Hereafter, students of practically all phases of American life will turn to it for help and guidance."—U.S. Quarterly Book Review. Originally published in 1952. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. This study sets out to challenge the usual approach to the question of Holderlin's response to Christ, which focuses on no more than two or three late hymns, by tracing, through each major stage of Holderlin's work, a series of latent Christological debates. These debates, in which philosophy, theology, and poetry converge, represent Holderlin's engagement with the urgent intellectual issues of his day.

 Jacob Boehme's beautiful and influential *Aurora* (1612) with an English translation opposite its source. Commentary on themes and concepts sheds light on the work and its impact on poetry, philosophy,

and mystical religion. The volume includes Boehme's Fundamental Report (1620).

Peter Damian (1007-1072), an 11th-century monk and man of letters, left a large and significant body of correspondence. This third volume of *The Letters of Peter Damian* is an annotated translation of Letters 61-90. These letters reveal the author's concern with the contemporary need for reforms, centering on clerical, especially episcopal, celibacy and on the heresy of simony which involved the purchase of ecclesiastical offices. Because Damian's Latin was a living language that surpasses the ability of classical Latin lexicography to cope with it, all disciplines that make use of medieval thought will welcome this English translation. Owen J. Blum's notes to each letter indicate the vocabulary problems he encountered and how they were resolved. This third volume, like its companions, uses Damian's thought to understand an important and gripping period in the history of church and state.

This book investigates Albert Schweitzer's research on China, which first emerged in the 1910s and ended in 1939/40. Schweitzer's China research evolved alongside the development of his "Kulturphilosophie" research for over a quarter of a century. In "Part I: In Preparation," this book will mainly focus on the historical background against which Schweitzer formulated his *Reverence for Life* and established his networks with the China experts. In "Part II: In Progress," Schweitzer's periodic research outcomes, which were presented in several of his publications and manuscripts, will be studied. Subsequently, in "Part III: In Completion," Richard Wilhelm's translation of the *Yi Jing*, which lay down the fundamental principles for Chinese thought, Schweitzer's final manuscript from 1939/40 under the title *Geschichte des indischen und chinesischen Denkens*, and his final depiction of Chinese thought will be given special attention. The starting point for Schweitzer's China research was his ideal ethical philosophy of *Reverence for Life*, which he formulated in the context of the decline of the Western civilization and was heavily shaped by his religious and philosophical convictions. *Reverence for Life* underscored humanistic concerns, and its ideals eventually became Schweitzer's interpretative principles in his investigation of Chinese thought. Schweitzer was never a specialist in Chinese thought and Chinese civilization. Dependent on the research of

European sinologists, his China research served to justify the necessity for *Reverence for Life* as well as of the methods for applying this new ethical philosophy. During his entire China research, Schweitzer made great efforts to critically interpret and transform the knowledge that had been conveyed by European sinologists such as Richard Wilhelm. Although in his final research Schweitzer had already seen great resemblance between classical Confucianism in China and his *Reverence for Life*, he did not ultimately manage to verify his assumptions. His final manuscript on Chinese thought from 1939/40 remained unpublished when he passed away in 1965.

In this novel you read something about the longing of the planet earth with its plant world and its animal world to lead a peaceful and prosperous life, as the spiritual being, embedded in the spiritual energy, made development process possible. Planet Earth, a small planet on the edge of a galaxy, is doing well. What one cannot say about one's thinking corporeal living beings of the higher spiritual order, i.e. humans. They pull together, are greedy to the point and ultimately cruelly kill each other. What causes the human species in particular to constantly get involved with inhuman character traits?

*Journal of the American Oriental Society* Routledge

Exposes the core of tragic absolutes in German Romantic and Idealist philosophy. *In Search of a Universal Ethics* Indiana University Press

German composer Karlheinz Stockhausen was arguably the most influential figure of the European postwar avant-garde and unquestionably the most elusive and enigmatic musical thinker of a generation that includes Pierre Boulez, John Cage, and Luciano Berio. His radically new electronic and instrumental music converted Igor Stravinsky to serialism in the 1950s and has continued to inspire young composers for more than fifty years. *Other Planets: The Complete Works of Karlheinz Stockhausen, 1950-2007* draws on more than fifty years of Maconie's close study of Stockhausen and functions as a catalogue raisonnee of Stockhausen's complete output. With plentiful citations from the history of radio, film, and sound recording, as well as from contemporary science and technology, the book is laid out in chronological order and contains ample commentary on the composer's sources of inspiration. Each composition is also fully documented within the text, giving full

information of each work's publisher, catalog number, instrumentation, duration, and authorized compact disc. The updated edition extends the range of the volume's contents to include the twenty-five works Stockhausen composed between 2004 and his death in 2007. Stockhausen's status in the history of music in the late twentieth century can now be appreciated with unprecedented clarity. All listeners will benefit from this work, and American music lovers in particular will find it an invaluable guide to the ongoing debate and rivalry over the sources of abstract expressionism and the avant-garde.

