JACOB ROTH

Teaching Adults OECD Publishing
Recognizing that complexity calls for innovative, conceptual, and methodological solutions, *Dealing with Complexity in Development Evaluation* by Michael Bamberger, Jos Vaessen, and Estelle Raimondo offers practical guidance to policymakers, managers, and evaluation practitioners on how to design and implement complexity-responsive evaluations that can be undertaken in the real world of time, budget, data, and political constraints. Introductory chapters present comprehensive, non-technical overviews of the most common evaluation tools and methodologies, and additional content addresses more cutting-edge material. The book also includes six case study chapters to illustrate examples of various evaluation contexts from around the world.

Attuned Leadership Franz Steiner Verlag
Over the last two decades, South Africa has accomplished enormous social progress by bringing to millions of citizens access to key public services. Nevertheless, growth has trended down markedly recently due to constraints on the supply side. Low growth has led to the stagnation of GDP per ...
Public Health Service Grants for Training Projects National Academies Press
The much heralded growth and transformation of many economies in

sub-Saharan Africa over the last decade continues to receive prominent attention in academic scholarship and among policy practitioners. An apparent feature about this transformation, however, is that Africa's youth appear to have been left out. This book critically examines the extent and consequences of the marginalization of African youth. It questions conventional wisdoms about data trends, aspirational goals, and common policy interventions surrounding Africa's youth that have been variously propagated in both the development studies literature and in mainstream donor policy reports. The book explores macro trends from both a temporal and cross-regional perspective in order to highlight what is distinct about contemporary African youth and whether their prospects and behaviours do actually vary from their counterparts in other regions of the world or from previous generations of African youth. Such studies include cross-country analyses of youth employment patterns and modes of political participation, in-depth examination of the behaviours and aspirations of the urban youth, and critical reflections on the impact of rural employment initiatives, vocational education, and learnership programmes. The incorporation of multiple methods and disciplines, as well as its attention to policy issues, ensures that the book will be of great interest to graduate students, researchers, and professional researchers whose work lies at the intersection of African area studies and development studies as well as those focused on development economics,

political science, and public policy and administration.

Technical and Vocational Education and Training in the Philippines in the Age of Industry 4.0 Routledge

In Mozambique, where more than half of the national health care budget comes from foreign donors, NGOs and global health research projects have facilitated a dramatic expansion of medical services. At once temporary and unfolding over decades, these projects also enact deeply divergent understandings of what care means and who does it. In *Medicine in the Meantime*, Ramah McKay follows two medical projects in Mozambique through the day-to-day lives of patients and health care providers, showing how transnational medical resources and infrastructures give rise to diverse possibilities for work and care amid constraint. Paying careful attention to the specific postcolonial and postsocialist context of Mozambique, McKay considers how the presence of NGOs and the governing logics of the global health economy have transformed the relations—between and within bodies, medical technologies, friends, kin, and organizations—that care requires and how such transformations pose new challenges for ethnographic analysis and critique.

Medicine in the Meantime World Bank Publications

Why solving ongoing problems with the NQF (National Qualifications Framework) matters -- The challenges unemployment imposes on youth -- The challenge of youth-to-work transitions: an international perspective -- A statistical overview of further education and training colleges -- Strengthening the capacity of FET Colleges to meet the needs of young people -- Higher

education and an expanded post-school educational system -- Trends in training in South Africa -- Key issues in the assessment of South Africa's national skills development strategy -- Opening the doors of learning? Viewing the post-school education and training landscape from a youth perspective.

The Report of the New Jersey Commission on Health Science, Education, and Training Routledge

This book focuses on how to improve the quality of jobs and meet the aspirations of youth in Sub-Saharan Africa. It finds that a strong foundation for human capital development can be key to boosting earnings, arguing for a balanced approach that builds skills and demand for labor.

Graduate Programs in Business, Education, Information Studies, Law & Social Work 2015 (Grad 6) SAGE Publications

A gifted education Legacy Award winner, *Social-Emotional Curriculum With Gifted and Talented Students* provides a thorough introduction to methods for developing social-emotional curricula for use with gifted and talented learners in the school setting. Including overviews of strategies that work for implementing social-emotional strategies in the everyday curricula, this book, part of the *Critical Issues in Equity and Excellence* series, a joint publication project of the National Association for Gifted Children and Prufrock Press, combines research and experience from leading scholars in the field of the affective needs of gifted students in a convenient guide for teachers, administrators, and gifted education program directors. The book covers theories to guide affective curricula, the needs of minority students, models to develop social-emotional curricula, tips for counseling gifted

students, and strategies to promote the social-emotional needs of gifted students, along with discussions of suicide prevention among this population, the use of bibliotherapy and discussion groups, and the teacher-counselor connection in affective curricula. This handy guide to developing social-emotional curricula for gifted students is a necessity for anyone serving and working with this population. Educational Resource

