The Great Book of World War II Airplanes Swan Hill Press
 Military Aircraft features 52 of the most important military aircraft of the last hundred years. The book includes all the main types, from biplane fighters and carrier aircraft to tactical bombers, transport aircraft, multirole fighters, strategic strike aircraft, and stealth bombers. Featured aircraft include: the Fokker Dr.1 triplane, the legendary fighter flown by German flying ace Manfred von Richthofen, the "Red Baron," during World War I; the Mitsubishi A6M Zero, Japan's highly maneuverable fighter that dominated air-to-air combat in the early part of the Pacific War; the tank-busting Il-2 Shturmovik, the most produced aircraft in World War II; the Harrier jump jet, a vertical take-off and landing (VTOL) fighter that has been in service for more than 40 years; the B-2 Spirit bomber, an American precision strike aircraft used

in recent conflicts in Kosovo, Iraq and Afghanistan; and the F-22 Raptor, an air superiority fighter with state-of-the-art stealth technology that makes it almost invisible to radars. Each entry includes a brief description of the model's development and history, a profile view, key features, and specifications. Packed with more than 200 artworks and photographs, *Military Aircraft* is a colorful guide for the military aviation enthusiast.

Flying the Big Jets Citadel Press

Selecting the right aircraft for an airline operation is a vastly complex process, involving a multitude of skills and considerable knowledge of the business. *Buying The Big Jets* was first published in 2001 to provide guidance to those involved in aircraft selection strategies. This Second Edition brings the picture fully up to date, incorporating new discussion on the strategies of low-cost carriers, and the significance of the aircraft cabin for long-haul operations. Latest developments in aircraft products are covered and there are fresh examples of best practice in airline fleet planning techniques.

In the Cockpit Harper Collins

The Smithsonian National Air and Space Museum holds the country's premier collection of historic aircrafts, but visitors must view these impressive structures at a distance. *IN THE COCKPIT*

captures the feeling of helming these historic craft with big, gorgeous four-color photographs that will give flight enthusiasts a true pilot's eye view of many of history's most important domestic and military airplanes, jets, and helicopters. Each entry includes archival images of the craft and authoritative text that places each one in the context of the development of aviation technology and world history .

Buying the Big Jets: Fleet Planning for Airlines National Geographic Books

Chapter by chapter the reader is taken gently from the basics of the big jets to the sophistication of the 'glass cockpit' in preparation for the pilot's seat on a Boeing 777 flight from London to Boston. Examine the weather forecast with the pilots, monitor the take-off from the flight deck, listen to the radio reports along the way, view the mid-Atlantic weather from above the clouds, witness the preparations for descent and experience the excitement of landing in Boston. Flying the Big Jets is a comprehensive book that reveals as never before the every-day working environment of the modern long-haul airline pilot.

QF32 is the award winning bestseller from Richard de Crespigny, author of the forthcoming *Fly!: Life Lessons from the Cockpit of QF32* On 4 November 2010, a flight from Singapore to Sydney came within a knife edge of being one of the world's worst air disasters. Shortly after leaving Changi Airport, an explosion shattered Engine 2 of Qantas flight QF32 - an Airbus A380, the largest and most advanced passenger plane ever built. Hundreds of pieces of shrapnel ripped through the wing and fuselage, creating chaos as vital flight systems and back-ups were destroyed or degraded. In other hands, the plane might have been lost with all 469 people on board, but a supremely experienced flight crew, led by Captain Richard de Crespigny, managed to land the crippled aircraft and safely disembark the passengers after hours of nerve-racking effort. Tracing Richard's life and career up until that fateful flight, QF32 shows exactly what goes into the making of a top-level airline pilot, and the extraordinary skills and training needed to keep us safe in the air. Fascinating in its detail and vividly compelling in its narrative, QF32 is the riveting, blow-by-blow story of just what happens when things go badly wrong in the air, told by the captain himself. Winner of ABIA Awards for Best General Non-fiction Book of the Year 2013 and Indie Awards' Best Non-fiction 2012 Shortlisted ABIA Awards' Book of the Year 2013

