Yanagi Soetsu, Bernard Leach and Hamada Shoji are the golden trio of the Mingei (folkcrafts) movement. The theory at its core and its adaptation by Leach, has long been an influential 'Oriental' aesthetic philosophy for studio craft artists in the West.

BRILL

"The Myriapoda" is the first

comprehensive monograph ever on all aspects of myriapod biology, including external and internal morphology, physiology, reproduction, development, distribution, ecology, phylogeny and taxonomy. It is thus of major interest for all zoologists and soil biologists.

Egbert Turns Red/Egbert pocrveni

Philipp Winterberg

Ibn Sina (980-1037), known as Avicenna in Latin, played a considerable role in the development of both Eastern and Western philosophy and science. His contributions to the fields of logic, natural science, psychology,

metaphysics, theology, and even medicine were vast. His work was to have a significant impact on Thomas Aquinas, among others, who explicitly and frequently drew upon the ideas of his Muslim predecessor. Avicenna also affected the thinking of the great Islamic theologian al-Ghazali, who asserted that if one could show the incoherence of Avicenna's thought, then one would have demonstrated the incoherence of philosophy in general. But Avicenna's influence is not confined to the medieval period. His logic, natural philosophy, and metaphysics are still taught in the Islamic world as living philosophy, and many contemporary Catholic and evangelical Christian philosophers continue to encounter his ideas through Aquinas's work. Using a small handful of

novel insights, Avicenna not only was able to address a host of issues that had troubled earlier philosophers in both the ancient Hellenistic and medieval Islamic worlds, but also fundamentally changed the direction of philosophy, in the Islamic East as well as in Jewish and Christian milieus. Despite Avicenna's important place in the history of ideas, there has been no single volume that both recognizes the complete range of his intellectual activity and provides a rigorous analysis of his philosophical thinking. This book fills that need. In *Avicenna* Jon McGinnis provides a general introduction to the thinker's intellectual system and offers a careful philosophical analysis of major aspects of his work in clear prose that will be accessible to students as well as to

specialists in Islamic studies, philosophy, and the history of science.

This book constitutes revised selected papers from the 13th International Conference on Data Integration in the Life Sciences, DILS 2018, held in Hannover, Germany, in November 2018. The 5 full, 8 short, 3 poster and 4 demo papers presented in this volume were carefully reviewed and selected from 22 submissions. The papers are organized in topical sections named: big

biomedical data integration and management; data exploration in the life sciences; biomedical data analytics; and big biomedical applications.

Privatization Simon and Schuster

An arresting volume to commemorate Olafur Eliasson's latest work of installation art, featuring lush illustrations and unique insights from participating writers, photographers, and artists One of the most wide-ranging and ambitious creative minds of his generation, Icelandic-Danish artist Olafur Eliasson has produced a dizzying spectrum of work around the world. Perhaps best known in the United States for his 2008 New York City Waterfalls installation, his constant inventiveness and public projects have entranced huge numbers of people. Working in a variety

of fields and media, there is no end to his creative ambition and the delight his works elicit. The title of the book and accompanying exhibition refers to the glaciers that formed the landscape around the installation's site in Denmark, their traces still evident in the site's topography and geology. The project does not end at the property boundaries, but incorporates the entire surrounding landscape. Five mirrors, ranging from a perfect circle to elongated ellipses, reflect the changing sky above and the contemplator's own gaze as though in the surfaces of glacial pools. This publication offers a unique and highly detailed insight, captured over the course of four seasons, of this singular landscape. Working with geologists, landscape architects, and other

specialists, Eliasson has created an outdoor space only a privileged few will ever see. This publication documents and enhances the work through photographs, essays, and collaborators who render the power of the project in images and words.