Design Thinking for Training and Development John Wiley & Sons

Leaders are not just born to the role. They are born, then made - and sometimes unmade by their own actions. A leader who is not attuned to his or her followers soon becomes a leader in limbo and invariably then fails. Connectedness, compassion, empathy, integrity, humility, reasonableness and a determination to be effective are the keys to attuned leadership. An attuned leader can step boldly into an uncertain future with the certainty that followers will lend their support. In this richly reflective discussion of leadership and transformation the author provides a guide to what constitutes ethical leadership in local and global contexts, for business, politics and government. In a world where tyrants abound in corporations and in states, Attuned Leadership provides a compass for the direction of ethical leadership. Central to this perspective is that the philosophical traditions of Africa offer an important contribution to the theory and practice of leadership in the world today. African humanism or Ubuntu, evokes both reason and empathy as the basis for ethical leadership. Ubuntu - articulated in the Zulu proverb Umuntu Ngumuntu Ngabantu - means that a person is a person because of other people. The

author contends that the reciprocal relationship between the individual and the social collective stimulates caring and progressive thought and action. Nowhere is this more apt than in the relationship between leader and followers.

OECD Economic Surveys: South Africa 2017 Berrett-Koehler Publishers

Public health efforts have resulted in tremendous improvements in the health of individuals and communities. The foundation for effective public health interventions rests, in large part, on a well-trained workforce. Unfortunately there is a major shortage of public health physicians who are prepared to face today's public health challenges.

Training Physicians for Public Health Careers focuses on the critical roles that physicians play in maintaining and strengthening the public health system, identifies what these physicians need to know to engage in effective public health actions, explores the kinds of training programs that can be used to prepare physicians for public health roles, and examines how these training programs can be funded. Medical schools, schools of public health, health care and public health care professionals, medical students and students of public health will find this of special interest.

manpower training AFRICAN SUN MeDIA

The growing together of the European labour markets proves to be a genuine challenge for education, particularly for VET-systems. VET-systems have to provide future employees with the necessary qualifications that they are well equipped for flexibility, mobility and challenges of international cooperation on the labour market. If today's VET-systems are able to impart these key qualifications is unknown. Therefore, the

German Government (BMWA) initiated a feasibility study on VET - modelled on the basis of PISA research studies. The concept of a PISA for vocational education and training presented in this book was developed by leading international experts in the field. It shows how a measuring of expertise and competence is actually possible. It describes the criteria to be used for the evaluation of training programs, and discusses how the efficiency of different learning places are to be evaluated. This study explores the conditions and processes necessary for an improvement of vocational education and training in the participating countries. It thereby provides a significant contribution for the political debate, but also for the academic discussion, for instance on the establishing of a European system of VET.

Get an edge in the job market and develop the soft skills - the personal qualities, habits, attitudes, and social graces needed to work successfully with anyone, anywhere. *Job Readiness for Health Professionals, Soft Skills Strategies for Success, 2nd Edition* provides a unique tool for soft skill programming to help graduates succeed on the job as effective, engaged, and high-functioning employees. This handy resource uses an 8th grade reading level and a consistent, easy-to-follow modular format to guide you through the essential entry-level soft skills like how to dress, speak, and collaborate in the healthcare setting. With two new chapters, new Video Case vignettes, and 48 soft skills and behavioral competencies, it gives you the tools you need to join the healthcare workforce. Behavioral objectives provided for

mastering each skill. Worktext format with journaling activities and multiple self-reflection activities offers valuable review exercises. Critical thinking exercises woven throughout skills include multidisciplinary scenarios from the field. What If? boxes feature short scenarios that encourage you to think about how you would handle a situation in the workplace. Case studies throughout use fictional vignettes to illustrate the issues involved with the specific skills. Down a Dark Road vignettes depict what can go terribly wrong when a skill is ignored or not mastered. Experiential Exercises are actions or experiments that you can perform on your own to gain a deeper appreciation for the skill. Cross Currents with Other Skills ties together and cross-references related skills, pointing out the synergies and connections between them. NEW! Highly anticipated Finding Your First Job chapter highlights competencies that you need to consider and prepare for when starting your job search, beginning a career in the health professions, writing your resume, and interviewing. NEW! Video Case vignettes with assessment and implementation tools on interview skills, active listening, dealing with others, problem solving and decision making, communication, presenting yourself for the workforce, working as a team, dealing with authority, and enhancing your promotability provide a multimedia component with real-life workplace scenarios for your review. NEW! Being a Student chapter covers competencies where students often struggle, including: taking meaningful notes, remaining calm and confident during assessments, and successfully preparing for practicum interviews. NEW! New content on financial literacy, including managing

finances and paying back students loans, covers the impact financial decisions have on your life - both personally and as you look for a job.

Twenty Years of Education

Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things - whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.

