Journal 1 McGraw-Hill
Education
The Everyday
Mathematics (EM)
program was
developed by the
University of Chicago
School Mathematics
Project (UCSMP) and is
now used in more than
185,000 classrooms by
almost three million
students. Its research-
based learning delivers
the kinds of results
that all school districts
aspire to. Yet despite
that tremendous
success, EMOften
leaves parents
perplexed. Learning is
accomplished not
through rote
memorization, but by
actually engaging in
real-life math tasks.
The curriculum isn't
linear, but rather
spirals back and forth,

weaving concepts in and out of lessons that build overall understanding and long-term retention. It's no wonder that many parents have difficulty navigating this innovative mathematical and pedagogic terrain. Now help is here. Inspired by UCSMP's firsthand experiences with parents and teachers, *Everyday Mathematics for Parents* will equip parents with an understanding of EM and enable them to help their children with homework—the heart of the great parental adventure of ensuring that children become mathematically proficient. Featuring accessible explanations of the research-based philosophy and design of the program, and

insights into the strengths of EM, this little book provides the big-picture information that parents need. Clear descriptions of how and why this approach is different are paired with illustrative tables that underscore the unique attributes of EM. Detailed guidance for assisting students with homework includes explanations of the key EM concepts that underlie each assignment. Resources for helping students practice math more at home also provide an understanding of the long-term utility of EM. Easy to use, yet jam-packed with knowledge and helpful tips, *Everyday Mathematics for Parents* will become a pocket mentor to parents and teachers new to EM who are

ready to step up and help children succeed. With this book in hand, you'll finally understand that while

this may not be the way that you learned math, it's actually much better.
