A powerful and humane exploration of the history of the "insanity defense," through the story of one poignant case. When a three-year-old child was found with a head wound and other injuries, it looked like an open-and-shut case of second-degree murder. Psychologist and attorney Susan Vinocour agreed to evaluate the defendant, the child's mentally ill and impoverished grandmother, to determine whether she was competent to stand trial. Even if she had caused the child's death, had she realized at the time that her actions were wrong or was she legally "insane"? What followed was anything but an open-and-shut case. Nobody's Child traces the legal definition of "insanity" back to its inception in Victorian Britain nearly two hundred years ago, from when our understanding of the human mind was in its infancy, to today, when questions of race, class, and ability so often determine who is legally "insane" and who is criminally guilty. Vinocour explains how "competency" and "insanity" are creatures of a legal system, not of psychiatric reality, and how, in criminal law, the insanity defense has to often been a luxury of the rich and white. Nobody's Child is a profoundly dignified portrait of injustice in America and a complex examination of the troubling intersection of mental health and the law. When prisons are now the largest institutions for the mentally ill, Vinocour demands that we reckon with our conceptions of "insanity" with clarity, empathy, and responsibility.

This volume provides in a conveniently accessible package a comprehensive collection of accurate and timely information on the management of patients with diarrhea, both in pediatric age and in the adult. As medical knowledge has recently expanded in this area, this volume is full of new practical, clinically useful material for the busy clinician. Illustrations are emphasized to permit rapid acquisition of practical information that is not readily available in the major texts. Each chapter is concise, concentrating on "clinical pearls," and new advances in diagnostic and therapeutic technology. Each chapter discusses the relative costs of diagnostic and therapeutic options to permit financial considerations to be taken into account in the decision making process. Additional unique features include, summaries of key points, recommendations, and indications for requesting GI subspecialty consultation. Providing a comprehensive but practical overview of the issues surrounding the diarrheal diseases, this volume will prove of great value and utility to gastroenterologists, surgeons, internists, primary care physicians.

Handbook of Pain and Palliative Care: Biobehavioral Approaches for the Life Course Rhonda J. Moore, editor This book takes both a biobehavioral and a lifespan approach to understanding long-term and chronic pain, and intervening to optimize patients' functioning. Rich in clinical diversity, chapters explore emerging areas of interest (computer-based interventions, fibromyalgia, stress), ongoing concerns (cancer pain, low back pain), and special populations (pediatric, elderly, military). This coverage provides readers with a knowledge base in assessment, treatment, and management that is up to date, practice strengthening, and forward looking. Subject areas featured in the Handbook include: ■ Patient-practitioner communication ■ Assessment tools and strategies ■ Common pain conditions across the lifespan ■ Biobehavioral mechanisms of chronic pain ■ Pharmaceutical, neurological, and rehabilitative interventions ■ Psychosocial, complementary/alternative, narrative, and spiritual approaches ■ Ethical issue and future directions With the rise of integrative perspective and the emphasis on overall quality of life rather than discrete symptoms, pain management is gaining importance across medical disciplines. Handbook of Pain and Palliative Care stands out as a one-stop reference for a range of professionals, including health practitioners specializing in pain management or palliative care, clinical and health psychologists, public health professionals, and clinicians and administrators in long-term care and hospice.

Any healthcare professional with, or developing an interest in, clinical nutrition will be able to use this textbook, first published in 2001, as a source of information for the formation of a clinical nutrition support service of excellence. The first three parts of the book will enable a clear perspective of the metabolism and physiology of clinical nutrition to be related to the practical application of support techniques. The fourth part of the book highlights the role of nutrition support in specific disease groups. A number of additional chapters have been added for this second edition, and modifications made to the content of chapters from the first edition to cover newer areas or areas of omission.

Compelling evidence that the events of Homer's Iliad and Odyssey took place in the Baltic and not the Mediterranean • Reveals how a climate change forced the migration of a people and their myth to ancient Greece • Identifies the true geographic sites of Troy and Ithaca in the Baltic Sea and Calypso's Isle in the North Atlantic Ocean For years scholars have debated the incongruities in Homer's Iliad and Odyssey, given that his descriptions are at odds with the geography of the areas he purportedly describes. Inspired by Plutarch's remark that Calypso's Isle was only five days sailing from Britain, Felice Vinci convincingly argues that Homer's epic tales originated not in the Mediterranean, but in the northern Baltic Sea. Using meticulous geographical analysis, Vinci shows that many Homeric places, such as Troy and Ithaca, can still be identified in the geographic landscape of the Baltic. He explains how the dense, foggy weather described by Ulysses befits northern not Mediterranean climes, and how battles lasting through the night would easily have been possible in the long days of the Baltic summer. Vinci's meteorological analysis reveals how a decline of the "climatic optimum" caused the blond seafarers to migrate south to warmer climates, where they rebuilt their original world in the Mediterranean. Through many generations the memory of the heroic age and the feats performed by their ancestors in their lost homeland was preserved and handed down to the following ages, only later to be codified by Homer in the Iliad and the Odyssey. Felice Vinci offers a key to open many doors that allow us to consider the age-old question of the Indo-European diaspora and the origin of the Greek civilization from a new perspective.

