This well-organized text continues to present the social-cultural anthropological concepts and theories which have influenced the mankind in the past, particularly in the twentieth century—between the years 1965 and 2000. The new edition is incorporated with two new sections—one defining the major concepts of sociology—defining society, community, association and so on, and the other an Appendix on Tribal Movement in India. The book further provides an anthropological analysis of

cultural institutions relating to society, economy, polity, folklore and art. The description of the relation between language and culture and a separate chapter on Cultural Change, make this text unique. Examples are taken from all across the world to describe socio-economic, political, and religious institutions, and give a panoramic view of the diverse cultures. This book is intended to serve as a text for undergraduate students of Anthropology and postgraduate students of Anthropology and Sociology. In addition, it would also be beneficial for the students preparing for various competitive examinations. **KEY FEATURES** • Provides theoretical orientations in cultural anthropology. • Contains annotated references at the end of each chapter. • Gives an insight into the contributions of well-known anthropologists. • Illustrates concepts through diagrams and

charts, thus enhancing the value of the text.

The integration of market economies is one of the most remarkable features of international economics, which has important implications for macroeconomic performance in open economies. Equally important is the declining relevance of the real versus the monetary theory dichotomy. These papers focus on those aspects of monetary policy which relate to credibility and non-neutrality; the domestic adjustment to foreign shocks; the interdependence of open economies and their strategic interactions. An important section is also devoted to the innovative modelling of exchange rate dynamics.

Have you ever experienced a hot air balloon ride? This short story describes a trip from Paris to Belgium taken by the popular French author Guy de Maupassant. Describing in detail every sight and sound, he takes readers on a balloon ride like no other. The three crew members and three passengers watch the sunset and moonrise and experience the threat of a looming storm. Views of Paris and the beautiful French and Belgian countryside below are also eloquently brought to life. 'The Trip of Le Horla' (1887) is perfect for fans of his short stories and readers of 19th-century travel books. Guy de Maupassant (1850-1893) was a famous French writer, best known as one of the finest practitioners of the short story. Master of style and dramatic narrative, Maupassant's stories are mainly interested in the relationships between men and women, often found at the crossroads of life. One of his greatest influences was Gustave Flaubert, who introduced him to some of the central names of the time, such as Émile Zola, Henry James, and Ivan Turgenev. Some of his best-known works include the novels "Bel Ami" and "Une Vie", more than 300 short stories, travel books, and even an attempt at poetry. 'Bel Ami' was made into a film in 2012, starring Uma Thurman, Robert Pattinson, and Kristin Scott Thomas.

*The Economy of Kerala* Hassell Street Press

The unique development experience of the Indian state of Kerala has attracted widespread interest. However, no serious attempt has so far been made to comprehensively assess both the positive and negative features of Kerala's economy. This timely volume amply fills this lacuna by providing a detailed examination of the development, growth and problems of the state's economy over the period 1956 to 1991 while also outlining the prospects. Twenty-two leading economists discuss in this volume a number of crucial issues such as the decline in the rate of growth of the state's economy, the alarming rise in unemployment, the repatriation of Gulf migrants, agricultural stagnation, industrial backwardness, and the financial crisis presently afflicting Kerala. Divided in six parts, the volume begins with an overview of broad trends in Kerala's economy. The second section contains essays on demographic trends, the changing structure of the workforce, poverty, and migration. The next part deals with issues pertaining to the agricultural and allied sectors including marine fisheries. The fourth section comprises papers on both small-scale and heavy industry and the power sector, while the next one discusses trade unionism, educational development and Kerala's external economy. The last section examines recent trends in the state's finances. Presenting a data-based and analytical account of the most recent trends in Kerala's economy, this comprehensive book will be of considerable interest not only to students and scholars of economics, political economy and development studies, but also

to policy-makers and organisations involved in development work.

Has anyone ever asked you—What were the best days of your life? That one period of your life you always wanted to go back to? And live that life . . . one more time? When asked this, I closed my eyes and went back in my own past. And I thought . . . of the days, when life's most complex choices had a simple solution of Akkad Bakkad Bambey Bo! . . . of the seasons when rains were celebrated by making paper boats. . . . of the times when waiting at the railway crossing meant counting the bogies of the train passing by. When I opened my eyes, it seems Like it Happened Yesterday! Like it was yesterday that I broke my first tooth and fell in love for the first time. Like it was yesterday, when I was about to lose my friend, and suddenly he became my best friend. I look back and it becomes a journey full of adventure. It makes me laugh, it makes me cry and I know I'm here because I was . . . Come, hold my hand, and take this trip with me. It will be yesterday for you, once again!

