Someone is killing the most alluring women of Boston. Someone whose keen eye for beauty masks a twisted mind. Someone who insinuates himself into his victims' lives and leaves them with nothing but an elegant black stocking knotted around their necks. Homicide detective Lieutenant Steve Markarian must stop the killer before another woman is sacrificed. The stakes increase when he realizes his own wife has caught the killer's eye. In this stunning psychological thriller, bestselling author Gary Braver explores the nature of beauty, and the forbidding yearnings that kill in its name.

Skin Deep Willowdale, Ont. : Firefly Books A beautifully packaged full-color collection of literary tattoos and short personal essays, *The Word Made Flesh* is an intimate but anonymous confessional book, in the vein of thought-provoking anthologies like *PostSecret* and *Not Quite What I Was Planning*. Gorgeous photographs and candid commentary are collected by authors Eva Talmadge—whose short story “The Cranes” was cited as Notable Nonrequired Reading of 2008 in Dave Eggers’ Best American Nonrequired Reading 2009—and Justin Taylor, author of *Everything Here Is the Best Thing Ever*, and editor of the acclaimed short fiction anthology, *The Apocalypse Reader*.

*Skin Deep* looks at the preoccupations of European-Australians in their encounters with Aboriginal women and the tropes, types, and perceptions that seeped into everyday settler-colonial thinking. Early erroneous and uninformed accounts of Aboriginal women and culture were repeated throughout various print forms and imagery, both in Australia and in Europe, with names, dates, and locations erased so that individual women came to be anonymized as 'gins' and 'lubras.' The book identifies and traces the various tropes used to typecast Aboriginal women, contributing to their lasting hold on the colonial imagination even after conflicting records emerged. The colonial archive itself, consisting largely of accounts by white men, is critiqued in the book. Construction of Aboriginal women's gender

and sexuality was a form of colonial control, and *Skin Deep* shows how the industrialization of print was critical to this control, emerging as it did alongside colonial expansion. For nearly all settlers, typecasting Aboriginal women through name-calling and repetition of tropes sufficed to evoke an understanding that was surface-based and half-knowing: only skin deep. \*\*\* "Impressively researched, written, organized and presented...highly recommended for community and academic library Aboriginal Studies, Women's Studies, Australian Studies, and Colonial History reference collections." -- Midwest Book Review, MBR Bookwatch: October 2016, Helen's Bookshelf [Subject: Cultural History, Aboriginal Studies, Women's Studies, Australian Studies, Colonial Studies]

A collection of over 40 columns from the New York Times beauty writer reveals the secret rituals of famous people, from ballet dancers to musicians and models, who describe their skin care regimens, their opinions on cosmetics and more.

Skincare Decoded HarperCollins UK

Do you really need a ten-step skincare regimen? Is that \$100 eye cream worth it? And what the heck are "actives" anyway? In this book two professional chemists and beauty industry insiders tell all. Depending on who you listen to, the secret to beautiful skin is microbiomes. Or Korean rice water. Or maybe a dermaplaning tool. It feels like you need a degree in chemistry to even understand what these products are, and if they live up to the hype. Luckily, Victoria Fu and Gloria Lu, professional skincare chemists have done that work so you don't have to. The science may seem complicated, but this book will show you how simple it can be, giving you what you need to make informed decisions about your skin (and your wallet). Skincare Actives? Technically, cat sneezes could count. SPF? Yep, super important. Caffeine serums? The science is still out. CBD additives? Not enough studies yet, so the jury's still out. The authors are the creators behind the popular Chemist Confessions Instagram, and this book brings the sass, humor, and solid information they're known for. Additional chapters address the best ingredients for every skin type, and reveal the only four products you really need.

Traces the evolution of the black female body in the American imagination  
Stop Calling Me Beautiful Harper Collins  
Racial differences are rooted in biological reality, right? That's certainly what a small group of anthropologists, psychologists

and pundits would have you believe. Portraying themselves as brave defenders of the inconvenient truth, this group took the revival of 'race science' from alt-right online message boards into mainstream academic journals. They seek to justify raging social inequalities from poverty to incarceration rates with a simple message: some people are just born to be poor. There's just one problem... race science isn't real. The first Europeans had dark skin and black curly hair. Culture was born in Africa, not Western Europe. Gavin Evans examines the latest research on how intelligence develops and laying out new discoveries in genetics, palaeontology, archaeology and anthropology to unearth the truth about our shared past. *Skin Deep* stands up to the pseudo-science deployed to justify colonial rule, the apartheid regime and the vast inequalities that persist today. As race dominates the political agenda, it's time to put the hateful myths about it to bed.