To what extent do minority writers feel represented by the literary canon of a nation and its body of "great works"? To what extent do they adhere to, or contest, the supposedly universal values conveyed through those texts and how do they situate their own works within the national tradition? Building on Edward W. Said's contrapuntal readings and Gayatri Chakravorty Spivak's reflections on the voice of the subaltern, this monograph examines the ways in which Rafik Schami, Emine Sevgi Özdamar, and Feridun

Zaimoglu have re-read, challenged, and adapted the German canon. Similar to other writers in postcolonial contexts, their work on the canon entails an inquiry into history and a negotiation of their relation to the texts and representations that define the "host" nation. Through close analyses of the works of these non-native German authors, the book investigates the intersection between politics, ethics, and aesthetics in their work, focusing on the appropriation and re-evaluation of cultural legacies in German-language literature. Opening up a rich critical dialogue with scholars of German Studies and Postcolonial Theory, Christine Meyer provides a fresh perspective on German-language minority literature since the reunification. Rico Paganini, one of the leading megalithic, geomantic and spiritual researchers has visited all the Earths major power points. In this book we travel along with him. And we are able to share in his stirring experiences, in sensitive discoveries and the wondrous insights that he was able to gain. He has not compiled them for himself, but for us all. Perhaps he could only manage his adventures travels, bear the travails and overcome some resistance because the spiritual world was on his side accompanied him, encouraged him and led him with direct guidance. These received messages are also an essential and moving part of this book, and are a special feature is astonishing. As is the telling of the tale of the spiritual and material creation, and the fact that Mother Earth is alive and is conscious; our ancestors had not yet forgotten this. He also leads us through the destruction of the environment, climate changes and the increasing natural catastrophes. What have we done? At the same time, he presents us with solution paths, gives us courage and hope in this dramatic turning point; it is not yet too late! Hence, GAIA LEGACY is much more than a travel report and insight into the power points. It is one can say without exaggeration an incomparable book full of awakening and strength, just as the fifteenth power source

The definitive reference on the anthropology of death and dying, expanded with new contributions covering everything from animal mourning to mortuary cannibalism Few subjects stir the imagination more than the study of how

This unique volume contains, in parallel translation, a thousand of the most frequently performed Lieder, both piano-accompanied and orchestral. Composers are arranged alphabetically, with their songs appearing under poet in chronological order of composition - thus allowing the reader to engage in depth with a particular poet and at the same time to follow the composer's development. Richard Stokes, whose work in this field is already widely acclaimed, provides illuminating short essays on each of the fifty composers' approach to Lieder composition, as well as well as notes on all the poets who inspired the songs. The volume is notable for the accuracy and elegance of its translations, and for its fidelity to the German verse: every care has been taken to print the words of the

sung text, while adhering to the versification and punctuation of the original poem. Beethoven, Schubert and Schumann, Goethe, Heine and Schiller are among the highlights of a book which illuminates one of the great musical traditions and will be an indispensable handbook for every music lover.

Beyond the Mother Tongue examines distinct forms of multilingualism, such as writing in one socially unsanctioned "mother tongue" about another language (Franz Kafka); mobilizing words of foreign derivation as part of a multilingual constellation within one language (Theodor W. Adorno); producing an oeuvre in two separate languages simultaneously (Yoko Tawada); and mixing different languages, codes, and registers within one text (Feridun Zaimoglu).

In this book van der Leeuw discusses the horizontal path to God and the vertical paths descending from God and ascending to Him. If God Himself appears, it is in a totally different manner, which results not in intelligible utterance, but in proclamation; and it is with this that theology has to deal." "These essays are among Scott MacDonald's best. An added bonus among all this new work is one updated vintage essay from 1981—still the very best essay ever written about the uses of pornography. All the essays are intellectually, personally and viscerally vibrant, coupling substantive recent essays with his trademark, probing interviews with key filmmakers. Each interview is beautifully paired with the essays. Scott MacDonald is a monument to thoughtful knowledge of, and pleasure in, avant-garde cinema."—Linda Williams, author of *Screening Sex* "More than any

other critic, Scott MacDonald truly explores contemporary experimental cinema, seeking out new works and new artists, reconsidering classics and broadening out our sense of film history from the images on screen to the social,

political and economic contexts and debates surrounding them. And yet if MacDonald surveys a complex landscapes, his books never carry the claustrophobia of the archive or academia. This criticism answers the call of the open road, with

conversations and companionship with vivid personalities guiding the way, and the sense of high adventure waiting just around the bend."—Tom Gunning, Chair, Committee on Cinema and Media, University of Chicago
