One of the finest alchemical emblem books and unique in its own right. Michael Maier's work is richly illustrated with original prints by M. Merian; each of the 50 emblems presented consists of a motto, print, epigram, and a three-part musical setting of the epigram, followed by an exposition of its meaning.

'the Steppe and other Stories', a collection is among the first of Chekhov's works to be published in a serious literary journal. The majority of tales in this collection focus on the issues faced by privileged class. The narration shows that the author never left his roots, being the son of an unsuccessful provincial grocer greatly influenced his writings. Interesting!

Social Work Review Hassell Street Press

Orchestrating learning that is bodybrain-compatible must be the foundation for what goes on in the classroom. Hart brilliantly explains the biology of learning related to classroom practice and allows the reader to "see" what is necessary for real reform efforts to succeed. The reader comes to appreciate how the brain makes meaning through pattern recognition, prepares to act through mental programs, and responds to emotion.

Transylvania and the Rumanians Pinnacle Press

This book is a comprehensive climatic monograph, which addresses one of the most complex mountain environments in Europe, the Carpathians Chain, focusing on the branches that lie over Romania. The volume aggregates high quality input data, state-of-the-art techniques, regional analysis and overview perspectives, while addressing the spatial and temporal patterns of the main climatic elements. The study covers the period 1961-2010, for the present climate, while the perspective is extended up to 2050. The main climatic elements (e.g. air temperature, precipitation, wind) are analyzed, but some specific variables like snow depth and snow cover are also examined, both in terms of average behaviour and extreme characteristics. This is the first

synthesis addressing the climate of this mountain region, and it provides useful information for scientists, mountain stakeholders, decision-makers and general public.

The leading experts on parent-child communication show parents and teachers how to motivate kids to learn and succeed in school. Using the unique communication strategies, down-to-earth dialogues, and delightful cartoons that are the hallmark of their multimillion-copy bestseller *How to Talk So Kids Will Listen and Listen So Kids Will Talk*, Adele Faber and Elaine Mazlish show parents and teachers how to help children handle the everyday problems that interfere with learning. This breakthrough book demonstrates how parents and teachers can join forces to inspire kids to be self-directed, self-disciplined, and responsive to the wonders of learning.

And, in the shadow of the major civilization, before it disappeared in its turn, how many other cultures have perished without a trace? This immense tragedy is being lived now by many cultures, with great intensity. One has to belong to such a culture in course of extinction or dying slowly even before its flourishing, to understand the infinite distress of those who are helplessly watching the inexorable disappearance of their most precious values. With each dying culture, it is a unique flower that is withering never to bloom again, an incomparable fragrance that fades away forever. There is in the smallest idioms, there is in the "Weltanschauung" of the smallest tribe doomed to extinction treasures of wisdom and poetry. Lost...lost for all eternity. In the life of peoples, as in the whole Creation, the most striking thing that actually shocks the mind is the infinite waste of Nature. Those who at present are fortunate enough to belong to the universal cultures, may still live with the illusion of their perpetuity. But for how long? Indeed what is left of Ancient Egypt, of Mesopotamia, of Crete, of Mexico and of Peru? And how can we be sure that our conceited race that for centuries extends its domination over peoples and things will not also fall one day in torpor and become apathetic? Neagu Djuvara

Political and environmental disasters come crashing down in this earthquake sci-fi thriller co-written by the authors of *2001: A Space Odyssey* and *Memories*. When he was seven years old, Lewis Crane survived the Los Angeles earthquake of 1994—but his parents did not. Haunted by the tragedy, Crane has dedicated his life to protecting humanity from similar disasters. Now he is a Nobel Prize-winning earthquake scientist who perfected equipment sensitive enough to predict an earthquake strike down to the minute. And he wants to go further. Crane has formed an organization to explore the idea of stopping earthquakes entirely by fusing the Earth's tectonic plates together. But what effect will this have on the earth? And as political unrest causes tremors of another kind, can Crane's audacious plan stop another major earthquake due to hit the United States? Co-written by Hugo and Nebula Award-winning author Arthur C. Clarke and Philip K. Dick Award-winning author Mike McQuay, the "two formidable SF talents converge splendidly in this disaster thriller, which offers sleek action-adventure writing, world-class tumult and a coherent near-future based on sound yet innovative social and scientific speculation" (Publishers Weekly). *The Story of My Life ...* Ayer Publishing

Beloved classic about the effervescent, nature-loving Swiss miss who ultimately transforms the lives of many people — among them Clara, a handicapped young lady, and Heidi's embittered, reclusive grandfather.

"A critical overview of scientific orthodoxy in an attempt to answer the fundamental questions "what are we?" and "why are we here?" (Kirkus Reviews). Specialist scientific fields are developing at incredibly swift speeds, but what can they really tell us about how the universe began and how we as humans evolved to play such a dominant role on Earth? John Hands's extraordinarily ambitious book merges scientific knowledge from multiple disciplines and evaluates without bias or preconception all the theories and evidence about the origin and evolution of matter, consciousness, and mankind. The result, a "pearl of dialectical reasoning" (Publishers Weekly, starred review), provides the most comprehensive account yet of current ideas such as cosmic inflation, dark energy, the selfish gene, and neurogenetic determinism. In the clearest possible prose, it differentiates the firmly established from the speculative and examines the claims of various fields to approach a unified theory of everything. In doing so it challenges the orthodox

consensus in those branches of cosmology, biology, and neuroscience that have ossified into dogma. Its "shocking and invigorating" analysis (Daily Telegraph, A Best Science Book of 2015) reveals underlying patterns of cooperation, complexification, and convergence that lead to the unique emergence in humans of a self-reflective consciousness that enables us to determine our future evolution. This groundbreaking book is destined to become a classic of scientific thinking. Praise for *Cosmosapiens* "This is a truly exceptional piece of work." —Tim Crane, Knightsbridge Professor of Philosophy, The University of Cambridge "A game-changer. In the tradition of Thomas Kuhn's *The Structure of Scientific Revolutions*, this lucidly written, penetrating analysis challenges us to rethink many things we take for granted about ourselves, our society, and our universe. It will become a classic." —Peter Dreier, E P Clapp Distinguished Professor of Politics, Occidental College "Hands is an astute observer of recent trends in scientific ideas bold enough to point out what he sees as sense and nonsense and intelligently explain why. Even in cases where one might disagree, the arguments are thought-provoking." —Paul Steinhardt, Albert Einstein Professor in Science, Princeton University

This book, by the editor of the journal *Incognita*, takes the reader on a fantastic journey through a wide range of cultures and traditions to examine the phenomenon of ecstatic visionary experiences—from Sumerian Gilgamesh and the Taoist Immortals to the imaginative fiction of Jorge Luis Borges. The author provides a comprehensive tour of otherworldly journeys common from immemorial times among shamans, magicians and witches, and illustrates their connection with such modern phenomena as altered states of consciousness, out-of-body experiences, and near-death experiences.—From publisher description.

Monitorul oficial al României Simon & Schuster

Pushed around by ticket takers who demand his ticket in several languages, a middle aged man goes through a nightmare of hiding and getting away until he manages to cross a frontier guarded by soldiers and dogs. He's made it back to his native village. There he finds his whole family gathered around a big table, as if for a wedding, a baptism or a wake, but no one recognizes him, not even his mother.