Globalism: The New Market Ideology rejects the notion that we find ourselves at the end of ideology and that democracy has won. Instead, Steger argues that the opening decade of the 21st century will constitute a teeming battlefield of clashing ideologies. The chief protagonist is the dominant neoliberal market ideology Steger calls globalism. After identifying and

evaluating the five central claims of globalism--including assertions that globalization is inevitable, nobody is in charge of globalization, and globalization benefits everyone--Steger offers an overview of the counterclaims made by anti-globalist forces. Visit our website for sample chapters!

Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights

and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

When India became independent in 1947 after two centuries of colonial rule, it immediately adopted a firmly democratic political system, with multiple parties, freedom of speech, and extensive political rights. The famines of the British era disappeared, and steady economic growth replaced the economic stagnation of the Raj. The growth of the Indian economy quickened further over the last three decades and became the second fastest among large economies. Despite a recent dip, it is still one of the highest in the world. Maintaining rapid as well as environmentally sustainable growth remains an important and achievable goal for India. In *An Uncertain Glory*, two of India's leading economists argue that the country's main problems lie in the lack of attention paid to the essential needs of the people, especially of the poor, and often of women. There have been major failures both to foster participatory growth and to make good use of the public resources generated by economic growth to enhance people's living conditions. There is also a continued inadequacy of social services such as schooling and medical care as well as of physical services such as safe water, electricity, drainage, transportation, and sanitation. In the long run, even the feasibility of high economic growth is threatened by the underdevelopment of social and physical infrastructure and the neglect of human

capabilities, in contrast with the Asian approach of simultaneous pursuit of economic growth and human development, as pioneered by Japan, South Korea, and China. In a democratic system, which India has great reason to value, addressing these failures requires not only significant policy rethinking by the government, but also a clearer public understanding of the abysmal extent of social and economic deprivations in the country. The deep inequalities in Indian society tend to constrict public discussion, confining it largely to the lives and concerns of the relatively affluent. Drèze and Sen present a powerful analysis of these deprivations and inequalities as well as the possibility of change through democratic practice.

The critical analysis of science textbooks is vital in improving teaching and learning at all levels in the subject, and this volume sets out a range of academic perspectives on how that analysis should be done. Each chapter focuses on an aspect of science textbook appraisal, with coverage of everything from theoretical and philosophical underpinnings, methodological issues, and conceptual frameworks for critical analysis, to practical techniques for evaluation. Contributions from many of the most distinguished scholars in the field give this collection its sure-footed contemporary relevance, reflecting the international standards of UNESCO as well as leading research organizations such as the American Association for the Advancement of Science (whose Project 2061 is an influential waypoint in developing protocols for textbook analysis). Thus the book shows how to gauge aspects of textbooks such as their treatment of

controversial issues, graphical depictions, scientific historiography, vocabulary usage, accuracy, and readability. The content also covers broader social themes such as the portrayal of women and minorities. "Despite newer, more active pedagogies, textbooks continue to have a strong presence in classrooms and to embody students' socio-historical inheritance in science. Despite their ubiquitous presence, they have received relatively little on-going empirical study. It is imperative that we understand how textbooks influence science learning. This book presents a welcome and much needed analysis." Tina A. Grotzer Harvard University, Cambridge, Massachusetts, USA The present book provides a much needed survey of the current state of research into science textbooks, and offers a wide range of perspectives to inform the 'science' of writing better science textbooks. **Long Walk to Freedom** Concept Publishing Company India is the world's largest democracy, and second-largest developing country. For forty years it has also been one of the most dirigiste and autarkic. The 1980s saw most developing and erstwhile communist countries opt for market economic systems.

India belatedly initiated similar reforms in 1991. This book evaluates the progress of those reforms, covering all of the major areas of policy; stabilization, taxation and trade, domestic and external finance, agriculture, industry, the social sectors, and poverty alleviation. Will India realize its great potential by freeing itself from the self-imposed constraints that have hindered its development? This is the important and fascinating question considered by this book.

"Set in Aligarh in the early 1960s, after the dust of Partition has ostensibly settled, Topi Shukla is a story of two friends - one Hindu and the other Muslim." "Through the characters of people like Topi and Iffan, the novel looks at the lives of ordinary people trying to survive in a society that insists on a brutal conformity of behaviour. It is about individuals whose spirits are paralysed because they cannot conform, and about history's inability to teach mankind any worthwhile lessons." "Language plays an important part in this narrative, operating almost as a character in its own right. Topi, as a Hindi bull in the Urdu china shop, invokes the historical stand-off between the two languages. The novel also explores the culture and psyche of Uttar Pradesh with its very Muslim Aligarh, its very Hindu Benares, and their exotic confluence in Lucknow."--BOOK JACKET.
