Multilinguals are not multiple monolinguals. Yet multilingual assessment proceeds through monolingual norms, as if fair conclusions were possible in the absence of fair comparison. In addition, multilingualism concerns what people do with language, not what languages do to people. Yet research focus remains on multilinguals' languages, as if languages existed despite their users. This book redresses these paradoxes. Multilingual scholars, teachers and speech-language clinicians from Europe, Asia, Australia and the US contribute the first studies dedicated to multilingual norms, those found in real-life multilingual development, assessment and use. Readership includes educators, clinicians, decision-makers and researchers interested in multilingualism.

Introduction to Oriya Odisha Society of the Americas

Educators are at the epicenter of language policy in education. This book explores how they interpret, negotiate, resist, and (re)create language policies in classrooms. Bridging the divide between policy and practice by analyzing their interconnectedness, it examines the negotiation of language education policies in schools around the world, focusing on educators' central role in this complex and dynamic process. Each chapter shares findings from research conducted in specific school districts, schools, or classrooms around the world and then details how educators negotiate policy in these local contexts. Discussion questions are included in each chapter. A highlighted section provides practical suggestions and guiding principles for teachers who are negotiating language policies in their own schools.
