Corrupted African Books Collective

Global events involving cybersecurity breaches have highlighted the ever-growing dependence on interconnected online systems in international business. The increasing societal dependence on information technology has pushed cybersecurity to the forefront as one of the most urgent challenges facing the global community today. Poor cybersecurity is the primary reason hackers are able to penetrate safeguards in business computers and other networks, and the growing global skills gap in cybersecurity simply exacerbates the problem. Global Cyber Security Labor Shortage and International Business Risk provides emerging research exploring the theoretical and practical aspects of protecting computer systems against online threats as well as transformative business models to ensure sustainability and longevity. Featuring coverage on a broad range of topics such as cybercrime, technology security training, and labor market understanding, this book is ideally designed for professionals, managers, IT consultants, programmers, academicians, and students seeking current research on cyber security's influence on business, education, and social networks.

A scholarly inquiry into disciplinary practices in educational institutions African Books Collective

Actinobacteria: Diversity and Biotechnological Applications: New and Future Developments in Microbial Biotechnology and Bioengineering, a volume in the series New and Future Developments in Microbial Biotechnology and Bioengineering series, offers the latest on the biotechnology of Kingdom actinobacteria, covering unique niches like their endosphere, rhizospheric soil and contaminated sites, etc. The book also covers the bioactive secondary metabolites obtained from actinobacteria and describes the application of microorganism (Actinobacteria) in plant growth promotion and in environmental cleanup. Finally, the book describes the biocontrol aspects of actinobacteria and how they can control fungal phytopathogens and the production of secondary metabolites. Includes an overview of all types of actinobacteria, source and enzymatic activity Lists various bioengineering methods for the production of these enzymes Reviews numerous industrial applications of actinobacteria, i.e., crop improvement, removal of heavy metals, etc. Offers unique coverage of the application of actinobacteria in bioremediation processes Explores the plant growth promoting potential of endophytic actinobacteria Describes biosynthetic potential genes associated with actinobacterial genome

Subjectivity, Language and the Postcolonial Rowman &

Littlefield

Design and Applications of Nanostructured Polymer Blend and Nanocomposite Systems offers readers an intelligent, thorough introduction to the design and applications of this new generation of designer polymers with customized properties. The book assembles and covers, in a unified way, the state-of-the-art developments of this less explored type of material. With a focus on nanostructured polymer blends, the book discusses the science of nanostructure formation and the potential performance benefits of nanostructured polymer blends and composites for applications across many sectors: electronics, coatings, adhesives, energy (photovoltaics), aerospace, automotive, and medical devices (biocompatible polymers). The book also describes the design, morphology, and structure of nanostructured polymer composites and blends to achieve specific properties. Covers all important information for designing and selecting the right nanostructured polymer system Provides specialized knowledge on self-repairing, nanofibre and nanostructured multiphase materials, as well as evaluation and testing of nanostructured polymer systems Serves as a reference guide for development of new products in industries ranging from electronics, coatings, and energy, to transport and medical applications Describes the design, morphology, and structure of nanostructured polymer composites and blends to achieve specific properties

The Origin and Growth of Geography as a discipline at South Africa Universities AFRICAN SUN MeDIA

The book explores African existentialism in relation to issues of race, identity, liberation, freedom, alienation, responsibility and bad faith and includes key essays from More's corpus alongside his philosophical memoir.

Fees Must Fall African Books Collective

Grounded in a critical sociocultural approach, this volume examines issues associated with teaching and learning difficult histories in international contexts. Defined as representations of past violence and oppression, difficult histories are contested and can evoke emotional, often painful, responses in the present. Teaching and learning these histories is contentious yet necessary for increased dialogue within conflict-ridden societies, reconciliation in post-conflict societies, and greater social cohesion in long-standing democratic nations. Focusing on locations and populations across the globe, chapter authors investigate how key themes—including culture, identity, collective memory, emotion, and multi-perspectivity, historical consciousness, distance, and amnesia—inform the teaching and learning of difficult histories.

Making Music, Making Society William Andrew

Tensions in South African universities have traditionally centred

around equity (particularly access and affordability), historical legacies (such as apartheid and colonialism), and the shape and structure of the higher education system. What has not received sufficient attention, is the contribution of the university to place-based development. This volume is the first in South Africa to engage seriously with the place-based developmental role of universities. In the international literature and policy there has been an increasing integration of the university with place-based development, especially in cities. This volume weighs in on the debate by drawing attention to the place-based roles and agency of South African universities in their local towns and cities. It acknowledges that universities were given specific development roles in regions, homelands and towns under apartheid, and comments on why sub-national, place-based development has not been a key theme in post-apartheid, higher education planning. Given the developmental crisis in the country, universities could be expected to play a more constructive and meaningful role in the development of their own precincts, cities and regions. But what should that role be? Is there evidence that this is already occurring in South Africa, despite the lack of a national policy framework? What plans and programmes are in place, and what is needed to expand the development agency of universities at the local level? Who and what might be involved? Where should the focus lie, and who might benefit most, and why? Is there a need perhaps to approach the challenges of college towns, secondary cities and metropolitan centers differently? This book poses some of these questions as it considers the experiences of a number of South African universities, including Wits, Pretoria, Nelson Mandela University and especially Fort Hare as one of its post-centenary challenges.

