Glycans play essential roles in diverse biological and etiological processes and their structural complexity endow various functions. The glycome is the entire set of glycans produced by an individual organism. As the glycan microarray emerged, a good amount of knowledge has been obtained in understanding the functions of glycans. However, limited accessibility of glycans is a major obstacle to the functional glycomics study. Although isolation from biology samples provided some structures, the low abundance of glycans obtained and the difficulty in complete structural assignment restricted the subsequent assay. To circumvent this limitation, many synthetic strategies, including chemical, enzymatic and chemo-enzymatic ones have been developed to make libraries of structurally defined complex glycans available. The glycans provided by these techniques combined with high-throughput glycoarray techniques have broadened and deepened our understanding about functional glycomics. The aim of this book is to provide a comprehensive review of the current state of the synthetic glycome and a brief introduction of the application of the synthetic glycome in glycoarray assay. Accordingly, synthetic strategies toward generating glycans with comprehensive structures as well as the glycoarrays to unveil the glycan functions are described in this book.

When, in 1960, France granted independence to its colonies in West and Central Africa-an empire covering an area the size of the contiguous United States-the French still intended to retain influence in Africa. Through a system of accords with these newly independent African nations, based upon ties naturally formed over the colonial years, France has succeeded for three decades in preserving its position in African affairs. The course of Franco-African relations in the near future, though, is less than certain. In this book, Ambassador Francis Terry McNamara outlines France's acquisition and administration of its Black African empire and traces the former colonies' paths to independence. Drawing upon that background, the ambassador examines the structure of post-independence Franco-African relations and recent strains on those relations, especially African economic crises and the French tendency to focus on Europe. Because of those strains, he suggests,

France alone may be unable to support its former dependencies much longer. He believes that long-term solutions to African problems will have to involve international organizations like the World Bank and International Monetary Fund as well as other nations such as the United States and France's European partners. -- From Foreword.

Ruth Finnegan's Oral Literature in Africa was first published in 1970, and since then has been widely praised as one of the most important books in its field. Based on years of fieldwork, the study traces the history of storytelling across the continent of Africa. This revised edition makes Finnegan's ground-breaking research available to the next generation of scholars. It includes a new introduction, additional images and an updated bibliography, as well as its original chapters on poetry, prose, "drum language" and drama, and an overview of the social, linguistic and historical background of oral literature in Africa. This book is the first volume in the World Oral Literature Series, an ongoing collaboration between OBP and World Oral Literature Project. A free online archive of recordings and photographs that Finnegan made during her fieldwork in the late 1960s is hosted by the World Oral Literature Project (<http://www.oralliterature.org/collections/rfinnegan001.html>) and can also be accessed from publisher's website.

Originally published in 1986, this volume deals with various aspects of the life of the pastoralists who live in the area between what was Senegambia and Cameroon. It analyses the changing relations between pastoralists and agricultural peoples, and the changes that pastoral societies are undergoing with urbanisation, increased central government control and the spread of market relations. The papers are in both English and French and include historical studies of aspects of the history of Adamawa, the Fulani, the Twareg, the Shuwa Arabs and the Koyam in pre-colonial times. There is also a survey of the state of Fula language studies and the variety of Fula literature; discussions of the changing nature of pastoralism and the nomadic way of life in Cameroon, Senegal and Nigeria, including the effects of drought.
