L'Aventure sous-marine. The Undersea Adventure. Translated by Alan Ross. With plates, including portraits Crown
 Come join the fun as students take a submarine bus on a field trip to explore the ocean deep, in this wordless picture book from the creator of *Field Trip to the Moon!* Students dressed in deep sea helmets travel to the ocean deep in a yellow school-bus submarine. When they get there, they frolic with fish, chase luminescent squid, and discover an old shipwreck. But when it's time to return to the submarine bus, one student lingers to take a photo of a treasure chest and falls into a deep ravine. Luckily, the child

makes an unexpected friend-- a maybe-not-so-extinct sea creature called a Pleiosaur- that's happy to entertain the young explorer until the teacher returns. In his follow-up to *Field Trip to the Moon*, John Hare's rich, atmospheric art in this wordless picture book invites all children to imagine themselves in the story- a tale full of mysteries, surprises, and adorable aquatic friends. Named a LITA Golden Duck Picture Book A Junior Library Guild Selection
Bulletin of the New York Public Library Arcadia Publishing
 The French-English volume of this highly acclaimed set consists of some 100,000 keywords in both French and English, drawn from the whole range of modern applied science and technical terminology. Covers over 70 subject areas, from engineering and chemistry to packaging,

transportation, data processing and much more.

Operation Storm Crown

Culled from many never-before-published narratives and oral histories conducted under the auspices of the U.S. Naval Institute, *Submarine Stories* presents nearly five dozen first-person accounts from men who were involved with gasoline—and diesel-powered submarines during the twentieth and twenty-first centuries. The story of these boats, their technological evolution and tactical value, is also the story of the men who went to sea in them. The accounts illustrate the human aspects of serving in diesel boats: the training, operations in peacetime and war, liberty exploits, humorous sidelights, and special feelings of bonding and camaraderie that grew among shipmates. Included here are some familiar names.

Slade Cutter, who earned four Navy Crosses as a skipper in World War II, describes the process that made him a capable submariner. Dennis Wilkinson, first skipper of the nuclear-powered Nautilus in the 1950s, tells of being in the first missile-firing submarine in the 1940s. Robert McNitt recalls his experiences as executive officer to Medal of Honor skipper Gene Fluckey. Among the other submariners who present their personal memories are Jerry Beckley, contemplating the possibility of firing nuclear missiles during the 1962 Cuban crisis; Hosey Mays, describing what it was like to be a black man in a boat with a nearly all-white crew; Paul Foster, discussing the sinking a German U-boat in World War I; and Wayne Miller, explaining the enormous satisfaction he felt when he earned his silver dolphins.

The legendary U-boat ace Otto Kretschmer was branded 'the wolf of the Atlantic', and for good reason. In his dramatic wartime career he sank ship after ship, sowing terror among Allied convoys and dismay in those charged with their protection. Kretschmer was a daring officer who favoured bringing his U-boat into the heart of the convoy and destroying it from within. He earned himself a tremendous reputation before his capture in March 1941, and *The Golden Horseshoe* makes it clear why. Terence Robertson's biography of the U-boat ace draws upon first-hand experience of conditions and the deadly game as the hunter sought to outfox the hunted. He paints a masterly portrait of life at sea and weaves in the fascinating story of Kretschmer and the exploits of his U-Boats. Kretschmer was eventually captured and interviewed by Captain McIntyre of HMS Walker, an episode which is also recounted in this book. Otto Kretschmer became a prisoner of war in March 1941 and spent most of the rest of the war in Bowmanville camp, Canada, before his release in 1947.

Traces the history of U.S. Navy

submarines, explains their strategic mission, and describes life aboard a modern submarine

Collier's Photographic History of the European War. Including Sketches and Drawings Made on the Battle Field Savas Beatie