From the bestselling author of *Rich and Pretty* comes a suspenseful and provocative novel keenly attuned to the complexities of parenthood, race, and class. *Leave the World Behind* explores how our closest bonds are reshaped—and unexpected new ones are forged—in moments of crisis. Amanda and Clay head out to a remote corner of Long Island expecting a vacation: a quiet reprieve from life in New York City, quality time with their teenage son and daughter, and a taste of the good life in the luxurious home they've rented for the week. But a late-night knock on the door breaks the spell. Ruth and G. H. are an older couple—it's their house, and they've arrived in a panic. They bring the news that a sudden blackout has swept the city. But in this rural area—with the TV and internet now down, and no cell phone service—it's hard to know what to believe. Should Amanda and Clay trust this couple—and vice versa? What happened back in New York? Is the vacation home, isolated from civilization, a truly safe place for their families? And are they safe from one other?

Handling the Big Jets Routledge

Flying the Big Jets presents the facts that people want to know about the world of the big jets. How does a large aircraft fly? How long is the take-off run at maximum weight? How much fuel is carried on a transatlantic flight? How do the radios work? What aircraft maintenance is required? How often are the tyres changed? What is the life style of a pilot? The answers to these and a thousand other questions are given in sufficient detail to satisfy the most inquisitive of readers. Chapter by chapter the reader is taken gently from the basics of the big jets to the sophistication of the 'glass cockpit' in preparation for the pilot's seat on a Boeing 777 flight from London to Boston. *Flying the Big Jets* is a comprehensive book that reveals as never before the every-day working environment of the modern long-haul airline pilot. "Written by a pilot with over 15,000 flying hours on heavy jets during a 30-year career in commercial aviation, this title is a comprehensive text book taking the reader into the 'glass cockpit' of a Boeing 777. It is also a guide to the principles of flight, the art of navigation and meteorology, and an appreciation of the role played by Air Traffic Control in modern airline operations. An absorbing read for that next long-haul flight."

As the airline industry struggles to extricate itself from its latest crisis, the time has come to examine the fundamentals of airline business strategy in a more innovative way and find answers to the questions, "What went wrong?" and "Why didn't we see it coming?". *Stormy Skies* captures the key issues that determine a viable airline industry in an increasingly globalised world and calls for more radical business thinking to ensure that mistakes are avoided in future. It looks at the airline business through the eyes of both the airlines themselves and also their customers, drawing upon the experience and views of industry personalities.

Empire of the Clouds Anchor

In 1945 Britain was the world's leading designer and builder of aircraft - a world-class achievement that was not mere rhetoric. And what aircraft they were. The sleek Comet, the first jet airliner. The awesome delta-winged Vulcan, an intercontinental bomber that could be thrown about the sky like a fighter. The Hawker Hunter, the most beautiful fighter-jet ever built and the

Lightning, which could zoom ten miles above the clouds in a couple of minutes and whose pilots rated flying it as better than sex. How did Britain so lose the plot that today there is not a single aircraft manufacturer of any significance in the country? What became of the great industry of de Havilland or Handley Page? And what was it like to be alive in that marvellous post-war moment when innovative new British aircraft made their debut, and pilots were the rock stars of the age? James Hamilton-Paterson captures that season of glory in a compelling book that fuses his own memories of being a schoolboy plane spotter with a ruefully realistic history of British decline - its loss of self confidence and power. It is the story of great and charismatic machines and the men who flew them: heroes such as Bill Waterton, Neville Duke, John Derry and Bill Beaumont who took inconceivable risks, so that we could fly without a second thought.