**The Word Made Flesh** Harry N. Abrams

Named a Best Book of 2020 by NPR and Vanity Fair One of Smithsonian's Ten Best Science Books of 2020 "A searching and vital explication of germ theory, social norms, and what the modern era is really doing to our bodies and our psyches." —Vanity Fair A preventative medicine physician and staff writer for The Atlantic explains the surprising and unintended effects of our hygiene practices in this informative and entertaining introduction to the new science of skin microbes and probiotics. Keeping skin healthy is a booming industry, and yet it seems like almost no one agrees on what actually works. Confusing messages from health authorities and ineffective treatments have left many people desperate for reliable solutions. An enormous alternative industry is filling the void, selling products that are often of questionable safety and totally unknown effectiveness. In *Clean*, doctor and journalist James Hamblin explores how we got here, examining the science and culture of how we care for our skin today. He talks to dermatologists, microbiologists, allergists, immunologists, aestheticians, bar-soap enthusiasts, venture capitalists, Amish people, theologians, and straight-up scam artists, trying to figure out what it really means to be clean. He even experiments with giving up showers entirely, and discovers that he is not alone. Along the way, he realizes that most of our standards of cleanliness are less related to health than most people think. A major part of the picture has been missing: a little-known ecosystem known as the skin microbiome—the trillions of microbes that live on our skin and in our pores. These microbes are not dangerous; they're more like an outer layer of skin that no one knew we had, and they influence everything from acne, eczema, and dry skin, to how we smell. The new goal of skin care will be to cultivate a healthy biome—and to embrace the meaning of "clean" in the natural sense. This can mean doing much less, saving time, money, energy, water, and plastic bottles in the process. Lucid, accessible, and deeply researched, *Clean* explores the ongoing, radical change in the way we think about our skin, introducing readers to the emerging science that will be at the forefront of health and wellness conversations in coming years.

For decades now tattoos have been potent symbols of the Los Angeles gang-life scene. The black and white tattoos with recognizable gang symbols appear on members' faces, necks and all over their bodies, making their gang affiliation immediately clear to whomever crosses their path. This can mean the difference between life and death on the streets, and just as often, in prison. What does this prominently placed imagery mean for those men and women who somehow extricate themselves from gang life or are released from prison or want to separate themselves from the gang and start life anew? The very tattoos which may have helped guard against the constant threat of rival gangs now bar many ex-gang members from employment, life without harassment, and the freedom to move on from a past they have worked hard to overcome. *Skin Deep* is a photography project that seeks to show the effects of this ongoing gang conflict in Los Angeles. Photographer Steven Burton set out to photograph realistic portraits of former gang members who are trying to escape the revolving door of death and prison. For these men and women, the aftermath of gang life is not only carried within—it is also scrawled across their faces and bodies. *Skin Deep* uniquely highlights the impact tattoos have on the way a person is perceived by showing what each participant might look like without them. Utilizing before and, thanks to the advantages of Photoshop, after photographs, these men and women got a chance to see what they'd look like without the inked visual armor. After the bare images were presented to each, they were asked to talk about themselves and their families, what tattoos represent to them, and their aspirations for the future. Seeing themselves without tattoos—many for the first time in decades—naturally brought about a wide range of emotions, recollections, hopes, and dreams, with

responses such as: "I am shocked. I don't know what to say about this. I am going to give this to my mom, she is going to be so happy." "I think this guy in the pictures would judge the one with tattoos right off the top." "That's crazy, that looks real crazy. Those came out cool man! I think I like it better without the tattoos." Burton met his subjects thanks to Father Greg Boyle, the founder of Homeboy Industries in LA, and the entire project is inspired by his tireless work to help rehabilitate these former gang members and give them all a crucial second chance in life. *Skin Deep* offers a chance to expose the realities these individuals face when trying to rebuild their lives and re-enter society. As importantly, for the public, the project provokes consideration regarding how society perceives and judges people with tattoos and violent pasts and seeks to garner empathy for those caught in the crosshairs of gang life as they try to change their futures.

**The Skin Type Solution** HarperCollins  
Why do Latinos with light skin complexions earn more than those with darker complexions? Why do African American women with darker complexions take longer to get married than their lighter counterparts? Why did Michael Jackson become lighter as he became wealthier and O.J. Simpson became darker when he was accused of murder? Why is Halle Berry considered a beautiful sex symbol, while Whoopi Goldberg is not? *Skin Deep* provides answers to these intriguing questions. It shows that although most white Americans maintain that they do not judge others on the basis of skin color, skin tone remains a determining factor in educational attainment, occupational status, income, and other quality of life indicators. Shattering the myth of the color-blind society, *Skin Deep* is a

revealing examination of the ways skin tone inequality operates in America. The essays in this collection-by some of the nation's leading thinkers on race and colorism-examine these phenomena, asking whether skin tone differentiation is imposed upon communities of color from the outside or is an internally-driven process aided and abetted by community members themselves. The essays also question whether the stratification process is the same for African Americans, Hispanics, and Asian Americans. *Skin Deep* addresses such issues as the relationship between skin tone and self esteem, marital patterns, interracial relationships, socioeconomic attainment, and family racial identity and composition. The essays in this accessible book also grapple with emerging issues such as biracialism, color-blind racism, and 21st century notions of race in the U.S. and in other countries.