Anchored in Place IGI Global

Human movement has an influence on the socio-economic dynamics of people, regions, and countries. The schisms between host and immigrants impact how host countries utilize immigrant skills and expertise to benefit their economies. However, immigrants are impacted by negative diplomatic relations between countries that limit the free movement of people and the welfare of immigrants. In association, this brings about social challenges such as Afrophobia, racism, xenophobia, hatred, and violence within these countries. While these challenges are deeply rooted across the world, Africa has its own unique challenges. Still struggling with massive underdevelopment, Africa needs to remove all the negative factors that could impede its quest of achieving development imperatives. Impact of Immigration and Xenophobia on Development in Africa analyzes the genesis and evolution of immigration in Africa and how this has resulted in social challenges such as xenophobia within the continent. The book focuses on demonstrating how immigrant

skills and expertise can be positively utilized to assist African development and asserts the existence of xenophobia in respective countries does not assist Africa's quest of resolving its own challenges. The chapters within this book therefore explore how this subsequent output of xenophobia has impacted African development and focuses on the revival of Pan-Africanism as a uniting instrument and ideology for Africans. This book is a valuable reference tool for activists, retired and practicing politicians, governments, policymakers, practitioners, stakeholders, researchers, students, and academicians.

Food Security and Safety Springer Nature

This book explores the normalization of HIV and AIDS, reflecting upon the intended and unintended consequences of the multifarious "AIDS industry." The Normalization of the HIV and AIDS Epidemic in South Africa deals with the manner in which the HIV and AIDS epidemic has become such a well-known disease with such wide-ranging ramifications. With its focus on the "AIDS industry," this book examines issues such as the framing of the HIV and AIDS epidemic in a manner that greatly fostered notions of stigmatization and moralization. This book looks at the complexities of dealing with the epidemic in contemporary South Africa, examining the difficulties of addressing the social aspects of a disease in the context of increased focus on technological quick-fix solutions. De Wet explores these issues thoroughly, looking at the social determinants of the spread of the disease as well as the configuration and the nature of the responses to it, and their increasing marginalization as factors to address in an era of increased biomedicalization and concomitant normalization. This book will intrigue scholars and students of public health, global health care, medical sociology, and African Studies.

Contemporary South Africa Wits University Press

This book explores the student discontent a year after the start of the 2015 South African #FeesMustFall revolt. #FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to, and financial exclusion from, higher education in South Africa. More broadly, it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet, its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical, top-down leadership system of university management and its 'double speak' of professing to act in workers' and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratized university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the #FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance, and offer provocative analyses of the power of the revolt.

Polymeric Biomaterials for Healthcare Applications Routledge

The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities. The book showcases a broad and textured review of South Africa's geography departments, their staff members, their times, and the different Geographies they engaged in. The book lays the foundation from which more expansive individual departmental histories can be written in the future.

Youth In South Africa Emerald Group Publishing

In *Subjectivity, Language and the Postcolonial*, Hannah Botsis draws on theoretical work that exists at the intersection of critical social psychology, sociolinguistics and the political economy of language, to examine the relationships between language, subjectivity, materiality and political context. The book foregrounds the ways in which the work of Bourdieu could be read in conjunction with 'poststructural' theorists such as Butler and Derrida to offer a critical understanding of subjectivity, language and power in postcolonial contexts. This critical engagement with

theorists traditionally from outside of psychology allows for a situated approach to understanding the embodied and symbolic possibilities and constraints for the postcolonial subject. This exploration opens up how micro-politics of power are refracted through ideological categories such as language, race and class in post-apartheid South Africa. Also drawing on the empirical findings of original research undertaken in the South African context on students' linguistic biographies, the book offers a unique perspective – critical social theory is brought to bear on the empirical linguistic biographies of postcolonial subjects, offering insight into how power is negotiated in the postcolonial symbolic economy. Ideal for advanced undergraduate and postgraduate students on courses including social psychology, sociolinguistics, sociology, politics, and education, this is an invaluable resource for students and researchers alike.

#FeesMustFall and Youth Mobilisation in South Africa Routledge

This book is a collection of chapters based on original research dealing with issues of discipline and disciplinary practices in educational institutions. The aim of the book is to provide a scholarly and scientific perspective on the current state of discipline and disciplinary practices in schools and tertiary education settings. The issue of discipline is investigated from diverse paradigmatic and methodological perspectives, presenting empirical as well as also philosophical research. The empirical perspective includes quantitative (positivistic), qualitative (interpretive) and mixed methods (pragmatic), designs and worldviews. This book offers a ground-breaking contribution to the field of learner and student discipline, with insights into disciplinary practices and issues in educational institutions not hitherto researched, such as Technical Vocational Education and Training colleges and universities.

