 In its third edition, this massive reference work lists the final resting places of more than 14,000 people from a wide range of fields, including politics, the military, the arts, crime, sports and popular culture. Many entries are new to this edition. Each listing provides birth and death dates, a brief summary of the subject's claim to fame and their burial site location or as much as is known. Grave location within a cemetery is provided in many cases, as well as places of cremation and sites where ashes were scattered. Source information is provided.

 This ground-breaking book examines the multifaceted dynamics between copyright law and music borrowing within a rich diversity of music genres from across the world. It evaluates how copyright laws under different generic conventions may influence, or are influenced by, time-honoured creative borrowing practices. Leading experts from around the world scrutinise a carefully selected range of musical genres, including pop, hip-hop, jazz, blues, electronic and dance music, as well as a diversity of region-specific genres, such as Jamaican music, River Plate Tango, Irish folk music, Hungarian folk music, Flamenco, Indian traditional music, Australian indigenous music, Maori music and many others. This genre-conscious analysis builds on a theoretical section in which musicologists and lawyers offer their insights into fundamental issues concerning music genre categorisation, the typology of music borrowing and copyright law's ontological struggle with musical borrowing in theory and practice. The chapters are threaded together by a central theme, ie, that the cumulative nature of music creativity is the result of collective bargaining processes among many 'musicking' parties that have socially constructed creative music authorship under a rich mix of generic conventions.

 Surface texturing has been recognized as a method for enhancing the tribological properties of surfaces for many years. Adding a controlled texture to one of two faces in relative motion can have many positive effects, such as reduction of friction and wear and increase in load capacity. To date, the true potential of texturing has not been realized due to the severe lack of detailed information about the mechanistic functional details of texturing in a tribological situation. Inspiration and Design for Bio-Inspired Surfaces in Tribology: Emerging Research and Opportunities is a pivotal reference source that focuses on surface engineering techniques to mimic biological materials. Highlighting a broad range of topics including bio-mimetics, contact analysis, and thermodynamics, this book is ideally designed for engineers, environmentalists, academicians, researchers, and students.

Together with Leah Crawford, Angela Jenkins and Julie Sargent, Bob Cox has compiled this rich resource, complete with vivid illustrations by Victoria Cox, to help teachers enhance their learners' engagement with challenging texts and develop their writing skills as budding wordsmiths. Working

in association with the Opening Doors network of schools, the authors address the vital concept of pitching high but including all pupils and how this approach can be delivered in practice. Opening Doors to Ambitious Primary English explains and models top quality ways of thinking, planning and teaching. The resources, case studies and authors' innovative ideas on theory will help you to make primary English vibrant, creative and challenging in your school. It also provides frameworks and principles for any school wishing to be more ambitious in developing pupils' speaking, listening, reading, writing and thinking with a greater sense of curiosity and more originality. Opening Doors to Ambitious Primary English contains chapter by chapter explanations of how English in primary schools can be developed in ambitious ways. Supported by research references, examples of pupils' work and illuminating case studies, the book provides teachers with a toolkit of strategies which schools can adapt and apply to their own contexts. The book is supported by the Opening Doors series of books which contain units of work based around selected texts. The authors hope this book will act as a starting block from which to develop an Opening Doors approach to English, and has suggested key concepts around which the curriculum can be built, with the units providing examples to work from. Suitable for teachers and curriculum leads in primary settings.

With the unrelenting spread of globalization, the English language has been firmly established as the Lingua Franca. Now more than ever, the importance of learning English is paramount within nearly all professional and educational sectors. English for Specific Purposes (ESP) has long been accepted as an effective method for teaching English as a foreign language. In recent years, it has experienced an increasing presence in secondary and tertiary education across the globe. This is predominantly due to its learner-centered approach that focuses on developing linguistic competence in the student's specific discipline, may that be academics, business or tourism, for example. Positioning English for Specific Purposes in an English Language Teaching Context attempts to present and define the relevance and scope of ESP within English Language teaching. From mobile phones as educational tools to the language needs of medical students, the contributors to this volume examine and propose different epistemological and methodological aspects of ESP teaching. Its unique approach to ESP marks this volume out as an important and necessary contribution to existing ESP literature, and one that will be of use to both researchers and practitioners of ESP.
