Sudoku for the super-smart Mensa members are known for their finely-honed logic skills--and that's just what it takes to

become an expert at sudoku. So it's no surprise that this organization for the highly intelligent has put together a huge collection of these sizzling-hot puzzles--a whopping 534 games to sate the obsessed solver's craving. They start out relatively easy for the newcomer, and get harder (and more fun) as you go along.

Mensa Guide to Solving Sudoku Skyhorse Publishing Inc.

Are you a Mensa genius? Challenge yourself and excite your brain with this entertaining collection of new puzzles created in partnership with American Mensa and the AARP (American Association of Retired People). Young or old, your brain is essential to everything you do.

You owe it to yourself not just to stay physically fit, but to stay mentally fit, too! This book of logic and number puzzles will help you do just that. A collaboration between Mensa and AARP, it is packed with brain teasers to exercise your mind and keep yourself sharp.

Whether you are looking to practice your critical thinking skills or you just want to keep your mind sharp, these puzzles will provide a short workout for your cognitive lobes. In the end, you'll have given your mind a problem-solving workout—and you'll have had fun in the process. Challenge yourself and help keep your mind sharp with these brain-bending games and puzzles.

Super Lateral Thinking Puzzles

Main Street Press
Puzzle these out! Math and logic become more fun than ever when they're turned into brainteasing games.

Some of these puzzles use cards or marbles; others have diagrams, grids, and lively illustrations; still more present their questions as a story or riddle.

Here are just two examples: Look at this sentence: Dale is wrong. Using all these letters, can you spell a single word? Or try

Non-aligned Pawns:
How must the 8 white and 8 black pawns in a chess set be placed on a board so that no three pawns end up in the same horizontal, vertical, or diagonal line? They'll really test your smarts!

Take the Mensa

challenge! These extraordinarily entertaining puzzles can confound even those with high IQs-and that's what makes them such delightfully tricky fun. A few can be solved relatively quickly, but the hardest may seem nearly impossible to crack. Give your skills a real workout on numerical conundrums, word games, lateral thinking problems, and riddles. Brainteasers, arranged in order of difficulty, train the mind and provide a good time all at once. The most complex bafflers include chess, logic, and spatial puzzles. Here's a small sampler of what's inside! ♦ A farmer has twenty sheep, ten pigs, and ten cows. If we call the pigs cows, how many cows will he

have? ♦ Which three boys' names are anagrams of one another? Answers: 1. Ten cows. We can call the pigs cows, but that doesn't make them cows. 2. Arnold, Roland, and Ronald. *Brain-Training Tips, Logic Tests, and Puzzles to Exercise Your Mind* Skyhorse Puzzle collections are ubiquitous. But a collection like this one, with so many unusual and original entries, is rare indeed. Dick Hess's gathering of his all-time favorites includes number puzzles, geometric puzzles, logic puzzles, analytical puzzles, story puzzles--and every one a gem. They vary in difficulty, but every one is challenging. In fact, two of them are mathematical

problems still awaiting definitive solutions! Here's an example of one of the easier ones: Which is the longest month in London? (Answer: October, when clocks are set back one hour.) True connoisseurs will treasure this intriguing volume, and everyone who loves a good puzzle will find something entertaining and worthwhile here. *Mensa Sudoku* Sterling Publishing Company, Inc. It's puzzle nirvana for crossword lovers who have just a few minutes to spare, but still crave a challenge. Adapted from the popular *Mensa 10-Minute Crossword Puzzles Page-A-Day Calendar*, *Mensa 10-Minute Crossword Puzzles* strikes a perfect balance: The

puzzles are tough enough to be sanctioned by Mensa, the internationally famous high-IQ society, but are designed to be solvable in ten minutes or less. Expertly written by puzzle master Fred Piscop, Mensa member, author of the Mensa calendar, and frequent crossword contributor to both The New York Times and The Washington Post, these cleverly themed crossword puzzles will appeal to both seasoned solvers and novices looking to hone their skills. They are an addictive addition to your morning routine (just add coffee); perfect for evening downtime; just right for your commute on the subway, or while waiting at the doctor's office or sitting in a

restaurant—anytime you need a mental pick-me-up. The book's chunky format, which works so well for puzzle books like The Original Sudoku series, fits easily into a purse or bag. An answer key is included at the back of the book.

The Toughest Puzzles from the World's Smartest Organization Sterling Publishing Company, Inc.

Don't think too hard or you'll never solve these logic puzzles and riddles. The answers to all 187 are easy once you catch the tricky wording. How can you tie a knot in a napkin by holding one end in each hand without letting go of it?

Impossible, you say (or your friends will say, if you bet them). But: Cross your arms and

hold a tip of the napkin in each hand. When you uncross your arms, the knot will be formed! Now try this riddle: I climbed up a cherry tree, where I found cherries. I did not pick cherries, nor did I leave cherries. How can you explain this? Answer: I climbed up a cherry tree with two cherries in my hand. I picked only one. I left the other one on the tree. I did not "pick cherries," because I "picked a cherry." Take this dare: My bird can fly faster than any supersonic plane. Here's how: If you put my bird inside any plane and make it fly in the same direction as the plane, it will go faster than the plane. 96 pages, 52 b/w illus., 5 3/8 x 8 1/4.

Give your brain a workout on the type of brainteasers that challenge the best solvers at the World Puzzle Championships. They're tough, but fun, and the feeling of satisfaction you get when you succeed is simply unbeatable. Some of the puzzles are oldies but goodies, like battleships--and its many variants--where you search for a fleet hidden within a grid. In "Eminent Domain," try to determine which blanks cells are owned by the numbered ones. For "Hex Loops," locate a path that travels through adjacent hexagons: the trick is, it has to end where it

started, and the lines can't touch or cross.

From Snaky Tiles to Spiral Galaxies, these Mensa-level

conundrums will get your mind in shape.

What could be more appealing to Mensa members--or anyone who enjoys a good challenge--than a cunning test of intelligence and logic?

That's exactly what these 250 puzzles provide. The trick to kakuro is in making it all add up: the game begins with a grid that looks like a crossword, except that some squares contain small numbers in the corner. Fill in all the empty boxes using the numbers 1 to 9 without repeats so that the

sum of each horizontal set of digits equals the number in the black triangle to its left, and the sum of each vertical set of digits equals the number in the triangle above it. The kakuro puzzles start out simple...and get more difficult as the book progresses. The GCHQ Puzzle Book Workman Publishing This book contains a fiendish collection of over 150 mind games to tax your powers of logic in ways you had never thought possible! All kinds of logic brainteasers are included in this Mensa-branded book that will ensure your brain cells never have a chance to rest!

Here it comes: a revolution in sudoku solving! This is by far the most complete guide to cracking these addictive puzzles ever

produced, with tricks even the experts won't know. While most books might have a few pages of introduction before proceeding straight to the sudokus, this one covers it all: hidden pairs, naked pairs, X-wings, jellyfish, squirmbag, bivalued and bilocation graphs, turbot fish, grid coloring, and chains. Every single one is here, and much more too, including the exclusive Gordonian logic methods (Gordonian rectangles and Gordonian polygons) that will turn even the hardest puzzles into a breeze. Of course, there are hundreds of sudoku for practice. A very special addition is a reprint of the very first sudoku ever published in 1979, from Dell Pencil

Puzzles and Word Games magazine!