Digitisation of Culture: Namibian and International Perspectives

Springer Nature

For many young South African adults (often called 'born frees'), who were born just before or just after the demise of political apartheid, the ongoing realities of poverty and inequality bring to light the question of whether they truly are 'free' in contemporary South Africa? Their lived experiences of poverty and inequality seem to be in conflict with theologically laden concepts that remain prominent in social and political life, such as reconciliation, forgiveness, justice and restitution. This leads to a bi-directional process of contesting, and being contested, by such notions and discourses. Furthermore, in light of the double legacy of both the church and youth as resisting injustice, this publication seeks to explore the many perspectives from which the Christian faith, race and inequality amongst youth can be brought to light.

Looking Through Philosophy in Black IGI Global

In South African higher education, the images of dysfunction are everywhere. Student protests. Violence. Police presence. Rubber or real bullets. Class disruptions. Burning tyres. Damaged buildings. Injury and sometimes death. Reports of wholesale corruption. Year after year, often in the same set of universities; the problem of routine instability seems insoluble. The financial, academic and reputational costs of ongoing dysfunction are high, especially for those universities caught-up in the never-ending struggle to overcome apartheid legacies. Any number of explanations have been ventured, including a lack of resources, shortage of capacity, rural location, corrupt officials, and endemic conflict. Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities. At the heart of the problem lies the vexed issue of resources or, more pertinently, the relationship between resources and power: who gets what, and why? Whatever else it aspires to be—commonly, a place of teaching, learning, research and public duty—a university in an impoverished community is also a rich concentration of resources around which corrupt staff, students and those outside of campus all vie for access. Taking a political economic approach, Jonathan Jansen describes the daily struggle for institutional resources and offers accessible, sensible insights. He argues that the problem won't be solved through investments in 'capacity building' alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities. Rather, durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions. This groundbreaking and long

overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly. *Handbook of Research on Administration, Policy, and Leadership in Higher Education* Bloomsbury Publishing

The creation of a sustainable and accessible higher education systems is a pivotal goal in modern society. Adopting strategic frameworks and innovative techniques allows institutions to achieve this objective. The *Handbook of Research on Administration, Policy, and Leadership in Higher Education* is an authoritative reference source for the latest scholarly research on contemporary management issues in educational institutions and presents best practices to improve policies and retain effective governance. Addressing the current state of higher education at an international level, this book is ideally designed for academicians, educational administrators, researchers, and professionals.

Whiteness and Stigma in the Workplace IGI Global

Through the rise of big data and the internet of things, terrorist organizations have been freed from geographic and logistical confines and now have more power than ever before to strike the average citizen directly at home. This, coupled with the inherently asymmetrical nature of cyberwarfare, which grants great advantage to the attacker, has created an unprecedented national security risk that both governments and their citizens are woefully ill-prepared to face. Examining cyber warfare and terrorism through a critical and academic perspective can lead to a better understanding of its foundations and implications. *Cyber Warfare and Terrorism: Concepts, Methodologies, Tools, and Applications* is an essential reference for the latest research on the utilization of online tools by terrorist organizations to communicate with and recruit potential extremists and examines effective countermeasures employed by law enforcement agencies to defend against such threats. Highlighting a range of topics such as cyber threats, digital intelligence, and counterterrorism, this multi-volume book is ideally designed for law enforcement, government officials, lawmakers, security analysts, IT specialists, software developers, intelligence and security practitioners, students, educators, and researchers.

COVID-19 in the African Continent Taylor & Francis

African Higher Education in the 21st Century explores the philosophical dimension of higher education systems in Africa by analysing its ontological, epistemological and ethical foundations. *Public Relations Management in Africa Volume 2* Elsevier Cover -- Title -- Copyright -- Contents -- Preface -- Introduction and rationale -- 1 The view of South African youth before #FeesMustFall -- 2 Were the 2015 student protests a revolution? - - 3 What the 2015 protests actually were and how they were possible -- 4 Ikholisan'ihlomile: FMF students' engagement with power and their ideological differences -- 5 Can South Africa's declining economy inspire student-led new revolution? -- 6 Youth's declining news consumption levels and ideologically divided media -- 7 Youth's polysemic interpretation of the ANC regime and the limits of the new revolution -- 8 Youths' declining participation levels in the public sphere: the constraints of new revolution -- 9 Conclusion: FMF protests will not lead to a revolution per se (at least not yet), but to wide ranging reforms -- References -- Index

Decolonisation in Universities Woodhead Publishing

The *Stolen Bible* analyses Southern African receptions of the Bible from its arrival in imperial Dutch ships in the mid-1600s through to the post-apartheid period of South African democracy, reflecting on how a tool of imperialism becomes an African icon.

Smart Cities and Smart Spaces: Concepts, Methodologies, Tools, and Applications IGI Global

Industry professionals, government officials, and the general public often agree that the modern healthcare system is in need of an overhaul. With many organizations concerned with the long-term care of patients, new strategies, practices, and organizational tools must be developed to optimize the current healthcare system. *Healthcare Policy and Reform: Concepts, Methodologies, Tools, and Applications* is a comprehensive source of academic material on the importance of policy and policy reform initiatives in modern healthcare systems. Highlighting a range of topics such as public health, effective care delivery, and health information systems, this multi-volume book is designed for medical practitioners, medical administrators, professionals, academicians, and researchers interested in all aspects of healthcare policy and reform.
