Tahiti Nui is an account of the survival of a Polynesian society in the face of successive settlements of missionaries, traders, and administrators. Beginning with the first explorers and Captain Cook's scientific observations at Point Venus, Dr. Newbury has separated the various strands interwoven in the fabric of Tahitian society, tracing their development and showing how they interacted at successive stages. Missionaries and foreign traders, administrators and Polynesians, planters and immigrant Chinese have all contributed to the distinctive flavor of French Polynesia,

with Tahiti and Tahitians becoming increasingly dominant, not just as the focus of the French administration in Pape'ete, but in the social networks and trading patterns that have evolved.

Somewhere between global and local, the nation still lingers as a concept. National art histories continue to be written – some for the first time – while innovative methods and practices redraw the boundaries of these imagined communities. Narratives Unfolding considers the mobility of ideas, transnationalism, and entangled histories in essays that define new ways to see national art in ever-changing nations. Examining works that were designed to reclaim or rethink issues of territory and dispossession, home and exile, contributors to this volume

demonstrate that the writing of national art histories is a vital project for intergenerational exchange of knowledge and its visual formations. Essays showcase revealing moments of modern and contemporary art history in Canada, Egypt, Iceland, India, Ireland, Israel/Palestine, Romania, Scotland, Turkey, and the United Arab Emirates, paying particular attention to the agency of institutions such as archives, art galleries, milestone exhibitions, and artist retreats. Old and emergent art cities, including Cairo, Dubai, New York, and Vancouver, are also examined in light of avant-gardism, cosmopolitanism, and migration. *Narratives Unfolding* is both a survey of current art historical approaches and their connection to the source: art-making and art experience happening somewhere.

It's 1953 on the Cote d'Azur. A beautiful blond 21-year-old Swedish aristocrat meets a charismatic, boyish American senator with what she calls a "fascinating accent." They spend a romantic (and chaste) evening together, share a passionate kiss, and he professes his love. But, alas, the handsome prince is about to turn into a married man -- the very next week. So that's that. Or should have been. But the newly married, ambitious, increasingly famous senator writes ardently and phones often, declaring how much he needs "my Swedish flicka" and vowing they will meet again in Paris or the Rivi.

The Adélie penguin is one of the best-studied birds in the world and is the subject of research programs from a dozen nations interested in monitoring changes in the environment and the food webs of the Southern Ocean. This species' population has been

changing dramatically over the past few decades coincident with a general warming of the maritime portion of Antarctica. When the sea-ice is seen to decline so does the population of Adélie penguins. Further south, however, the population is increasing. This book summarizes our present ecological knowledge of this polar seabird. In so doing, David Ainley describes the ecological factors important to its life history and details the mechanisms by which it is responding to climate change. The author also chronicles the history of research on Adélie penguins, beginning with the heroic expeditions at the beginning of the twentieth century. Weaving together history, ecology, natural history, and written accounts from the earliest Antarctic naturalists into a fascinating account of this charismatic bird, *The Adélie Penguin* provides a foundation upon which future ornithological research and environmental monitoring can be based. It is a model for investigations into the effect of climate change on a particular species. The book also contains many fine illustrations from the accomplished illustrator Lucia deLeiris and photographs by the author.

Since its discovery Antarctica has held a deep fascination for biologists. Extreme environmental conditions, seasonality and isolation have led to some of the most striking examples of natural selection and adaptation on Earth. Paradoxically, some of these adaptations may pose constraints on the ability of the Antarctic biota to respond to climate change. Parts of Antarctica are showing some of the largest changes in temperature and other environmental conditions in the world. In this volume, published in association with the Royal Society, leading polar

scientists present a synthesis of the latest research on the biological systems in Antarctica, covering organisms from microbes to vertebrate higher predators. This book comes at a time when new technologies and approaches allow the implications of climate change and other direct human impacts on Antarctica to be viewed at a range of scales; across entire regions, whole ecosystems and down to the level of species and variation within their genomes. Chapters address both Antarctic terrestrial and marine ecosystems, and the scientific and management challenges of the future are explored.

The only in-depth biographical account of the legendary lead singer of Joy Division, written by his widow. Includes a foreword by Jon Savage and an introduction by Joy Division drummer, Steven Morris. Revered by his peers and idolized by his fans, Ian Curtis left behind a legacy rich in artistic genius. Mesmerizing on stage but introverted and prone to desperate mood swings in his private life, Curtis died by his own hand on 18 May 1980.

Touching from a Distance documents how, with a wife, child and impending international fame, Curtis was seduced by the glory of an early grave. Regarded as the essential book on the essential icon of the post-punk era, *Touching from a Distance* includes a full set of Curtis's lyrics and a discography and gig list.

In the mid-1930s, Irmina, an ambitious young German, moves to London. At a cocktail party, she meets Howard Green, one of the first black students at Oxford, who, like Irmina, is working towards an independent existence. However, their relationship comes to an abrupt end when Irmina, constrained by the political situation in Hitler's Germany, is forced to return home. As war approaches and her contact with Howard is broken, it becomes clear to Irmina that prosperity will only be possible through the betrayal of her ideals. In the award-winning Irmina, Barbara Yelin presents a troubling drama about the tension between integrity and social advancement. Based on a true story, this moving and perceptive graphic novel perfectly conjures the oppressive atmosphere of wartime Germany, reflecting with compassion and intelligence on the complicity that results from the choice, conscious or otherwise, to look away.

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Since the end of the apartheid era, Cape Town, South Africa's metropolis par excellence, has become a major tourist destination, offering sunny backdrops for commercials and homes for the moneyed classes. Obscene levels of unemployment and the daily struggle for survival among the impoverished are rarely visible behind this veneer. The South African photographer David Lurie unmasks the "other" Cape Town, in the early morning hours, when the city is still asleep, delicate and vulnerable. His

series *Morning After Dark* deals with the infrastructure of public and private places and its influence on the city's residents--from rich to poor. The second series in the book, *Writing the City*, considers the city's surfaces: urban landscapes that include billboards, street signs, graffiti and street art. What are they saying? Who are they speaking to? How do they direct society, and to where? Lurie offers a highly pensive study in fascinating and original images.