Japanese Modernisation and Mingei Theory Hatje Cantz Verlag

The Manifesta, which takes place every two years in a different European city, has a reputation for being a place for creativity and innovation, and for good reason. Primarily responsible for this is festival's opening program, which was tested in 2018 in Palermo and is now being continued in Marseille in 2020. Winy Maas's architectural office, MVRDV, and The Why Factory (t?f) were commissioned to explore the city's urban

space through the means of artistic research and the latest method of data analysis. This resulted in a compendium of social, cultural, ethical, religious, and geographical structures. It was, however, meant to do more than just describe the status quo. The exploration also began a process that goes far beyond the Manifesta itself, to enrich Marseille's future as a city. This publication allows itself to become an audience and hence, part of the project. MVRDV was founded in 1991 and has its headquarters in Rotterdam. It is currently one of the most successful Dutch architectural offices. Besides Winy Maas, Jacob van Rijs and Nathalie de Vries are among its co-founders. Its trademark is the experimental, innovative form in architectural design. Maas also heads up

the THE WHY FACTORY (T?F), a research institute that explores the development of cities and designs urban models for the future. Maas also heads up the THE WHY FACTORY (T?F), a research institute that explores the development of cities and designs urban models for the future. MVRDV was founded in 1991 and has its headquarters in Rotterdam. It is currently one of the most successful Dutch architectural offices. Besides Winy Maas, Jacob van Rijs and Nathalie de Vries are among its co-founders. Its trademark is the experimental, innovative form in architectural design. Route 1: Maine Hatje Cantz Verlag From the 'old world' to the 'new' and back again, this transnational history of the performance and reception of Bizet's Carmen – whose subject has become a

modern myth and its heroine a symbol – provides new understanding of the opera's enduring yet ever-evolving and resituated presence and popularity. This book examines three stages of cultural transfer: the opera's establishment in the repertoire; its performance, translation, adaptation and appropriation in Europe, the Americas and Australia; its cultural 'work' in Soviet Russia, in Japan in the era of Westernisation, in southern, regionalist France and in Carmen's 'homeland', Spain. As the volume reveals the ways in which Bizet's opera swiftly travelled the globe from its Parisian premiere, readers will understand how the story, the music, the staging and the singers appealed to audiences in diverse geographical, artistic and political contexts.

Citizen Science Down East Books

The first and so far only Plant Geography of Chile was written about 100 years ago, since when many things have changed: plants have been renamed and reclassified; taxonomy and systematics have experienced deep changes as have biology, geography, and biogeography. The time is therefore ripe for a new look at Chile's plants and their distribution. Focusing on three key issues – botany/systematics, geography and biogeographical analysis – this book presents a thoroughly updated synthesis both of Chilean plant geography and of the different approaches to studying it. Because of its range – from the neotropics to the temperate sub-Antarctic – Chile's flora provides a critical insight into evolutionary patterns,

particularly in relation to the distribution along the latitudinal profiles and the global geographical relationships of the country's genera. The consequences of these relations for the evolution of the Chilean Flora are discussed. This book will provide a valuable resource for both graduate students and researchers in botany, plant taxonomy and systematics, biogeography, evolutionary biology and plant conservation.

Mongolia National Geographic Books
Zweisprachiges Bilderbuch Deutsch-Albanisch Was passiert, wenn die Welt unerwartet einen Augenblick still steht? Wenn man eine Handvoll Zeit, einfach so, durch einen Zufall geschenkt bekommt? Genau das passiert in einer der größten und umtriebigen Städte der Welt, als eine kleine Schnecke die

Straße überquert und den Verkehr für einen halben Tag zum Erliegen bringt. Ein Buch über Dinge, die man schon immer mal tun wollte, aber nie dazu kam. Rezensionen "bezaubernd" -- Kirkus Reviews "verträumte Geschichte ums Innehalten [...] macht auch Erwachsenen noch Spaß" -- Börsenblatt, Fachzeitschrift für den deutschen Buchhandel "Nimm man das Bilderbuch 'Fünf Meter Zeit' [...] in die Hand, so ist die Wahrscheinlichkeit besonderer Wahrnehmung und Aufmerksamkeitsanregung groß. [...] Spielerische Konzentration, interpretierende Wahrnehmung und kindlich-logisches Philosophieren werden die Quintessenz der Beschäftigung mit diesem mehrsprachigen Bilderbuch in vielen Sprachen sein." -- Chancen

