A Source Book for Mediaeval History :
 Selected Documents illustrating the
 History of Europe in the Middle Age It will
 be observed that we have made use
 chiefly of documents, quoting from
 chronicles only when it seemed absolutely
 necessary. An exception to this general
 principle is found in section I, where a
 larger use of chronicles was rendered
 necessary by the lack of documentary
 sources for much of the period covered;
 but it is perhaps unnecessary to apologize
 for presenting selections from the

important histories of Tacitus, Gregory,
 Einhard, and Widukind. In the matter of
 form (translation, omissions,
 arrangements, notes, etc.), we were
 guided by considerations of the purpose of
 the book. The style of most of the
 documents in the original is involved,
 obscure, bombastic, and repetitious. A
 faithful rendition into English would often
 be quite unintelligible. We have
 endeavored to make a clear and readable
 translation, but always to give the correct
 meaning. If we have failed in the latter it is
 not for want of constant effort. We have
 not hesitated to omit phrases and clauses,
 often of a parenthetical nature, the
 presence of which in the translation would
 only render the passage obscure and
 obstruct the thought. As a rule we have
 given the full text of the body of the
 document, but we have generally omitted

the first and last paragraphs, the former
 containing usually titles and pious
 generalities, and the latter being
 composed of lists of witnesses, etc. We
 have given a sufficient number of the
 documents in full to illustrate these
 features of mediæval diplomatics. All but
 the most trivial omissions in the text
 (which are matters rather of form of
 translation) are indicated thus: ...
 Insertions in the text to explain the
 meaning of phrases are inclosed in
 brackets []. Quotations from the Bible are
 regularly given in the words of the
 Authorized Version, but where the Latin
 (taken from the Vulgate) differs in any
 essential manner, we have sometimes
 translated the passage literally. Within
 each section the documents are arranged
 in chronological order, except in a few
 cases where the topical arrangement

seemed necessary. We believe that the explanatory notes in the form of introductions and foot-notes will be found of service; they are by no means exhaustive, but are intended to explain the setting and importance of the document and the difficult or obscure passages it may contain. The reference to the work or the collection in which the original is found is given after the title of practically every document; the meaning of the references will be plain from the accompanying bibliography. The original of nearly all the documents is in Latin; some few are in Greek, Old French, or German, and in such cases the language of the original is indicated. It is impossible, of course, to give explicit directions as to the use of the book, other than the very obvious methods of requiring the student to read and analyze the documents assigned in connection with the lesson in the text-book, and of making clear to him the relation of the document to the event. It may be possible also for the teacher to give the student some notion of the meaning of "historical method"; e.g., the necessity of making allowance for the ignorance or the bias of the author in chronicles, or the way in which a knowledge of institutions is deduced from incidental references in documents. Suggestions of both sorts will be found in the introduction and notes. The teacher should insist on the use of such helps as are found in the book: notes, cross-references, glossary, etc. Groups of documents can be used to advantage in topical work: assigned topics worked up from authorities can be illustrated by documents selected from the book; e.g., imperial elections, papal elections, the Normans in Sicily, history of the Austrian dominions, Germans and Slavs on the eastern frontier, relations of the emperors and the popes before the investiture strife, etc.

Medieval society created many kinds of records and written material which differ considerably, giving us such sources as last wills, sermons, manorial accounts, or royal biographies. Primary sources are an exciting way for students to engage with the past and draw their own ideas about life in the medieval period. Understanding Medieval Primary Sources is a collection of essays that will introduce students to the key primary sources that are essential to studying medieval Europe. The sources are divided into two categories: the first part treats some of the many generic sources that have been preserved, such as wills, letters, royal and secular narratives and sermons. Chapter by chapter each expert author illustrates how they can be used to reveal details about medieval history. The second part focuses on areas of historical research that can only be fully discovered by using a combination of primary sources, covering fields such as maritime history, urban history, women's history and medical history. Understanding Medieval Primary Sources will be an invaluable resource for any student embarking on medieval historical research.

