"Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace"--Back cover.

Judicial Politics in the United States examines the role of courts as policymaking institutions and their interactions with the other branches of government and other political actors in the U.S. political system. Not only does this book cover the nuts and bolts of the functions, structures and processes of our courts and legal system, it goes beyond other judicial process books by exploring how the courts interact with executives, legislatures, and state and federal bureaucracies. It also includes a chapter devoted to the courts' interactions with interest groups, the media, and general public opinion and a chapter that looks at how American courts and judges interact with other judiciaries around the world. Judicial Politics in the United States balances coverage of judicial processes with discussions of the courts' interactions with our larger political universe, making it an essential text for students of judicial politics.

What difference does gender make to foreign diplomacy? What do we know about women's participation as decision-makers in

international affairs? Is it fair to assume, as many observers do, that female elites will mirror the relatively pacifist preferences of women in the general public as well as the claims of progressive feminist movements? And, of particular importance to this book, what consequences follow from the appointment of "firsts" to these posts? Inspired by recent work in the field of feminist diplomatic history, this book offers the first comparative examination of women's presence in senior national security positions in the United States executive branch. Sylvia Bashevkin looks at four high-profile appointees in the United States since 1980: Jeane Kirkpatrick during the Reagan years, Madeleine Albright in the Clinton era, Condoleezza Rice during the George W. Bush presidency, and Hillary Rodham Clinton in the first Obama mandate. Bashevkin explores the extent to which each of these women was able to fully participate in a domain long dominated by men, focusing in particular on the extent to which each shaped foreign policy in meaningful ways. She looks particularly at two specific phenomena: first, the influence of female decision-makers, notably their ability to make measurable difference to the understanding and practice of national security policy; and second, leaders' actions with respect to matters of war and women's rights. The track records of these four women reveal not just a consistent willingness to pursue muscular, aggressive approaches to international relations, but also widely divergent views about feminism. *Women as Foreign Policy Leaders* shows how Kirkpatrick, Albright, Rice, and Clinton staked out their presence on the international scene and provided a crucial antidote to the silencing of women's voices in global politics.

Gold Stripe on a Jackass is a conceptually rich description of one naval officer's career journey. Author Stephen B. Sloane began his career in Annapolis, where the commandment of obedience holds sway, and finished in Berkeley, a place where questioning authority is woven deeply into the cultural fabric. Sloane rejects the conventional role of corporate, government, and military ideals by demonstrating that efficiency can be attained without sacrificing morality. He maintains that the person who dons the "gold stripe" of authority should reject the role of "jackass" and strive for moral efficiency by regarding the expenditure of human life as a cost rather than the utilization of a tangible resource. Inspired by Admiral James Bond Stockdale's experience as a prisoner-of-war in Vietnam, Sloane asserts that a man's ethical posture and philosophical outlook can enable him and others to survive even the direst conditions with honor. *Gold Stripe on a Jackass* provides readers with a guide to individual responsibility for leadership decision making that emphasizes the requirement to question authority and the need to speak truth to power. This is an original and enlightening contribution to scholarship and education as well as a moral compass for those who occupy positions of authority in the corporate and governmental sectors of society. 1789-1795 were years of revolutionary drama in France—of struggle protest, war-fever, exasperation, terror, ambition and bloodshed. Few of the many who are remembered from the time were great men, but they lived under the microscope of great times, which gave to their most insignificant qualities portentous proportions. Perhaps, too, their age and country encouraged variety and extravagance of character, few there are few periods of history so rich in personalities. Of the eleven men chosen by J. M. Thompson for study, only three (Sieyès, Lafayette and Dumouriez) survived the Revolution, and lived to see its cynical apotheosis in the Napoleonic Empire. Of the others, Mirabeau died in 1791 and Louvet in 1797, while the remainder—Brissot, Marat, Danton, Fabre, Robespierre and St. Just—were murdered, executed or put to death. J. M. Thompson writes in his introduction, 'But to all of them the Revolution was an overwhelming experience. What did they do in it? What did they think of it? Let us see.'

What is Information Governance? Information governance is using the business strategy to apply objectivity, economies, and efficiencies of scale to the processes necessary for the management of information in the achievement of business success. The point of Information or Data Governance is to create TRUSTED data for the business. But how is that actually done? This book is for the individual who is looking for a starting place for establishing a path to better information for their business through a data governance program. The book focuses on describing deliverables and techniques necessary to quantify and measure the Trust of information, including creating dashboards to monitor the success of the Information Management and Governance (IMG) Program as well as an overall Trust Dashboard for the enterprise. If you are trying to answer any of the following questions, then this book can help you out: How do we decrease the number of data silos? How much management and governance is needed for the data? Who owns the data? How do we get the business to trust the data? What measurements can I

use to prove the data is good? What do I show executives to illustrate the progress of a data governance program? How can trust of business data be quantified? How is the relevance of data to the business determined? What is the appropriate level of management and governance necessary for the data? This book will help you answer these questions and start improving (and measuring the improvement) of data for your business. The book includes chapters that give a high level overview of data governance but focuses most of the attention on the deliverables and methods necessary to quantify and measure the Trust of data, thereby establishing clear measurements for success.

Success is measured not by the size of your brain, but rather by the size of your thinking. This intrigues a lot of people, and if you observe how people behave, you will have a clear understanding of what success really means. Time and time again, history and experience have proved that the degree of our general satisfaction and happiness is dependent on how we think. There is magic in thinking big! Positive thinking helps accomplish so much in our life, but unfortunately not everyone thinks that way. We are all products of our thinking that goes within and around us. There is an environment around us that exerts all sorts of forces on your thinking; some will push you up the ladder while others will pull you down. We have been told many times that opportunities to lead are no longer there; hence we should be content with who we are without having positive aspirations on leadership. The petty environment surrounding us also has its own narrative concerning our lives. It constantly tells us that whatever is destined will eventually happen and we have no control over it. Leaving your fate in the hands of chance can potentially ruin your life and make you miserable. Therefore, before you start giving up your dreams of a finer home or giving a better life for your children, stand firm and resist resigning to fate. Do not lie down and wait to die. Success is worth every effort you expend, and every step you make pays a dividend. Even in an environment where competition is intense, you still can succeed as long as your thinking is in the positive quadrant of your mind frame. The basic concepts and principles that underlie the power of thinking big are drawn from the highest-pedigree sources and the finest thinking minds such as Emerson who said "Great men are those who see that thoughts rule the world." Milton who wrote in his book *Paradise Lost*, "The mind is its own place and in itself can make a heaven of hell or a hell of heaven." Shakespeare made an interesting observation about thinking which he summarized and said "There is nothing either good or bad except that thinking makes it so." Proof is everywhere that thinking big indeed works. When you look at the lives of people who you consider as big thinkers, you will be amazed at their winning success, happiness and achievements. This book will show you proven strategies from different life situations that will turn your life around.