frühkindlicher Literalität, Fachbuch Pädagogik "Die Geschichte einer kleinen Schnecke, die viel bewirkt" -- Münstersche Zeitung "Wir sehen die Kinderbücher als echte Bereicherung für den Deutsch-Unterricht in der Primarstufe, für den DAZ- Bereich und darüber hinaus als Vorleseempfehlung für alle Eltern und KindergartenpädagogInnen" -- Österreichisches Schulportal "Ein Vorschlag zur Weltverbesserung" -- Westfälische Nachrichten "nicht nur interessant durch seine Geschichte oder seine Botschaft, sondern auch durch die Art, wie diese vermittelt wird. Die Farben und die Hintergründe sind reich an Textur, im Gegensatz zur Mehrzahl der Kinderbücher." -- ForeWord Clarion Reviews "eine kreative Gute-Nacht-

Geschichte, die auch für gestresste Erwachsene geeignet ist. [...] Im Trubel der Großstadt genießen die Tiere den Augenblick und werden sich bewusst, wie schön das Leben ohne Stress und Hektik sein kann." -- Designer in Action *Bat Migrations in Europe* Routledge Through both longer essays and shorter case studies, this book examines the relationship of European women from various countries and backgrounds to collecting, in order to explore the social practices and material and visual cultures of collecting in eighteenth-century Europe. It recovers their lives and examines their interests, their methodologies, and their collections and objects--some of which have rarely been studied before. The book also considers women's role as producers, that is,

creators of objects that were collected. Detailed examination of the artefacts-- both visually, and in relation to their historical contexts--exposes new ways of thinking about collecting in relation to the arts and sciences in eighteenth-century Europe. The book is interdisciplinary in its makeup and brings together scholars from a wide range of fields. It will be of interest to those working in art history, material and visual culture, history of collecting, history of science, literary studies, women's studies, gender studies, and art conservation.

Carmen Abroad Claitor's Pub Division Suitable for all admirers of the piano, this work brings together more than 3,000 works for piano and orchestra. It comes with a supplement containing

over 200 new entries.

Treatise on Zoology - Anatomy, Taxonomy, Biology. The Myriapoda CRC Press

Poetry. Asian & Asian American Studies. Film. SHEEP MACHINE is a textual inscape, a poetically painted nonfictional pasture where mechanical violence and visceral fear coalesce into a kind of science prosody, a post-human panorama whose beauty lies in the ruins of reality it depicts. Influenced by Leslie Thornton's film of sheep feeding in a field as a conveyor belt of cable cars ascend and return from a mountain in the Swiss Alps, Vi Khi Nao takes perception into tumultuous terrains, into a pastoral-celestial void in which temporality is transcended, progress is a bourgeois invention, and god is a liability

for our life spent in hunger and grazing.
Vi Khi Nao's SHEEP MACHINE is grace
said at the ontological last supper.

Self-transformation is an essential
element in all forms of Buddhist
meditation--from Tantra to Zen. Ayya
Khema, author of the best-selling Being
Nobody, Going Nowhere, uses one of the
earliest Buddhist suttas to guide us
along the path of the oldest Buddhist
meditative practice for understanding

the nature of "self." By following the
Buddha's explanation with clear,
insightful examples from her years of
teaching meditation, she guides us back
and forth between the relative
understanding and higher realizations of
the Buddhist concept of "self." Her
thoughtful contemplation of the
Buddha's radical understanding of "self"
and her practical advice for achieving
insight offer the reader a profound
understanding of the "self." Both
beginning and advanced practitioners
will greatly benefit from Ayya Khema's
warm and down-to-earth exposition of
the Buddha's meditation on "self."

