Lulu.com  
Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text

classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering,

indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured

in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Philippines Labor Laws and Regulations Handbook Volume 1 Strategic Information and Basic Laws Lulu.com

This comprehensive handbook designed for the general public explains the structure of the United Nations, how the Organization works, the main issues it addresses and its

importance for people everywhere. In addition to setting out the various roles played by principle UN organs and related organizations, Basic Facts about the United Nations documents the Organization's contributions to international peace and security, economic and social development, human rights, humanitarian action, international law and decolonization. Appendices contain current data on UN membership and

peacekeeping operations, as well as contact information for UN information centers, services and offices. This latest edition, published in 2017, has been revised to take account of significant developments in the world and the Organization itself since 2014.

The second edition of Jack  
Crumley's *An Introduction  
to Epistemology* strikes a  
balance between the  
many issues that engage  
contemporary  
epistemologists and the  
contributions of the major  
historical figures. He  
shows not only how  
philosophers such as  
Descartes, Hume, Locke,  
Berkeley, and Kant  
foreground the  
contemporary debates,  
but also why they deserve  
consideration on their

own terms. A substantial  
revision of the first  
edition, the second  
edition is even more  
accessible to students.  
The new edition includes  
recent work on  
contextualism,  
evidentialism, externalism  
and internalism, and  
perceptual realism; as  
well, the chapter on  
coherence theory is  
substantially revised,  
reflecting recent  
developments in that  
area. New to this second  
edition is a chapter on  
feminist epistemology,  
which includes

discussions of major  
positions and themes,  
such as feminist  
empiricism, feminist  
standpoint epistemology,  
postmodern  
epistemology, and  
feminist critiques of  
objectivity. It presents the  
important contributions of  
philosophers such as  
Sandra Harding, Helen  
Longino, Genevieve Lloyd,  
and others. Each chapter  
ends with a list of study  
questions and readings  
for further study.
