A recent study of productivity in the workplace revealed that workers spend on average eight percent of their workday doing nothing. This statistic takes on

greater significance when we find that health problems impact employee productivity loss by an even greater percentage. In light of this discovery, a group of leading experts from the emerging field of health and productivity research argues that the expansion of health care benefits represents a substantial investment opportunity for employers. *Health and Work Productivity* presents state-of-the-art health and productivity research that suggests interventions aimed at

prevention, early detection, and best-practice treatment of workers along with an informed allocation strategy can produce significant cost-benefits for employers. Contributors cover all the major aspects of this new area of research: approaches to studying the effects of health on productivity, ways for employers to estimate the costs of productivity loss, concrete suggestions for future research developments in the area, and the implications of

this research for public policy.

Bestseller A "page-turning thriller that will keep readers guessing until the very end" (School Library Journal) about a road trip

in a snowstorm that turns into bone-chilling disaster, from New York Times bestselling mystery author and "master of tension" (BCCB) Natalie D. Richards. She thought being stranded was the worst thing that could happen. She was wrong. Mira needs to get home for the holidays. Badly. But when an incoming blizzard results in a canceled connecting flight, it looks like she might get stuck at the airport indefinitely. And then Harper, Mira's glamorous seatmate from

her initial flight, offers her a ride. Harper and her three friends can drop Mira off on their way home. But as they set off, Mira realizes fellow travelers are all total strangers. And every one of them is hiding something. Soon, roads go from slippery to terrifying. People's belongings are mysteriously disappearing. Someone in the car is clearly lying, and may even be sabotaging the trip—but why? And can Mira make it home alive, or will this

nightmare drive turn fatal?