Oxygen uptake for metabolic energy
demand and the elimination of the

resulting carbon dioxide is one of the essential processes in all higher life forms; in the case of animals, everything from protozoans to insects and vertebrates including humans. ❖
Respiratory Biology of Animals provides a contemporary and truly integrative approach to the topic, adopting a strong evolutionary theme. It covers aerobic metabolism at all levels, from gas exchange organs such as skin, gills, and lungs to mitochondria - the site of cellular respiration. The book also describes the functional morphology and physiology of the circulatory system, which often contains gas-carrying pigments and is important for pH regulation in the organism. A final section describes the evolution of animal respiratory systems. Throughout the

book, examples are selected from the entire breadth of the animal kingdom, identifying common themes that transcend taxonomy. Respiratory Biology of Animals is an accessible supplementary text suitable for both senior undergraduate and graduate students taking courses in respiratory biology, comparative animal physiology, and environmental physiology. It is also of relevance and use to the many professional academics requiring a concise but authoritative overview of the topic.

Day on Wheels Lars Muller Publishers

How do peasants come to think of themselves as members of a nation? The widely accepted argument is that national sentiment originates among intellectuals or urban middle classes,

then "trickles down" to the working class and peasants. Keely Stauter-Halsted argues that such models overlook the independent contribution of peasant societies. She explores the complex case of the Polish peasants of Austrian Galicia, from the 1848 emancipation of the serfs to the eve of the First World War. In the years immediately after emancipation, Polish-speaking peasants were more apt to identify with the Austrian Emperor and the Catholic Church than with their Polish lords or the middle classes of the Galician capital, Cracow. Yet by the end of the century, Polish-speaking peasants would cheer, "Long live Poland" and celebrate the centennial of the peasant-fueled insurrection in defense of Polish independence. The explanation for this

shift, Stauter-Halsted says, is the symbiosis that developed between peasant elites and upper-class reformers. She reconstructs this difficult, halting process, paying particular attention to public life and conflicts within the rural communities themselves. The author's approach is at once comparative and interdisciplinary, drawing from literature on national identity formation in Latin America, China, and Western Europe. *The Nation in the Village* combines anthropology, sociology, and literary criticism with economic, social, cultural, and political history.

As museums worldwide shuttered in

2020 because of the coronavirus, New York-based cultural strategist Andrés Szántó conducted a series of interviews with an international group of museum leaders. In a moment when economic, political, and cultural shifts are signaling the start of a new era, the directors speak candidly about the historical limitations and untapped potential of art museums. Each of the twenty-eight conversations in this book explores a particular topic of relevance to art institutions today and tomorrow. What emerges from the series of in-depth conversations is a composite portrait of a generation of museum leaders working to make institutions more open, democratic, inclusive, experimental and experiential, technologically savvy, culturally polyphonic, attuned to the

needs of their visitors and communities, and concerned with addressing the defining issues of the societies around them. The dialogues offer glimpses of how museums around the globe are undergoing an accelerated phase of reappraisal and reinvention.

Fodor's Travel

First renowned as a supplier of theatrical textiles to Broadway and beyond, Maharam pioneered the concept of engineered textiles for interior applications in the sixties, and is the world's leading provider of textiles to commercial architects and interior designers. Maharam takes a holistic view of design, embracing a range of disciplines including architecture and interiors, furniture, fashion, accessories, graphic and digital media. The Maharam Design Studio oversees the cultivation of an extensive textile collection, ranging from re-editions of enduring designs by the twentieth century's most noted visionaries to textile-based

collaborations with industry outsiders including Konstantin Grcic, Hella Jongerius, Maira Kalman, Bruce Mau, Jasper Morrison, Nike and Paul Smith, among others. The publication provides a comprehensive overview of the company's history, cultural markers and design projects. Abstracted product applications are featured through "Useless Objects," a collaboration with Jasper Morrison. AUTHOR: Michael Maharam is the principal of Maharam, the nation's leading supplier of textiles to commercial architects and interior designers. ILLUSTRATIONS 200 illustrations *
