This book constitutes the refereed proceedings of the Fourth International Conference on Futuristic Trends in Network and Communication Technologies, FTNCT 2021. The prime aim of the conference is to invite researchers from different domains of network and communication technologies to a single platform to showcase their research ideas. The selected papers are organized in topical sections on network and computing technologies; wireless networks and Internet of Things (IoT); futuristic computing technologies; communication technologies, security, and privacy. The volume will serve as a reference resource for researchers and practitioners in academia and industry.

Inventive Computation and Information Technologies Springer Nature

This book presents selected research papers on current developments in the fields of soft computing and signal processing from the Second International Conference on Soft

Computing and Signal Processing (ICSCSP 2019). The respective contributions address topics such as soft sets, rough sets, fuzzy logic, neural networks, genetic algorithms and machine learning, and discuss various aspects of these topics, e.g. technological considerations, product implementation, and application issues.

The Oracle Litent

An insightful history of censorship, hate speech, and majoritarianism in post-partition South Asia. At the time of the India-Pakistan partition in 1947, it was widely expected that India would be secular, home to members of different religious traditions and communities, whereas Pakistan would be a homeland for Muslims and an Islamic state. Seventy-five years later, India is on the precipice of declaring itself a Hindu state, and Pakistan has drawn ever narrower interpretations of what it means to be an Islamic republic. Bangladesh, the former eastern wing of Pakistan, has swung between professing secularism and Islam. Neeti Nair assesses landmark debates since partition—debates over the constitutional status of religious minorities and the meanings of secularism and Islam that have evolved to meet the demands of populist electoral majorities. She crosses political and territorial boundaries to bring together cases

of censorship in India, Pakistan, and Bangladesh, each involving claims of “hurt sentiments” on the part of individuals and religious communities. Such cases, while debated in the subcontinent’s courts and parliaments, are increasingly decided on its streets in acts of vigilantism. Hurt Sentiments offers historical context to illuminate how claims of hurt religious sentiments have been weaponized by majorities. Disputes over hate speech and censorship, Nair argues, have materially influenced questions of minority representation and belonging that partition was supposed to have resolved. Meanwhile, growing legal recognition and political solicitation of religious sentiments have fueled a secular resistance.

International Conference on Innovative Computing and Communications Popular Prakashan

This book presents state-of-the-art theories and technologies and discusses developments in the two major fields: engineering and sustainable computing. In this modern era of information and communication technologies [ICT], there is a growing need for new sustainable and energy-efficient communication and networking technologies. The book highlights significant current and potential international research relating to theoretical and practical methods toward developing sustainable communication and networking technologies. In particular, it focuses on emerging technologies such as wireless communications, mobile networks, Internet of things [IoT], sustainability, and edge network models. The contributions cover a number of key research issues in software-defined networks, blockchain technologies, big data, edge/fog computing, computer vision, sentiment analysis, cryptography, energy-efficient systems, and cognitive platforms.

Civic Affairs University of Pennsylvania Press

The 1950s in India were a crucial transition phase where the legacy and institutions of British rule had to be transformed to fit the needs of a post-colonial state. This period is closely associated with India’s first Prime Minister, Jawaharlal Nehru (1947 – 64). Selecting three key policies closely associated with him, the book traces the political origins of the Panchasheela Agreement with China in 1954, the Hindu Code Bills of 1955 and 1956 and the founding of the Planning Commission in 1950. Each provides a window into the compulsions of Indian domestic politics at the time as well as the parameters of parliamentary debate. The book goes on to discuss how these policies correspond to the pillars of Nehru’s vision for a modern, independent India that encapsulated socialism, nonalignment and secularism and assesses their long-run impact in Indian politics. With a growing recognition of the resilience of India’s political arrangements, the analysis is particularly relevant to those interested in the politics of transition and modernisation, and contributes to studies on Political Institutions and South Asian Politics.

Scaling Start-ups Allied Publishers

This book includes high-quality research papers presented at the Third International Conference on Innovative Computing and Communication (ICICC 2020), which is held at the Shaheed Sukhdev College of Business Studies, University of Delhi, Delhi, India, on 21–23 February, 2020. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications.

Link; Springer Nature

This book gathers selected research papers presented at the Third International Conference on Communication and Intelligent Systems (ICCIS 2021), organized by National Institute of

Technology, Delhi, India, during December 18–19, 2021. This book presents a collection of state-of-the-art research work involving cutting-edge technologies for communication and intelligent systems. Over the past few years, advances in artificial intelligence and machine learning have sparked new research efforts around the globe, which explore novel ways of developing intelligent systems and smart communication technologies. The book presents single- and multi-disciplinary research on these themes in order to make the latest results available in a single, readily accessible source.

