Il futuro del lavoro

Social protection is now considered a development milestone and an important tool in

combating poverty. Interventions can include, for example, health insurance, public works programs, guaranteed employment schemes, or cash transfers targeting vulnerable populations groups. This innovative volume is designed to develop understanding about the role and

contribution of social protection globally and to share innovative practice and policies from around the world. It explores how to cover an entire population effectively, especially those who are at risk or who are already in a situation of deprivation, and in a sustainable manner.

Divided into two parts, the book begins by exploring the theoretical underpinnings of social protection, discussing the social work and social development perspectives and concepts that currently shape it. The second part is comprised of case studies from countries implementing successful social protection initiatives, including Brazil, India, South Africa, Ghana, Nigeria and Indonesia, and reveals how the impact of a successful social protection

intervention on poverty, vulnerability and inequality can be dramatic. This volume is an important reference for advanced students and researchers from a range of disciplines including social policy, social work, development studies, geography, planning, economics, sociology, population health and political science. This handbook provides an in-depth analysis of the impact of the Covid-19

pandemic on older people across different countries, focusing on important issues affecting ageing societies. It presents an analytical framework of various emerging concerns affecting societies, transforming of social relationships, bringing in of new health problems, including mental health, elder abuse, impact on intergenerational relationships and emotional and psychological matters. It explores the choices of governments to address

the arising issues, indicates different community responses and discusses the experiences of older people in handling of problems cropping up, which affect their quality of life in various ways. The book offers readers new dimensions of the issues nations face with possible similar solutions and ways to handle the concerns. The book is valuable for researchers, practitioners, and students pursuing anthropology, sociology, psychology, and gerontology. The book

offers many disciplinary international and national perspectives to understand the relationship between the pandemic and older people.

Labour History in the Semi-periphery Maggioli Editore

Socio-economic inequalities in health are present to a greater or lesser extent in all European countries and the available data suggests that the health gap is increasing. Many studies have been conducted to explain

inequalities in health and from them much has been learnt about the different contributory factors. However, in practice it seems hard to translate the knowledge of causes into effective interventions and policies. Reducing Inequalities in Health: a European Perspective: * brings together an unrivalled collection of contemporary data on successful policies and interventions * compares differences in approach in several European countries * includes

recent evaluation studies
 * discusses conceptual issues for research * provides examples of good and bad practice in Europe * draws out the policy and research implications for the future
 With contributions from leading researchers in 14 different European countries, this book provides a comprehensive source of reference for the reader interested in what really works in the field of health promotion and what sort of policies reduce the health gap.

 This study presents and compares the drug

policies in use in the United States, Sweden, and Italy to limit the use and abuse of substances such as marijuana, hashish, cocaine, heroin, and amphetamines. It also focuses on attempts to suppress the traffic in these drugs. A primary objective of Segre's work is theoretical: to evaluate and explain, by means of a comparative method applied to the study of individual cases, the respective level of success of these policies, measured according to conventional criteria. The

aim of this comparison between Swedish drug policies (a positive case) and U.S. and Italian policies (negative cases) is to evaluate the effect of these policies on drug use. Segre comes to the general conclusion that there is a causal relationship between drug use and drug control. This is deduced from the association between Swedish policies and the limited diffusion of narcotics in Sweden on the one hand; and from the association between U.S. and Italian policies

and the wide diffusion of these substances in the United States and in Italy, on the other hand. This study does not aim to give a complete explanation of the high or low use of narcotics. But what Segre does say is that the level of drug consumption could be a consequence of other causes, which are considered here not as independent variables but, on the contrary, as intervening variables. The literature in this field needs to dwell particularly on social and

psychological causes. Examples are the influence of parents and peers, attitudes toward the use of drugs or abstention from them, the positive or negative images that persons have of themselves, and the possibility or, rather, the difficulty of establishing significant forms of interpersonal communication. This is a modest, serious contribution to the vexing issue of the causes of drug use in advanced societies.

The Routledge Handbook of Social Care Work Around the World provides both a comprehensive and authoritative state-of-the-art review of the current research in this subject. It is the first handbook to cover social care work research from around the world, including both low- and middle-income countries as well as high income countries. Each of the 22 chapters are written by experts on

long-term care services, particularly for older people and cover key issues and debates, based on research evidence, on social care work in a specific country. They look at perspectives of social care work from the macro level: the structural conditions for long-term care, including demographic challenges and the long-term care policy, the meso level: the level of provider organizations and intermediaries, and the micro level: views of care workers, care users, and

unpaid informal carers. Furthermore, they discuss a number of topics central to discussions of care work including marketization, personalization policies, policy implementation under austerity, the provision of social care work whether through public services, or private arrangements, or mixed types, funding, the feminization of social care and the new role that technology, and robots can play in care work. By drawing together leading scholars from around the

world, this book provides an up to the minute snapshot of current scholarship as well as signposting several fruitful avenues for future research. This book is both an invaluable resource for scholars and an indispensable teaching tool for use in the classroom and will be of interest to students, academics, social workers, social policy-makers and human service professionals. *La pratica del welfare locale* McGill-Queen's Press - MQUP

Three experienced Italian sociologists explore the structural and cultural dimensions of poverty in their country. Comparing Italy's regime with other European countries, they consider the interplay of conditions in the labour market, the family and welfare arrangements as causes of poverty. This in-depth analysis explores how forced familism, unbalanced gender arrangements, territorial cleavages and sluggish growth have rendered Italy vulnerable to financial crisis. As old

risks of poverty have worsened, new risks have emerged and children, the working poor and migrants have become the 'new poor'. Combining theoretical and empirical tools, this is a topical fresh take on the understanding of poverty in Italy that is even more crucial considering the impact of the COVID-19 pandemic.