Professionals UNESCO Publishing
Planning Programs for Adult Learners, Third Edition covers the development of adult education programs in clear, specific detail. This popular step-by-step guide contains information on every area of program planning for adult learners,

from understanding the purpose of educational programs to obtaining suitable facilities to incorporating technology appropriately. For educators and practitioners for whom planning programs is a full-time responsibility or only a part of their jobs, as well as volunteers in a variety of organizations, will find this book to be an essential tool. Grounded in a variety of program planning models, the new edition includes: new refinements to the 11-component interactive model updated exercises and examples from new settings new material on the practical application of technology discussion of instructional and program evaluation a focus on critical managerial tasks a new chapter on exploring the foundational knowledge of program planning a new section on the ethical issues related to program planning

Essentials of Nursing Leadership and Management Elsevier Health Sciences

Kaye and Giulioni identify three broad types of conversations that have the power to motivate employees more deeply than any well-intentioned development event or process to help with career development.

Public Health Training Cambridge University Press

The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions. The 'triple challenge' of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these

challenges. Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET) band qualifications from young people not in education, employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers. This collection offers a set of research papers that provide new analytic and empirical material on:

- The political economy of TVET types in different countries which, by comparison, illuminate the South African case;
- A periodisation of government interventions in the TVET sector over the last three decades;
- The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service;
- The halting evolution of collegial relationships between college lecturers towards higher collegiality;
- Employer expectations of college graduates and how colleges are responding; and
- An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape.

This book will offer valuable information and insights for decision-makers as well as analysts of institutional change concerning links between education and economic growth, with particular regard to TVET graduates' employment rates.

Supporting Lifelong Learning F A Davis Company

"UNESCO has recently published the third volume of its Education on the Move series, a series dedicated to the analysis of key trends in education with the hope of inspiring dialogue among policy makers, educators and other key stakeholders on the challenges of

education for tomorrow. The latest publication, entitled *Unleashing the Potential: Transforming Technical and Vocational Education and Training* is focused entirely on issues related to technical and vocational education and training (TVET). It takes stock of the steadily increasing demands and expectations on TVET systems around the globe and presents recent policy trends in the field of TVET. In their analysis, the authors provide insights into what it takes to unleash the potential of TVET systems around the world. They propose an integrated analytical approach that takes into consideration such factors as economic growth, social equity and issues related to sustainability so that TVET can contribute more effectively to contemporary policy issues such as youth unemployment, gender disparities and climate change. Overall, the book calls for a transformation of TVET systems to enable them to respond to the demands of their contexts. This transformation should enable TVET systems to acquire agility to stay current and responsive to the rapidly changing demands of the twenty-first century."-- Publisher's website.

Health Policy and European Union Enlargement Asian Development Bank Graduate Programs in Business, Education, Information Studies, Law & Social Work 2015 contains helpful facts and figures on more than 11,000 graduate programs. The comprehensive directory includes more than 1,850 institutions and their programs in all of the relevant disciplines such as accounting and finance, business management, education, law, library and information sciences, marketing, social work, and many more. Informative data profiles feature facts and figures on

accreditation, degree requirements, application deadlines, contact information, financial support, faculty, and student body profiles. Two-page in-depth descriptions, written by featured institutions, offer complete details on specific graduate program, school, or department as well as information on faculty research. Comprehensive directories list programs in this volume, as well as others in the graduate series.

Youth Employment in Sub-Saharan Africa Association for Talent Development

Better Learning Solutions Through Better Learning Experiences When training and development initiatives treat learning as something that occurs as a one-time event, the learner and the business suffer. Using design thinking can help talent development professionals ensure learning sticks to drive improved performance. *Design Thinking for Training and Development* offers a primer on design thinking, a human-centered process and problem-solving methodology that focuses on involving users of a solution in its design. For effective design thinking, talent development professionals need to go beyond the UX, the user experience, and incorporate the LX, the learner experience. In this how-to guide for applying design thinking tools and techniques, Sharon Boller and Laura Fletcher share how they adapted the traditional design thinking process for training and development projects. Their process involves steps to: Get perspective. Refine the problem. Ideate and prototype. Iterate (develop, test, pilot, and refine). Implement. Design thinking is about balancing the three forces on training and development programs: learner wants and needs, business needs, and constraints. Learn how to get buy-in from skeptical

stakeholders. Discover why taking requests for training, gathering the perspective of stakeholders and learners, and crafting problem statements will uncover the true issue at hand. Two in-depth case studies show how the authors made design thinking work. Job aids and tools featured in this book include: a strategy blueprint to uncover what a stakeholder is trying to solve an empathy map to capture the learner's thoughts, actions, motivators, and challenges an experience map to better understand how the learner performs. With its hands-on, use-it-today approach, this book will get you started on your own journey to applying design thinking.

Change Management in TVET

Colleges OECD Publishing

This new edition focuses on preparing your students to assume the role as a significant member of the health-care team and manager of care, and is designed to help your students transition to professional nursing practice. Developed as a user-friendly text, the content and style makes it a great tool for your students in or out of the classroom. (Midwest).
