A Grammar of Modern Indo-European is a complete reference guide to a living Indo-European language. It contains a comprehensive description of Proto-Indo-European grammar, and offers an analysis of the complexities of the prehistoric language and its reconstruction from its descendant languages. Written in a fresh and accessible style, and illustrated with maps, figures and tables, this book focusses on the real patterns of use of Late Indo-European. The book is well organised and is filled with full, clear explanations of areas of confusion and difficulty. It also contains an extensive English - Indo-European, Indo-European - English vocabulary, as well as detailed etymological notes, designed to provide readers with an easy access to the information they require. An essential reference source for the student of Indo-European as a learned and living language, this work will appeal to students of languages, classics, and the ancient world, as well as to general readers interested in the history of language, and in speaking the direct ancestor of the world's largest language family.

Remaking Post-Industrial Cities: Lessons from North America and Europe examines the transformation of post-industrial cities after the precipitous collapse of big industry in the 1980s on both sides of the Atlantic, presenting a holistic approach to restoring post-industrial cities. Developed from the influential 2013 Remaking Cities Congress, conference chair Donald K. Carter brings together ten in-depth case studies of cities across North America and Europe, documenting their recovery from 1985 to 2015. Each chapter discusses the history of the city, its transformation, and prospects for the future. The cases cross-cut these themes with issues crucial to the resilience of post-industrial cities including sustainability; doing more with less; public engagement; and equity (social, economic and environmental), the most important issue cities face today and for the foreseeable future. This book provides essential "lessons learned" from the mistakes and successes of these cities, and is an invaluable resource for practitioners and students of planning, urban design, urban redevelopment, economic development and public and social policy.

The Islamic State (ISIS) perplexed the world when its leader Abu Bakr Al-Baghdadi declared a caliphate in 2014. This declaration was not just followed by territorial expansion, but also by several new developments in terrorism's actors, ideology, methods and geopolitics. Terrorism and Counterterrorism after the Caliphate analyzes these new developments in terrorism and counterterrorism in the wake of the ISIS-caliphate. This multidisciplinary volume combines legal, philosophical and international relations perspectives in two main lines of inquiry. First, the concepts relevant to terrorism and counter-terrorism studies are analyzed, such as the status of the 'caliphate', the role of 'ideology' and the links with 'militant democracy'. Second, country-specific contributions discuss the latest developments in terrorism and counterterrorism in Belgium, the Netherlands, Germany, Italy and the United States. Terrorism and Counterterrorism after the Caliphate is essential reading for researchers and policy makers alike, grappling with the postcaliphate world of terrorism. The book constitutes a timely follow-up to earlier volumes in which Leiden Jurisprudence researchers collaborated with other Dutch and international scholars on the issues of terrorism, counter-terrorism and militant democracy: Terrorism: Ideology, Law and Policy (2011), The State of Exception and Militant Democracy in a Time of Terror (2012) and Militant Democracy - Political Science, Law and Philosophy (2018).

A fascinating description of a global language, A Grammar of Mandarin combines broad perspectives with illuminating depth. Crammed with examples from everyday conversations, it aims to let the language speak for itself. The book opens with an overview of the language situation and a thorough account of Mandarin speech sounds. Nine core chapters explore syntactic, morphological and lexical dimensions. A final chapter traces the Chinese character script from oracle-bone inscriptions to today's digital pens. This work will cater to language learners and linguistic specialists alike. Easy reference is provided by more than eighty tables, figures, appendices, and a glossary. The main

text is enriched by sections in finer print, offering further analysis and reflection. Example sentences are fully glossed, translated, and explained from diverse angles, with a keen eye for recent linguistic change. This grammar, in short, reveals a Mandarin language in full swing.

This book gives a full account of the economic and social history of Italy since unification (1860), with an introduction covering the previous period since the Middle Ages. The Economic History of Italy represents a scholarly and authoritative account of Italy's progress from a rural economy to an industrialized nation. The book makes a broad division of the period into three parts: the take-off (1860-1913), the consolidation in the midst of two wars and a world depression (1914-47), and the great expansion (1948-1990). Professor Zamagni traces the growth of industrialization, and argues that despite several advanced areas Italy only became an industrialized nation after the Second World War, and that during the 1980s the South was still clearly behind the rest of the country. Zamagni analyses data both from a macroeconomic position, in looking at the growth of the finance sector, or the role of the State, and from a microeconomic position when she draws conclusions from the changing population structure, or from the actions of individual businesses. Professor Zamagni reveals that even though the population more than doubled during this time the level of national income rose 19-fold, to move Italy from a peripheral status in Europe to a central position as a prosperous country. A central theme of the book is Professor Zamagni's argument that the Italian economy has been successful not by any great individuality of its own but by being flexible enough to incorporate the successes of other countries: Japan's integrated business network, for example, or Germany's financial structure. She places the industrialization of Italy in the international context by comparing Italy's GDP and other measures of prosperity at different times to the USA, Japan, the UK, France, and Germany. The book is based on original fieldwork by the author, and the many detailed but small-scale studies existing in Italian. Quantitative trends are described in more than 70 tables of data, while the book provides appendices containing chronologies of main events in various sectors and biographies. *Nederlands voor anderstaligen. 1* John Benjamins Publishing

In the aftermath of the Second World War, Karl Popper introduced his concept of the "open society". Poppers focussed primarily on communism and fascism. Nowadays, communism and fascism have faded away as the primary challenges for open, democratic states, but new challenges have come to the fore. Closed communities pose a significant challenge and sometimes a threat to democratic values. What are those closed communities? This book presents a diagnosis of those closed communities, their problems, and the challenges for an open society.