Bahudhā and the Post 9/11 World Stanford University Press

In 2012 Narendra Modi became the first Hindu nationalist politician thrice elected to lead a state of the Indian Union, his stewardship as Chief Minister of Gujarat being the longest in that state’s history. Modi and his BJP supporters explained his achievement by pointing to economic growth under his leadership, yet detractors point out that Modi has been more business-friendly than market-friendly—to the benefit of large industrial corporations, and at the cost of great social polarisation. In 2002, an anti-Muslim pogrom of unparalleled ferocity occurred in Gujarat, leading to the biggest number of Muslim deaths since Partition. The state’s Hindu majority immediately rallied around Modi. No serious riot has occurred in Gujarat since, but polarisation was key to Modi’s strategy there, and he has deployed that strategy again and again since he became Prime Minister of India in 2014. For Modi has cultivated a communal image. A marketing genius, his messaging combines the politics of Hindutva with economic modernisation, to the clear appreciation of Gujarat’s middle class. Christophe Jaffrelot’s revealing book shows how Modi’s Gujarat served as the laboratory of Modi’s India, not only in terms of Hindu majoritarianism and national populism, but also of caste and class politics.

Sardar Patel and Indian Muslims Springer Nature

An effort to present Sardar's true character as a shrewd politician and statesman.

From Raj to Republic Springer Nature

This book gathers selected papers presented at the Second International Conference on Intelligent Manufacturing and Automation (ICIMA 2020), which was jointly organized by the Departments of Mechanical Engineering and Production Engineering at Dwarkadas J. Sanghvi College of Engineering (DJSCE), Mumbai, and by the Indian Society of Manufacturing Engineers (ISME). Covering a range of topics in intelligent manufacturing, automation, advanced materials and design, it focuses on the latest advances in e.g. CAD/CAM/CAE/CIM/FMS in manufacturing, artificial intelligence in manufacturing, IoT in manufacturing, product design & development, DFM/DFA/FMEA, MEMS & nanotechnology, rapid prototyping, computational techniques, nano- & micro-machining, sustainable manufacturing, industrial engineering, manufacturing process management, modelling & optimization techniques, CRM, MRP & ERP, green, lean & agile manufacturing, logistics & supply chain management, quality assurance & environmental protection, advanced material processing & characterization of composite & smart materials. The book is intended as a reference guide for future researchers, and as a valuable resource for students in graduate and doctoral programmes.

Architect of A Philosophy Notion Press

Deendayal Upadhyaya was the rare combination of an activist, a thinker philosopher and an ideologue. The concept of 'Integral Humanism' propounded by Deendayal Upadhyaya embodies the essence of human unity and development. The entire political history of Post Independence period needs to be properly recorded. Whenever such a history is written it would further raise the contribution of Deendayal Upadhyaya. What makes us proud as an Indian is Pt Deendayal's philosophy of Ekatma Manavwad or integral humanism and the same is evident in his political, social and cultural ideology. As a political ideologue he had firm belief in the slogan of Janasangh- Ek Desh Me Do Vidhan - Nahi Chalega Ek Desh Me Do Pradhan - Nahi Chalega Ek Desh Me Do Nishan - Nahi Chalega He advocated unitary form of government which envisages one centre but he always favoured decentralisation to the lowest unit of administration. His idea of infinite spiral unitary State put centre at the top and province, Janapad, Block, Village and Panchayat below it. Similarly distribution of financial powers should be such that the lowest tier of administration, viz. village Panchayat must have some autonomy.

Communication and Intelligent Systems Springer Nature

Between 1946 and 1952, the British Raj, the world's largest colony, was transformed into the Republic of India, the world's largest democracy. Independence, the Constituent Assembly Debates, the founding of the Republic, and India's first universal franchise general election occurred amidst the violence and displacement of the Partition, the uncertain and contested integration of the princely states, and the forceful quelling of internal dissent. This book investigates the ways in which these violent conjunctures constituted a postcolonial regime of sovereignty and shaped the historical development of democracy in India at the foundational moment of decolonization and national independence. *From Raj to Republic* presents a

multifaceted history of sovereignty and democracy in India by linking together the princely state of Hyderabad's attempt to establish itself as an independent sovereign state, the partitioning of Punjab, and the communist-led revolutionary movement in the southern Indian region of Telangana. A national, territorial, republican, and liberal polity in India emerged out of a violent and contested process that forged new power relations and opened up historical trajectories with lasting consequences for modern India.

Understanding Partition Bhartiya Sahitya Inc.

This book gathers selected high-impact articles from the 2nd International Conference on Data Science, Machine Learning & Applications 2020. It highlights the latest developments in the areas of artificial intelligence, machine learning, soft computing, human-computer interaction and various data science and machine learning applications. It brings together scientists and researchers from different universities and industries around the world to showcase a broad range of perspectives, practices and technical expertise.

