn from official documents about the Germans' efforts to cope with Allied air and artillery superiority, create new tactical methods for all arms and maintain discipline in the face of superior numbers.