Winner of the United Kingdom Literacy Association's Author Award 2011 for its contribution to extending children's literacy. Praise for the book: 'This book is about making readers. It is the account of a life's work and it deserves thanks and readers. *****'. - Margaret Meek, Books for Keeps on-line, Number 185, November 2010. 'This book is a cornucopia of varied pleasures, offering something for all tastes, presented with an awareness of the complexities of the field and communicated with commitment, enthusiasm and deep knowledge'. - Eve Bearne, English 4-11, the primary school journal of The English Association, Number 42, Summer 2011. Choosing and Using

Fiction and Non-Fiction 3-11 is a guide to the many kinds of text we want children to encounter, use and enjoy during their nursery and primary school years. So children's non-fiction literature - including autobiography, biography, information and reference texts - is given equal status with fiction - nursery rhymes, picturebooks, novels, traditional tales, playscripts and poetry. The author addresses important issues and allows the voices of teachers, reviewers and children to be heard. The book supports teachers as they help children on their journey to becoming insightful and critical readers of non-fiction and sensitive and reflective readers of fiction. It also contains suggestions for practice which are in the spirit of the more flexible and creative approach to learning towards which primary schools are moving. It includes: help on using criteria to select quality texts of all kinds; annotated booklists for each kind of text for different age groups; suggestions for keeping a balance between print and screen-based texts; case studies showing teachers and children using texts in interesting and imaginative ways to support learning in English lessons and across the curriculum; advice on developing children's visual and multimodal literacy; guidance on using the school library and embedding study skills in children's wider purposes and learning; critiques of key theoretical perspectives and research projects. Although the main readership will be primary and student teachers, it is hoped that the book will be of interest and use to anyone concerned with the role of texts in children's learning.

This work offers a theoretical introduction to the portrayal of medievalism in popular film. Employing the techniques of film criticism and theory, it moves beyond the simple identification of error toward a poetics of this type of film, sensitive to both cinema history and to the role these films play in constructing what the author terms the "medieval imaginary." The opening two chapters introduce the rapidly burgeoning field of medieval film studies, viewed through the lenses of Lacanian psychoanalysis and the Deleuzian philosophy of the time-image. The first chapter explores how a vast array of films (including both auteur cinema and popular movies) contributes to the modern vision of life in the Middle Ages, while the second is concerned with how time itself functions in cinematic representations of the medieval. The remaining five chapters offer detailed considerations of specific examples of representations of

medievalism in recent films, including *First Knight*, *A Knight's Tale*, *The Messenger: The Story of Joan of Arc*, *Kingdom of Heaven*, *King Arthur*, *Night Watch*, and *The Da Vinci Code*. The book also surveys important benchmarks in the development of Deleuze's time-image, from classic examples like Bergman's *The Seventh Seal* and Kurosawa's *Kagemusha* through contemporary popular cinema, in order to trace how movie medievalism constructs images of the multivalence of time in memory and representation. Instructors considering this book for use in a course may request an examination copy here. *Choosing and Using Fiction and Non-Fiction 3-11* Yale University Press

In the first volume of an exciting new series, bestselling author Alison Weir brings the dramatic reigns of England's medieval queens to life. The lives of England's medieval queens were packed with incident—love, intrigue, betrayal, adultery, and warfare—but their stories have been largely obscured by centuries of myth and omission. Now esteemed biographer Alison Weir provides a fresh perspective and restores these women to their rightful place in history. Spanning the years from the Norman conquest in 1066 to the dawn of a new era in 1154, when Henry II succeeded to the throne and Eleanor of Aquitaine, the first Plantagenet queen, was crowned, this epic book brings to vivid life five women, including: Matilda of Flanders, wife of William the Conqueror, the first Norman king; Matilda of Scotland, revered as "the common mother of all England"; and Empress Maud, England's first female ruler, whose son King Henry II would go on to found the Plantagenet dynasty. More than those who came before or after them, these Norman consorts were recognized as equal sharers in sovereignty. Without the support of their wives, the Norman kings could not have ruled their disparate dominions as effectively. Drawing from the most reliable contemporary sources, Weir skillfully strips away centuries of romantic lore to share a balanced and authentic take on the importance of these female monarchs. What emerges is a seamless royal saga, an all-encompassing portrait of English medieval queenship, and a sweeping panorama of British history. Praise for *Queens of the Conquest* "Best-selling author [Alison] Weir pens another readable, well-researched English history, the first in a proposed four-volume series on England's medieval queens. . . . Weir's research skills and storytelling ability combine beautifully to tell a fascinating story supported by excellent historical research. Fans of her fiction and nonfiction

will enjoy this latest work."—Library Journal (starred review) "Another sound feminist resurrection by a seasoned historian . . . Though Norman queens were largely unknowable, leave it to this prolific historical biographer to bring them to life. . . . As usual, Weir is meticulous in her research."—Kirkus Reviews

