 What if the perfect world wasn't built for you? Welcome to QualityLand, the best country on Earth. Here, a universal ranking system determines the social advantages and career opportunities of every member of society. An automated matchmaking service knows the best partners for everyone and helps with the break up when your ideal match (frequently) changes. And the foolproof algorithms of the biggest, most successful company in the world, TheShop, know what you want before you do and conveniently deliver to your doorstep before you even order it. In QualityCity, Peter Jobless is a machine scrapper who can't quite bring himself to destroy the imperfect machines sent his way, and has become the unwitting leader of a band of robotic misfits hidden in his home and workplace. One day, Peter receives a product from TheShop that he absolutely, positively knows he does not want, and which he decides, at great personal cost, to return. The only problem: doing so means proving the perfect algorithm of TheShop wrong, calling into question the very foundations of QualityLand itself. Qualityland, Marc-Uwe Kling's first book to be translated into English, is a brilliantly clever, illuminating satire in the tradition of Kurt Vonnegut, Douglas Adams, and George Orwell that offers a visionary, frightening, and all-too funny glimpse at a near future we may be hurtling toward faster than it's at all comfortable to admit. So why delay any longer? TheShop already knows you're going to love this book. You may as well head to the cash register, crack the covers, and see why that is for yourself.
Botanisk Tidsskrift Grand Central Publishing
 This volume explores the lexical influence of English on European languages, a topical theme with linguistic and cultural implications. It provides an extensive introductory background to a cross-national view of English-induced lexical borrowing, posing crucial analytical questions such as what counts as an Anglicism. It also offers a typology of borrowings with examples from the languages represented: Armenian, Danish, French, German, Italian, Norwegian, Polish, Serbian, Spanish, and Swedish. The articles in this volume address general and language-specific issues related to the analysis and collection of Anglicisms, extending the scope to the largely unexplored area of phraseology and bringing new insights into corpus-based and corpus-driven methodologies. This volume fits into a well-established and constantly developing research field and will appeal to scholars interested in the spread of English as an international language, contact and contrastive linguistics,

lexicology and lexicography, and computer corpus lexicography. *Cooperation and resistance* Createspace Independent Publishing Platform

 When leadership teams do not perform at their best, everyone suffers. Low employee engagement levels, failure to meet strategic targets and inconsistent company growth are signs that leadership teams are not highly effective. Executive Ownershift is a transformative growth program that enables leadership teams to deliver peak performance: When leadership teams perform at their best, so can everyone else. This book introduces a top-down team approach that enables leadership teams to dramatically improve their performance. It highlights how leadership teams can transform their own businesses and how they can master what must go right and what can go wrong on their path to high performance. With examples and cases provide evidence that results come fast to leadership teams that recognize that they are the starting point for improvement and growth, the book is an excellent guide that allows struggling leadership teams to become good, and good leadership teams to become great.

Kurzgrammatik Dänisch Hueber Verlag

Der Band Philosophieren im Ostseeraum enthält Beiträge der Internationalen Forschungsseminare des Nord und osteuropäischen Forums für Philosophie an der Universität Greifswald ebenso wie Artikel von Philosophen aus dem Ostseeraum, die im Rahmen eines DFG-Forschungsprojektes zum Philosophieren im Ostseeraum in den Jahren 2000 bis 2002 entstanden sind. Er gibt einen repräsentativen Überblick über die gemeinsamen und differierenden Standards des Philosophierens rund um die Ostsee in Geschichte und Gegenwart und insbesondere deren Veränderungen in der "Nachwende"-Zeit. Die inhaltliche Spannweite der Beiträge reicht von methodologischen Fragestellungen einer empirischen Philosophieforschung bis hin

zur systematischen Erörterung postmoderner Philosopheme. Neben Darstellungen zur Philosophie in Schweden, Finnland und Estland aus der Perspektive der Ideen und Wissenschaftsgeschichte widmen sich die Beiträge des Bandes der kritischen Reflexion gegenwertiger Umorientierungen und Transformationen der Philosophie in Russland, in Lettland, Litauen, Polen und in Danemark. In Nordeuropa kann man in den letzten beiden Jahrzehnten eine verstärkte Auseinandersetzung mit der "kontinentalen" Philosophie beobachten. In Russland und im Baltikum hatten Phänomenologie und Hermeneutik - nicht zuletzt als Gegengewicht zum verordneten Marxismus - bereits traditionell grosseren Einfluss.

Companies struggle dramatically in building new businesses from innovation. 85-90 percent of corporate startups die after the "Minimum Viable Product" stage. Why is this so? What is the solution? How can companies improve? This book provides the answers. It is written by Frank Mattes, who has decades of experience in corporate innovation. It has been co-written with more than 20 practitioners and 2 business schools as a practical guide for practitioners - corporate innovation, Digital Innovation, heads of incubators and accelerators, leaders of corporate startups and senior managers. Clients and early readers say the content is "timely, relevant, powerful and ready for use", "a must-read," and the solution "dramatically increases return on investment in digital innovation." The corporate business-building

problem. Companies are doing okay in incremental improvements. But they fail in innovation. They are good at copying past success stories but bad at creating new ones. If companies do not solve this problem, they will burn money. They also fail to achieve revenue growth from innovation, fail in corporate transformation, fail to future-proof their business and fail in winning and retaining top talent The solution and the book. The book provides a solution. It is the first one on this subject and guides corporate practitioners on how to build new businesses. The book covers the entire journey - from a "meaningful idea" to a sizable business - and it includes leadership and cultural/collaboration aspects needed for success. The book is the result of a multi-year co-creation process with more than 20 industry-leading companies and 2 business schools. It distills Best Practices and insights into one framework. This framework is the Lean Scaleup(TM). It describes the three capabilities that companies must develop to solve their business-building problem: methodology (the "how-to"), dual leadership and culture/collaboration. When the right innovation teams use the Lean Scaleup with the right mindset in a supportive environment, the company can solve its business-building problem. Advance praise (selection) Frank Mattes brings his extensive experience in corporate innovation to this pragmatic guide to dramatically increasing return on investment in digital innovation. Jeroen Tas, Chief Innovation & Strategy Officer, Royal Philips The Lean

Scaleup is an approach built through practice in the field. It supports companies facing transformational challenges. David Gilmour, co-founder bp Launchpad Taking innovation concepts to scale is the real challenge. This book provides a practical framework and methodology for going beyond the MVP into scale. Ofer HaCohen, Head Innovation Center Israel, AT&T Frank has addressed business-building in many organizations successfully. Finally, his approach is "codified" in this book. I can't recommend it enough to every innovation team keen to deliver results. Hans Balmaekers, CEO, innov8rs The Lean Scaleup gives companies a powerful tool to identify, develop and scale breakthrough innovations. A must-read for all managers from corporate innovation or strategic innovation. Prof. Dr. Georg Oenbrink, CEO, CREAGO Solutions (formerly Evonik industries) The book provides an excellent framework to address the Scaling-Up challenge. It is based on the real-life learning journey of +20 corporates. A must-read for corporate entrepreneurs and their leaders! Carina Snijder VP, Research Program Management, Royal Philips