She looked like just about like the other diesel powered, Balao-class submarines crafted in the '40s. But there the similarity ends. Because the Archerfish--named for a fish that kills its victims with a lethal blast of water from below--won a unique, heroic place in military history and the memories of her crew members. Here is her story: from her assembly in New England, her dedication at the hand of Eleanor Roosevelt, her service in World War II, where she broke the back of the Japanese Navy and sank the largest ship ever sunk by a submarine, to the details of her critical role in the Cold War, crisscrossing the oceans for six years to foil Soviet naval intelligence. Here too, is the story of her officers and enlisted men, who waited years to serve on the Archerfish. In their own words, these men tell how, against all odds, they sent a Japanese aircraft carrier to the ocean floor . . . served in peacetime in the Navy's only all bachelor crew . . . steered their ship into exotic ports all over the world . . . welcomed B-girls, Japanese war veterans, royalty, Playboy bunnies and a goat aboard ship, with equal hospitality. As they helped their sub outlast fires and even an earthquake, they worked hard, played hard and lived even harder. An extraordinary real-life odyssey, *Archerfish* is a vivid, unforgettable portrait of submariners' life. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Electric Boat Corporation has been a world leader in submarine development, design, and construction for more than a century. In 1900, the company delivered the *Holland*, the first submarine accepted by the United States Navy. Fifty-five years later, it turned fantasy into fact by sending the world's first nuclear-powered ship, the submarine *Nautilus*, off on its maiden voyage. It later built the world's first ballistic missile-firing submarine, the *George Washington*, and most of the nation's current underseas fleet. Between those years, it pioneered standardized construction of merchant ships, submarine chasers, torpedo boats, and yachts and also produced airplanes, fishing trawlers, diesel engines, and electric motors. This collection of more than 200 archival photographs traces the company's sometimes roller-coaster existence

through 10 historic decades when America—and Electric Boat Corporation—grew into an industrial giant. It is an engaging collective portrait of American ingenuity, know-how, and persistence driving technology to new heights.

Submarines BEYOND BOOKS HUB

The riveting true story of Japan's top secret plan to change the course of World War II using a squadron of mammoth submarines a generation ahead of their time In 1941, the architects of Japan's sneak attack on Pearl Harbor planned a bold follow-up: a potentially devastating air raid—this time against New York City and Washington, DC. The classified Japanese program required developing a squadron of top secret submarines—the *Sen-toku* or I-400 class—designed as underwater aircraft carriers, each equipped with three Aichi M6A1 attack bombers painted to look like U.S. aircraft. The bombers, called *Seiran* (which translates as “storm from a clear sky”), were tucked in a huge, water-tight hanger on the sub's deck. The subs' mission was to travel more than halfway around the world, surface on the U.S. coast, and launch their deadly air attack. This entire operation was unknown to U.S. intelligence. And the amazing thing is how close the Japanese came to pulling it off. John Geoghegan's meticulous research, including first-person accounts from the I-401 crew and the U.S. capturing party, creates a fascinating portrait of the *Sen-toku's* desperate push into Allied waters and the U.S. Navy's dramatic pursuit, masterfully illuminating a previously forgotten story of the Pacific war.

Annual List of New and Important Books Added to the Public Library of the City of Boston Simon and Schuster

Un livre spectaculaire consacré à la faune sous-marine. Philippe Decressac a consacré de nombreuses années à la réalisation de cet ouvrage, plongeant dans tous les massifs coralliens du monde pour saisir au plus près, quelque 200 espèces. Une beauté saisissante mais aussi un témoignage unique sur un monde en danger, fragilisé par le réchauffement climatique. Un voyage sous-marin inoubliable, d'environ 500 photos.

Les secrets de la photo sous-marine Editions Eyrolles

Grey Wolves Naval Institute Press

At the beginning of World War II, the devastating impact of German submarines on both the Royal Navy and merchant shipping saw Britain on the brink of starvation and defeat. The enemy was formidable. U-boat crews saw themselves as an elite and they preferred to scuttle their vessels at the end of the war rather than surrender. They suffered the heaviest losses of any branch of the German services: out of 40,900 men, 28,000 were killed and 5,000 taken prisoner; by 1945, the average age was 19 and the survival rate was only three missions. This is the story of how the Allies redressed the balance of power, focusing in particular on the role of the wolfpacks of U-boats in the Atlantic, whose stealthy presence beneath the waves ensured that British ships dived with death every time they put to sea.