Reputation and Representation in Fifteenth Century Europe David Brown

Contrary to popular opinion, the bulk of Islamic law does not come from the Quran but from hadith, first-hand reports of the Prophet Muhammad's words and deeds, passed from generation to generation. However, with varying accounts often only committed to paper a century after the death of Muhammad, Islamic scholars, past and present, have been faced with complex questions of historical authenticity. In this wide-ranging introduction, Jonathan A. C. Brown explores the collection and criticism of hadith, and the controversy surrounding

its role in modern Islam. This edition, revised and updated with additional case studies and attention to the very latest scholarship, also features a new chapter on how hadiths have been used politically, both historically and in the Arab Spring and its aftermath. Informative and accessible, it is perfectly suited to students, scholars and general readers interested in this critical element of Islam.

Readings in Medieval History, Volume II Alan Sutton Publishing

This book is a unique study of how the role of 'the messenger' has changed throughout history, starting from ancient times and ending with the person's role today. The chapters include an analysis of the personal characteristics required by a messenger, the dangers they often have to face, especially in troubled times, and how they have the power to change the course of history because of their functions. The book analyses various types of messengers who were, and are still, significant, and ends by looking at how the role will continue to develop and change, taking technological advances into account. The book, in short, is unusual, captivating and will be of interest to an informed general readership and academics of various disciplines. Of particular interest will be the analysis the book provides of the messengers we send into space in search of life, and the potential messengers who will visit our planet in the future.

How to Survive in Medieval England Routledge

This volume creates awareness among spectators about the differences between the past and the present, the importance of understanding the past-present relationship, and the reasons behind reconstructions that distort the past in films about Antiquity and the Middle Ages. Following a historical approach, *Old Stories and Contemporary Issues in Films* about

Antiquity and the Middle Ages examines the periods in which films are produced and the eras to which they refer. To show that the absence of a solid historical basis can damage the propagation of good intentions, films that contain political propaganda and stereotypes are examined alongside those that promote tolerance, the condemnation of war and violence, and women's rights. For example, analysis of films such as *Alexander Nevsky* (1938), *Spartacus* (1960), and *300* (2007) reveals a variety of agendas such as White-Supremacist video agendas during the War in Iraq, European Communism, and the promotion of anachronistic ideals in 1950s America. *Old Stories and Contemporary Issues in Films about Antiquity and the Middle Ages* is useful for undergraduates, postgraduates, and scholars interested in the Antiquity and Middle Ages, the relationship between films and History, and modern uses of the past.

This book was originally published in 1998. From Roman times until this century the business of government has been largely carried out by the writing of letters, either in the form of instructions or of authorisations to deliver information orally. These documents were addressed to the recipient and authenticated by a seal or signature, often having a greeting

and a personal conclusion. The messengers who took them also carried copies of laws and regulations, summonses to courts and whatever else was needed for the administration of the country. Without a means of speedy delivery to all concerned there could be no effective government. Separate postal services developed to meet the needs of nobles, the church, merchants, towns and the public. This book discusses three meanings of the word 'post': the letters, those who carried them, and the means of distribution. It shows that there is some continuity from Roman times and that the postal service established throughout England after the conquest of 1066 continued until 1635 when it was officially extended to the public, thus starting its amalgamation with the other services. *A History of the Post in England from the Romans to the Stuarts* Routledge "Illuminated manuscripts are perhaps the most beautiful treasures to survive from the middle ages. This authoritative volume provides a comprehensive introduction to the medieval world of books, their production and their consumption. The text divides this world into different groups of readers and writers: missionaries, emperors, monks, students, aristocrats, priests, collectors and the general public. De Hamel is both informative and immensely readable, and the sumptuous illustrations render this book too good to

be missed."--From Amazon.com

Since media is omnipresent in our lives, it is crucial to understand the complex means and dimensions of media in history, and how we have arrived at the current digital culture. *Media in History* addresses the increasing multidisciplinary need to comprehend the meanings and significances of media development through a variety of different approaches. Providing a concise, accessible and analytical synthesis of the history of communications, from the evolution of language to the growth of social media, this book also stresses the importance of understanding wider social and cultural contexts. Although technological innovations have created and shaped media, Kortti examines how politics and the economy are central to the development of communication. *Media in History* will benefit undergraduate and graduate history and media studies students who want to understand the complex structures of media as a historical continuum and to reflect on their own experiences with that development.