European Employment Policies: Key Concepts, Domestic Implementation, Current Challenges Peter Lang
Social Security in the United States and in Europe is at a critical juncture. Through the essays assembled in

Social Security Pension Reform in Europe, Martin Feldstein and Horst Siebert, along with a number of distinguished contributors, discuss the challenges facing Social Security reform in the aging societies of Europe. A remarkable range of European nations—Germany, France, Finland, the Netherlands, Poland, Romania, Italy, Sweden, the United Kingdom, and Hungary—have implemented or are about to implement mixed Social Security systems

that combine a traditional defined benefit of the pay-as-you-go system with an individual retirement account defined contribution of a capital-funded system. The essays here highlight the problems that the European pension reform process faces and how it differs from that of the United States. This timely volume will significantly enrich the debate on pension reform worldwide. *Social Development and Social Work Perspectives on Social Protection* FrancoAngeli

L'innovazione del welfare

della Lombardia. La «rivoluzione» del sociale lombardo e la sua valutazione Walter de Gruyter GmbH & Co KG Some 60 million people died during the Second World War; millions more were displaced in Europe, Africa, and Asia. The war resulted in the creation of new states, the acceleration of imperial decline, and a shift in the distribution of global power. Despite its unprecedented impact, a comprehensive account of the complex international experiences of this war

remains elusive. The Peoples' War? offers fresh approaches to the challenge of writing a new history of the Second World War. Exploring aspects of the war that have been marginalized in military and political studies, the volume foregrounds less familiar narratives, subjects, and places. Chapters recover the wartime experiences of individuals – including women, children, members of minority ethnic groups, and colonial subjects – whose stories do not fit easily

into conventional national war narratives. The contributors show how terms used to delineate the conflict such as home front and battle front, occupier and occupied, captor and prisoner, and friend and foe became increasingly blurred as the war wore on. Above all, the volume encourages reflection on whether this conflict really was a “Peoples' War.” Challenging the homogenizing narratives of the war as a nationally unifying experience, The Peoples' War? seeks to

enrich our understanding of the Second World War as a global event. European Employment Policies IOS Press
This book addresses the practice of social innovation, which is currently very much in the public eye. New ideas and approaches are needed to tackle the severe and wicked problems with which contemporary societies are struggling. Especially in times of economic crisis, social innovation is regarded as one of the crucial elements needed to move

forward. Our knowledge of its dynamics has significantly progressed, thanks to an abundance of studies on social innovation both general and sector-specific. However, despite the valuable research conducted over the past years, the systematic analysis of social innovation is still contested and incomplete. The questions asked in the book will be the following: 1. What is the nature of social innovations? 2. What patterns can be identified

in social innovations emerging at the local level? 3. How is the emergence and spread of social innovations related to urban governance? More precisely, which conditions and arrangements facilitate and hinders social innovation? We explore these questions using different types of data and methods, and studying different contexts. In particular, we focus on innovations that aim at solving problems of the young unemployed, single parents and

migrants. This analysis is based on original research carried out in the period 2010-2013 in the framework of a European project with a specific empirical research strategy. Research was carried out in 20 cities in 10 different European countries.

 Originally published in 1991, this book opens with a theoretical and historical section and analyses the affairs of both the communist party and the trade unions of specific European countries. The first part of the book deals with cases of communist strength, where the communist part had close links with a

particular trade union (France, Italy, Spain). The second part looks at cases where social democracy dominated the Left (Belgium, The Netherlands and the UK). Two further essays examine developments in the 1980s in Hungary and Poland.

Ce la faremo? Ce la farà il welfare italiano? Il tema

della riforma del welfare è senza dubbio uno dei più studiati e dibattuti in Italia e tanti volumi si sono concentrati essenzialmente sulla dimensione statale delle politiche sociali. Invece meno attenzione è stata rivolta al welfare locale. Certo, è vero che molto dipende dalle misure nazionali di politica, ma è anche vero che proprio il suo essere in prima linea nelle sfide di una società complessa (individualizzata, instabile, eterogenea) fa sì che il welfare locale

diventi il punto di torsione su cui si proveranno non solo i servizi assistenziali, ma le vere e proprie fondamenta del sistema nazionale di cittadinanza e di inserimento sociale egualitario. E infatti il comparto dei Comuni, nonostante sia quello che ha maggiormente contribuito al risanamento dei conti pubblici, a seguito dei tagli impartiti dalle manovre finanziarie che si sono succedute in questi ultimi anni, è stato di fatto chiamato a “contrarre” la sua risposta sociale in un momento in

cui la sofferenza sociale si sta acutizzando. Ce la farà il welfare locale? Struttura del volume1. L'evoluzione della domanda di welfare in Italia: strumenti per una lettura del presente 2. La morfologia del sistema locale di welfare: gli interventi e i servizi sociali dei comuni3. Le conseguenze della crisi4. Le prospettive del welfare locale5. Le prospettive delle politiche sociali nazionali6. Conclusioni. Uno sguardo al futuro **Controlling Illegal Drugs** Maggioli Editore Since its emergence at

the end of the seventeenth century, industrial capitalism as a specific form of social organisation has set recurrent challenges to its own persistence, and until today, it has proved to be successful to develop new ways of accumulation based on its capacity of adaptation. Is this process of transition now accelerating or reaching an end point? This book is a critical exploration of capitalism in transition, bringing together cutting

edge, world renowned scholars who reflect from different disciplinary points of view. This collection engages with the primarily Western themes of welfare capitalism and social fragmentation. Structured over three parts, the book analyses; the transformations of welfare societies and capitalism with a focus on South European welfare states and their (in)capacity to tackle poverty; the

transformation of work and migration with a special attention to informality and the question of social rights; and the transformation of cities.