Story of My Life Thames & Hudson

British Marine Painting by A. L. Baldry is a splendid voyage through the history of Britain's nautical artistry. Delve into a visually stunning exploration of the sea, as portrayed by some of the country's most celebrated artists. Within the pages of British Marine Painting, readers will discover an array of captivating images, each piece exuding the raw power, serenity, and eternal allure of the sea. Through Baldry's insightful commentary, learn about the artists behind these masterpieces and the historical context that inspired their work. But British Marine Painting is more than just an art anthology. It's a love letter to the sea, to the men and women who have faced its perils, and to the artists who have sought to capture its multifaceted beauty. Baldry's nuanced understanding of the subject matter breathes life into each page, making this book a must-have for art lovers and marine enthusiasts alike. If you're looking for a journey that combines the majesty of the sea with the brush

strokes of Britain's finest, British Marine Painting by A. L. Baldry is a voyage worth embarking on. Secure your copy today and dive into the sublime world of marine artistry.

Portraits sous-marins IRD Editions

"Maîtriser la technique, sortir des sentiers battus et apprendre à regarder pour réussir de grands clichés." Grâce au numérique, la photo sous-marine se démocratise ; sur les bateaux, la plupart des plongeurs sont aujourd'hui équipés d'appareils photo. Mais être à l'aise avec le maniement d'un boîtier ne suffit pas à rapporter des images de qualité ; les photos sont souvent mal exposées, floues, voilées, bleues, mal composées. La création d'une belle photo sous-marine nécessite plus que jamais un savoir-faire et des connaissances spécifiques. Cet ouvrage très complet a été conçu pour s'adresser à la fois aux photographes sous-marins débutants et aux experts. Tout en faisant la part belle à la créativité et à la dimension artistique des images, il dresse un panorama détaillé des techniques de prise de vue et de composition à maîtriser, de même qu'il conseille les matériels les mieux adaptés à chaque thématique, selon le profil et l'expérience des photographes. Attention : ce livre numérique est un EPUB fixed-layout. Pour des conditions de lecture optimales, veillez à ce que votre tablette supporte ce type de format.

Annual List of New and Important Books Added to the Public Library of the City of Boston Les secrets de la photo sous-marine

The story of the German submarine U-505 and its dramatic capture by the US Navy during WWII—told by one of its crewmen. Hans Goebeler is known as the man who “pulled the plug” on U-505 in 1944 to keep his beloved U-boat out of Allied hands. Steel Boat, Iron Hearts is his no-holds-barred account of service aboard a combat U-boat. It is the only full-length memoir of its kind, and Goebeler was aboard for every one of U-505's war patrols. Using his own experiences, log books, and correspondence with other U-boat crewmen, Goebeler offers rich and very personal details about what life was like in the German Navy under Hitler. Because his first and last posting was to U-505, Goebeler's perspective of the crew, commanders, and war patrols paints a vivid and complete portrait unlike any other to come out of the Kriegsmarine. He witnessed it all: from deadly sabotage efforts that almost sunk the boat to the tragic suicide of the only U-boat commander who took his life during WWII; from the terror and exhilaration of hunting

the enemy to the seedy brothels of France. The vivid, honest, and smooth-flowing prose calls it like it was and pulls no punches. U-505 was captured by Captain Dan Gallery's Guadalcanal Task Group 22.3 on June 4, 1944. Trapped by this “Hunter-Killer” group, U-505 was depth-charged to the surface, strafed by machine gun fire, and boarded. It was the first enemy ship captured at sea since the War of 1812. Today, hundreds of thousands of visitors tour U-505 each year at the Chicago Museum of Science and Industry. Includes photos and a special Introduction by Keith Gill, Curator of U-505, Museum of Science and Industry *Collier's Photographic History of the European War* Skyhorse Publishing, Inc. Chronicles one of the greatest sea tragedies of our time.

Canadian Art Arcturus Publishing

See the secret and dangerous world of submarine life and warfare like never before. From the ingenious but impractical designs of seventeenth-century inventors through the nuclear-powered submarines of today, this heavily illustrated volume traces the history of the silent force and the elite corps of men who fought and often died beneath the waves. Though fully describing the development of the submarine, this book's main focus is on the men who served from World War I through the Cold War. Drawing upon journals, memoirs, and interviews with submariners of the past and present, Philip Kaplan paints a vivid portrait of their lives and experiences. He describes the terrors of waiting for depth charges to explode and the triumph of a torpedo striking its target, as well as the fascinating world of day-to-day life on the sleek, modern boats. With nearly 250 photographs and dozens of interviews—and comprising part of an eight-book series exploring the history of tanks, bombers, and fighter planes—this oversized keepsake volume will appeal to anyone who has served in submarines or been fascinated by this unique service within a service. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history—books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.
