This instructive manual presents a pragmatic and clinically proven approach to the prevention and treatment of undergraduate alcohol abuse. The BASICS model is a nonconfrontational, harm reduction approach that helps students reduce their alcohol consumption and decrease the behavioral and health risks associated with heavy drinking. Including numerous reproducible handouts and assessment forms, the book takes readers step-by-step through conducting BASICS assessment and feedback sessions. Special topics covered include the use of DSM-IV criteria to evaluate alcohol abuse, ways to counter student defensiveness about drinking, and obtaining additional treatment for students with severe alcohol dependency. Anthony has two dollars and three quarters and one dime and seven nickels and eighteen pennies. Nicholas has one dollar and two quarters and five dimes and five nickels and thirteen pennies. Alexander has...bus tokens. And even when he's rich, pretty soon all he has is bus tokens. He was rich. Last Sunday. Grandma Betty and Grandpa Louie came and gave Anthony and Nicholas and Alexander each a dollar. Alexander was saving his. Maybe for a walkie-talkie. And then there was bubble gum, some bets with Anthony and Nicholas (that Alexander lost), a snake rental, a garage sale, and all kinds of other things to spend money on. And now all he has is bus tokens. When he used to be rich last Sunday.

This Handbook presents in-depth research conducted on a myriad of issues within the field of financial literacy. Split into six sections, it starts by presenting prevalent conceptions of financial literacy before covering financial literacy in the policy context, the state and development of financial literacy within different countries, issues of assessment and evaluation of financial literacy, approaches to teaching financial literacy, and teacher training and teacher education in financial literacy. In doing so, it provides precise definitions of the construct of financial literacy and elaborates on the state and recent developments of financial literacy around the world, to show ways of measuring and fostering financial literacy and to give hints towards necessary and successful teacher trainings. The book also embraces the diversity in the field by revealing contrasting and conflicting views that cannot be bridged, while at the same time making a contribution by re-joining existing materials in one volume which can be used in academic discourse, in research-workshops, in university lectures and in the definition of program initiatives within the wider field of financial literacy. It allows for a landscape of financial literacy to be depicted which would foster the implementation of learning opportunities for human beings for sake of well-being within financial living-conditions. The Handbook is useful to academics and students of the topic, professionals in the sector of investment and banking, and for every person responsible for managing his or her financial affairs in everyday life.

Using Deliberative Techniques to Teach Financial Literacy Guilford Press

In this collection, scholars from the United States, Canada, and Australia examine the concepts of villainification and anti-villainification in social studies curriculum, popular culture, as well as within sociocultural contexts and their implications. Villainification is the process of identifying an individual or a small group of individuals as the sole source of a larger evil. Anti-villainification considers the messy space in between individual and group culpability in order to help students develop a sense of responsibility to each other as humans in communities on this planet. Chapter authors examine topics related to U.S. politics, financial education, Holocaust education, difficult histories, apocalypse fiction, the Marvel Cinematic Universe, technology use, LGBTQ school experiences, rape culture, geographies of invasion, and the female body. Taken together, these inquiries into villainification

offer thoughtful and powerful insights for teaching about historical wrongdoing in more nuanced ways, addressing the responsibility we all have to create a better world. Contributors: Heather P. Abrahamson • Danelle Adeniji • Erin C. Adams • Rebecca C. Christ • Brandon Haas • Keri Helgren • Brittany L. Jones • Wayne Journell • Daniel G. Krutka • Melissa McQueen • Bryan Smith • Ryan M. Smits • Oren Baruch Stier • Amanda Thomson • Andrew Thomson • Bretton A. Varga Book Features: Pushes the field of social studies to develop a more nuanced understanding of the villains of the past and present. Invites educators to become more thoughtful about not only curriculum but also the world around us. Helps readers to more deeply understand how easily forms of banal evil can touch our lives within and beyond the classroom, and what we might do about it. Examines how systemic forces can influence “average” individuals to cause or contribute to great societal harm. Includes teacher-friendly engagements with theory, using examples from middle and high school classrooms. Offers a wide range of contexts related to social studies education, including civics, economics, geography, and history. “Encourages educators and students in the context of social studies education to delve deeper into exploring the nuanced aspects of contemporary and historical forms of evil.” —From the Foreword by Michalinos Zembylas, professor, Open University of Cyprus

The ideas upon which public education was founded in the last half of the nineteenth century were wrong. And despite their continued dominance in educational thinking for a century and a half, these ideas are no more right today. So argues one of the most original and highly regarded educational theorists of our time in *Getting It Wrong from the Beginning*. Kieran Egan explains how we have come to take mistaken concepts about education for granted and why this dooms our attempts at educational reform. Egan traces the nineteenth-century sources of Progressive thinking about education and their persistence even now. He diagnoses the problem with our schools in a radically different way, and likewise prescribes novel alternatives to present educational practice. His book is both persuasive and full of promise? a book that belongs on the must-read list for anyone who cares about the success of our schools.

College students are particularly vulnerable to making poor financial decisions. One method of addressing personal finances and financial stress among students of higher education is through university based financial education programs. *Student Financial Literacy: Program Development* presents effective strategies to assist in the implementation or the enhancement of a program as a tool to improve students' educational experience and financial well-being. It presents the key components of financial education programs designed to address the growing concerns associated with high levels of debt and low levels of financial literacy among college students. “*Student Financial Literacy: Campus-Based Program Development* is packed with financial education and counseling information and guidance. It was very difficult to write this review as I wanted to share ALL the excellent direction this book provides... The editors and contributing authors have developed an excellent resource for not only those interested in developing or enhancing a campus-based financial education program but also for anyone involved in financial education, counseling, and planning.” -Rebecca J. In *Building Academic Vocabulary: Teacher's Manual*, Robert J. Marzano and Debra J. Pickering give teachers a practical way to help students master academic vocabulary. Research has shown that when teachers, schools, and districts take a systematic approach to helping students identify and

master essential vocabulary and concepts of a given subject area, student comprehension and achievement rises. In the manual, readers will find the following tools: * A method to help teachers, schools, and districts determine which academic vocabulary terms are most essential for their needs * A six-step process for direct instruction in subject area vocabulary * A how-to to help students use the *Building Academic Vocabulary: Student Notebook*. The six-step method encourages students to learn critical academic vocabulary by connecting these terms to prior knowledge using linguistic and non-linguistic means that further encourage the refinement and deepening of their understanding. * Suggestions for tailoring academic vocabulary procedures for English Language Learners. * Samples and blackline masters for a variety of review activities and games that reinforce and refine student understanding of the academic terms and concepts they learn. The book also includes a list of 7, 923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. *Building Academic Vocabulary: Teacher's Manual* puts into practice the research and ideas outlined in Marzano's previous book *Building Background Knowledge for Academic Achievement*. Using the teacher's manual and vocabulary notebooks, educators can guide students in using tools and activities that will help them deepen their own understanding of critical academic vocabulary--the building blocks for achievement in each discipline.