Selecting the right aircraft for an airline operation is a vastly complex process, involving a multitude of skills and considerable knowledge of the business. *Buying the Big Jets* has been published since 2001 to provide expert guidance to all those involved in aircraft selection strategies. This third edition brings the picture fully up to date, representing the latest developments in aircraft products and best practice in airline fleet planning techniques. It features a new section that addresses the passenger experience and, for the first time, includes regional jet manufacturers who are now extending their product families into the 100-plus seating category. Overall, the third edition looks at a broader selection of analytical approaches than previously and considers how fleet planning for cost-leader airlines differs from that of network carriers. *Buying the Big Jets* is an industry-specific example of strategic planning and is therefore a vital text for students engaged in graduate or post-graduate studies either in aeronautics or business administration. The book is essential reading for airline planners with fleet planning responsibility, consultancy groups, analysts studying aircraft performance and

economics, airline operational personnel, students of air transport, leasing companies, aircraft value appraisers, and all who manage commercial aircraft acquisition programmes and provide strategic advice to decision-makers. It is also a valuable tool for the banking community where insights into aircraft acquisition decisions are vital.

Flying The Big Jets (4th Edition) Amber Books

The New York Times bestseller from the author of *The Bullpen Gospels*. "A humorous, candid and insightful memoir . . . Grade: Home Run."—Cleveland Plain Dealer After six years in the minors, pitcher Dirk Hayhurst hopes 2008 is the year he breaks into the big leagues. But every time Dirk looks up, the bases are loaded with challenges—a wedding balancing on a blind hope, a family in chaos, and paychecks that beg Dirk to ask, "How long can I afford to keep doing this?" Then it finally happens—Dirk gets called up to the Majors, to play for the San Diego Padres. A dream comes true when he takes the mound against the San Francisco Giants, kicking off forty insane days and nights in the Bigs. Like the classic games of baseball's history, *Out of My League* entertains from the first pitch to the last out, capturing the gritty realities of playing on the big stage, the comedy and camaraderie in the dugouts and locker rooms, and the hard-fought, personal journeys that drive our love of America's favorite pastime. "A rare gem of a baseball book."—Tom Verducci, *Sports Illustrated* "Observant, insightful, human, and hilarious."—Bob Costas "A fun read . . . This book shows why baseball is so often used as a metaphor for life."—Keith Olbermann "Entertaining and engaging . . . reminiscent of Jim Bouton's *Ball Four*."—Booklist "The book is a terrific read. If you loved *Bullpen Gospels* (I'd have a hard time believing you are a baseball fan if you didn't) you will love *Out of My League* too."—Bluebird Banter

Aircraft Zenith Press

Area 51's most important military aviation developments are profiled in an illustrated format. When most of us think of Area 51, we think of aliens, UFOs, and controversial government cover-ups. It's easy to forget that, since the mid-1950s, the United States' famed extension of Edwards Air Force Base has served as a top-secret CIA testing ground for many of the most groundbreaking advancements in American military aviation technology. In *Area 51 - Black Jets*, author and military historian Bill Yenne offers the first fully illustrated chronology of Area 51's most famous aircraft projects, including Lockheed's U-2 "Dragon Lady" and SR-71 "Blackbird" reconnaissance planes, drones ranging from the early Lockheed D-21 to the modern-day General

Atomics MQ-1 Predator, and the famous F-117 Nighthawk stealth fighter produced by the Have Blue program during the 1970s. Each project is given its own fascinating chapter illuminating the aircraft's development at this famed location. But beyond the aircraft themselves, Area 51 - Black Jets also covers a handful of the many classified experimental programs carried out at Area 51 over the years, such as Have Doughnut, Have Ferry, and Have

Drill - secret undertakings that successfully reverse-engineered such enemy aircraft as the Russian MiG during the Cold War. Presented in beautiful hardcover format and illustrated with historic color and black-and-white photographs, diagrams, and maps, this book reveals Area 51 for what it truly is: a clandestine area for the United States' most cutting-edge technological innovators in military aviation.