Soft Computing and Signal Processing Bharatiya Vidya Bhavan

Sardar Vallabhbhai Patel This biography of Sardar Vallabhbhai Patel is a comprehensive and vivid narration of his unique contribution to Mahatma Gandhi's struggle for India's freedom (1920-47). Without his support, Mahatma Gandhi admitted, his satyagrahas wouldn't have had the same success. It was he who built the party machine through the imposition of strict discipline and by giving it a mass base, and as party boss supervised and directed the functioning of the Congress ministries post-1937 provincial elections. Patel's post-1945 role concerned India's freedom, and also marked the end of his being Gandhi's blind follower. Disillusioned with his own party in the failure of the Cabinet mission parleys, he negotiated directly with Cripps and helped the Congress form the Interim government He wanted to keep Jinnah out in the cold and suffer in his isolation. The book discusses his failure, rather than of the party, with Wavell's maneuvering in getting the Muslim League into the Cabinet as an equal with the congress. With that Jinnah conducted his fight from within. Realizing that united India had become an impossibility and the country faced chaos and total disintegration, Patel rose above all considerations to save and consolidate what would be left of India after Partition. This he achieved through administrative unity by forming the IAS on an all-India basis, and the country's unity through the integration of the Princely States. This book returns to the earlier two decades to show the unity of Patel's thinking and actions. The history of the Gandhian era cannot be complete and properly understood unless Patel is read and appreciated for what he did and achieved for India. Contents • Preface • Sardar Vallabhbhai Patel: Early Life • Sardar Patel: Builder of a Steel Strong India • The Satyagraha: Bardoli and its People • Movement for Indian Independence • Iron Man of India as Seen by His Daughter • The Transfer of Power: Real or Formal? • Partition of India and the Creation of Pakistan • Making of the Constitution and Constituent Assembly in India. • Bibliography • Index

Hurt Sentiments Hurst Publishers

This book brings out with clarity the growth of separatist movement in India leading to her partition.

Glimpses of the Great K.K. Publications

Jayaprakash Narayan, 1902-1979, Indian statesman.

Steps to Career Springer Nature

"Running out of cash" and "not the right team" are amongst the top three reasons for start-up failures. A quick look down the line of reasons shows that the causes are very often related to execution and not the idea itself! It is not so much just the idea being non-scalable and of commercial value, but also about

pragmatic business processes and leadership, which sets apart the successful enterprises that emerge from the fragile start-up ecosystem. 'Scaling Start-ups - The Challenges, Pitfalls and Strategies' takes a very insightful look at all such potential errors and offers simple, pithy and pragmatic options of identifying them, successfully avoiding them, and possible ways of addressing them to significantly increase the probability of success. It aims to enable promoters, founders, entrepreneurs and the fledging teams, to better appreciate and deal with the nuances of the environment realities, organization building, business management, leadership conundrums, regulatory strictures, capital raising and personal development. All this, presented in a simple, short and succinct manner, makes it an engrossing read!!

Sustainable Communication Networks and Application Springer Nature

For the longest time, parents and children both, knew and believed that Medicine, Engineering, Management and Law were the only true 'careers' which could provide job security and steady paycheques. However, youngsters today couldn't have been more open to trying out offbeat careers. They are bold, patient, resilient and aware of the fact that a career that is in line with their interests has a higher chance of being satisfying. An equal, or probably more, parents are sceptical about these unconventional careers and would rather have their children go in for 'tried and tested' jobs. With 'Steps to Career', the author has attempted to dilute the dilemma of such children and their parents, providing them a wealth of information on the available

conventional and unconventional career options, to help the children decide the right career for them, and the process.

Book University Journal Notion Press

The rise of terrorism and fundamentalism in recent times has brought about phenomenal changes in global politics. These unprecedented challenges call for a new, bold, and imaginative statecraft from world leaders. Underlining the need to transcend age old peace mechanism and reconstruct our language of discourse, this book propounds the concept of Bahudhā—an eternal reality or continuum, a dialogue of harmony, and peaceful living. Bahudhā recognizes the distinction between plural societies and pluralism, facilitates exchange of views, and promotes understanding of the collective good. The book is divided into five parts. The first part discusses the major events witnessed by the world during 1989–2001—the fall of Berlin Wall, transfer of Hong Kong to China, and the terrorist attack on the USA on September 11—and their implication for various nations, cultures, and international peace. The next part discusses India's experiences in handling the pluralistic challenges by citing examples from the Vedas and Puranas and analysing policies followed by Ashoka, Kabir, Guru Nanak, Akbar, and Mahatama Gandhi. In the subsequent sections, the author underlines the importance of Bahudhā as an instrument of public policy for harmony and also discusses the global imperatives of following such an approach. He highlights the central role of education and religion in the building of a harmonious society and advocates the strengthening of the United Nations to become an effective global conflict resolution mechanism.
