What will you learn from this book? This brain-friendly guide teaches you everything from JavaScript language fundamentals to advanced topics, including objects, functions, and the browser's document object model. You won't just be reading—you'll be playing games, solving puzzles, pondering mysteries, and interacting with JavaScript in ways you never imagined. And you'll write real code, lots of it, so you can start building your own web applications. Prepare to open your mind as you learn (and nail) key topics including: The inner details of JavaScript How JavaScript works with the browser The secrets of JavaScript types Using arrays The power of functions How to work with objects Making use of prototypes Understanding closures Writing and testing applications What's so special about this book? We think your time is too valuable to waste struggling with new concepts. Using the latest research in cognitive science and learning theory to craft a multi-sensory learning experience, Head First JavaScript Programming uses a visually rich format designed for the way your brain works, not a text-heavy approach that puts you to sleep. This book replaces Head First JavaScript, which is now out of print.

JavaScript Learn all about one of the most widely used programming languages and get this great book now! Would you be interested in learning JavaScript, the one of the most commonly used languages in programming which can help you create interactive websites? Then learning about JavaScript would be perfect for you. Without proper guidance and the right information, learning JavaScript can be quite challenging so you need to find a really helpful source - such as an ebook, to make things easier. It's a fact that JavaScript is probably the simplest, most flexible and efficient languages which can be used to broaden the functions on websites. Learning about JavaScript will not only help you understand the basics of building websites but it would also allow you to get ahead at work with your newfound computer skills. Nowadays we are becoming more and more dependent on technology so acquiring new knowledge in the field is a definite plus! Read on and learn about the many of the benefits of JavaScript as well as all other information you may need to understand from buying your own copy. Some Benefits of Learning JavaScript Include: Compared to other programming languages, JavaScript is a lot easier. It's versatile and it can have a lot of applications. You can be able to work with the code from your home or office computer. It's a well developed language which, when learned well can provide fast results. It would give you much more functionality for your websites. You will be able to customize your webpage a lot more effectively. And the list goes on! You've most likely already heard the term JavaScript but you may not know what it is exactly and how it works. The fact is, it may one of the simplest programming languages but you'd still have to go through a lot of information in order to be able to understand it. It is a very useful language to learn since it has a lot of benefits but without the right information, you won't be able to understand it and apply it well. The ease of use and the many advantages is the reason why JavaScript is chosen by the majority of programmers around the world. JavaScript, just like other programming languages can be quite complicated. This is why when you are trying to learn all about it, the lack of information might actually hinder your whole learning process. Once you've understood it fully, however, programming using JavaScript may come easy to you. This book can help in giving you all the information you would need to be able to comprehend the language and how you would use it. Here Is A Preview Of What's Included in the Book... An Introduction to JavaScript The Uses of JavaScript. Getting Started with JavaScript. JavaScript and HTML. Learning JQuery. JavaScript and CSS. And so much more! As you can see, learning all about JavaScript through this book will give you a lot of advantages. There are very few resources available out there

which are quite as complete and comprehensive as the information you would find here. So what are you waiting for? Do you want to develop a skill that will ensure you never go jobless again? Have you always wanted to learn how to program but could never afford those ridiculously expensive courses? Developers and programmers are amongst the highest paid professions in the world, and according to the US Bureau of Labor Statistics, the number of jobs for software and app developers will increase by a shocking 24% in the next few years. In 2019, the tech industry posted 4.6 million job openings in the US job market, and their direct economic output was estimated at 1.9 trillion dollars. There's no doubt that the IT industry is the future, and software, web, and app developers are and will be the most coveted professionals for many years to come. But here's the shock you may not have seen coming: the IT industry has a backdoor--you only need to know how to open it in order to jump straight on that cash wagon. The key to that door is JavaScript, a programming language that has withstood the test of time and has become one of the most used languages. You might have heard about some of the companies that use JavaScript: Netflix, Google, Microsoft, eBay, Facebook, Uber, PayPal... The list goes on and on. Being proficient in JavaScript will basically ensure that you never run out of job options. As with pursuing any new concept, learning how to program can be intimidating, especially for beginners. Even though JavaScript is incredibly beginner-friendly, it's still complex enough for you to need a guide to lead you through the process of mastering it.

Welcome to the Wonderful World of JavaScript If you have experience with web programming particularly working with HTML, then the next step is to learn JavaScript. With the use of scripts, you can give your web pages an added punch. You will also make your web pages a lot more flexible and interactive. You will also transform static HTML web pages allowing them to validate any user input. You will also learn how to adapt your code across several different web browsers. Eventually as you learn the ropes of this programming language you will also know how to integrate other related technologies such as ActiveX components, Java applets, plugins, and others. But what is JavaScript? JavaScript (we'll call it JS for short) is one of the many dynamic programming languages that you can find today. It is lightweight - which means it doesn't require a lot of resources to get it running in your computer. The scripts that you write with this programming language will become one of the most common parts of many web pages. Another thing that you should know is that it is an interpreted computer programming language. That means the code that you will write won't need to be "translated" or compiled into machine code by a compiler. In other words, it doesn't need to be converted from human readable code to machine language.

So you're ready to make the leap from writing HTML and CSS web pages to creating dynamic web applications. You want to take your web skills to the next level. And you're finally ready to add "programmer" to the resume. It sounds like you're ready to learn the Web's hottest programming language: JavaScript. Head First JavaScript is your ticket to going beyond copying and pasting the code from someone else's web site, and writing your own interactive web pages. With Head First JavaScript, you learn: The basics of programming, from variables to types to looping How the web browser runs your code, and how you can talk to the browser with your code Why you'll never have to worry about casting, overloading, or polymorphism when you're writing JavaScript code How to use the Document Object Model to change your web pages without making your users click buttons If you've ever read a Head First book, you know what to expect -- a visually rich format designed for the way your brain works. Head First JavaScript is no exception. It starts where HTML and CSS leave off, and takes you through your first program into more complex programming concepts -- like working directly with the web browser's object model and writing code that works on all modern browsers. Don't be intimidated if you've never written a line of code before! In typical Head First style, Head First JavaScript doesn't skip steps, and we're not interested in having you cut and paste code. You'll learn JavaScript, understand it, and have a blast along the way. So get ready... dynamic and exciting web pages are just pages away.