A smart, hilarious, and lavishly illustrated guide to the most euphemised word in the English language: Drunk A record-breaking assemblage of 2,964 different ways to say "drunk." Tipsy, roasted, three sheets, whazooed and Boris Yeltsinned are just the beginning...With an introduction by the wise-guy lexicographer himself, Paul Dickson, and illustrations by renowned artist Brian Rea. Dickson, who holds the Guinness World Record for collecting the most words for being, er, not sober, not only provides a dictionary of those words, but reveals why there are so many synonyms for being "drunk," and how he came to collect more of them than anyone else. The terms are annotated, too, and lushly illustrated, explaining the twist and turns of a language that has thousands of ways to say the same thing. How, for example, does a word like "blotto" go from the lips of P.G. Wodehouse, into the writings of Edmund Wilson, before landing with Otto from The Simpsons ("My name is Otto, I like to get blotto").

This book presents an in-depth analysis of how statutory and third sector organisations have faced the challenge of dealing with former 'terrorists'. Offering a theoretically robust, empirically rich account of work with ex-prisoners and those considered 'at risk' of involvement in extremism in the United Kingdom, Marsden dissects the problems governments are facing in dealing with the effects of 'radicalisation'. Increasingly, governments are struggling with the challenge of dealing with those who have become involved in extremism, and yet, comparatively little is known about how and why people renounce violence. Nor are existing efforts to 'deradicalise' extremists well understood. Arguing that reintegration is a more appropriate framework than 'deradicalisation', Marsden looks in detail at the mechanisms by which people can be supported to move away from extremism. By drawing out implications for policy, practice and academic debates around disengagement from radical subcultures, this book makes a significant contribution to an issue only likely to grow in importance for scholars of criminological theory, terrorism and justice.

This title was first published in 2000: The focus of this analysis is that of moral standards in public service, with special attention to the role(s) of

officials. It presents discussion of some of the issues that seem to the contributors to be of pressing importance and that seem to have relevance for public service in the new millennium. It concentrates in particular on public officials, and the constraints imposed on them by the political environment in liberal democracies.

The Danube-Oder-Elbe Canal promised to create an integrated waterway system across Europe, linking Black Sea ports to Atlantic markets and giving landlocked Czech nation its own connections to the ocean. The fascinating history of this never-completed project, European Coasts of Bohemia tells the story of the experts who confronted and contributed to different and often conflicting geopolitical visions of Europe. Jíra Janáč shows how the canal-backers adapted themselves to various political developments, such as the break-up of the Austrian-Hungarian Empire and the integration into the Soviet Bloc, while still managing to keep the canal project alive.

This comprehensive examination of extensive reading shows how reading large quantities of books and other materials can provide students with essential practice in learning to read and help them develop a positive attitude towards reading, which is sometimes missed in second language classes. The authors first examine the cognitive and affective nature of reading and then offer a wealth of practical advice for implementing extensive reading with second language learners. Suggestions are provided for integrating extensive reading into the curriculum, establishing a library, selecting reading materials, and keeping records for purposes of evaluation. The text also describes a wide variety of classroom activities to supplement individualized silent reading. The information will be useful both for pre-service teachers and for teachers and administrators who want to improve the teaching of reading in their second language programs.

A gripping behind-the-scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war On July 17, 2018, starting an unjust war became a prosecutable international crime alongside genocide, crimes against humanity, and war crimes. Instead of collective state responsibility, our leaders are now personally subject to indictment for crimes of aggression, from invasions and preemptions to drone strikes and cyberattacks. The Crime of Aggression is Noah Weisbord's riveting insider's account of the high-stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start. Weisbord, a key drafter of the law for the International Criminal Court, takes readers behind the scenes of one of the most consequential legal dramas in modern international diplomacy. Drawing on in-depth interviews and his own invaluable insights, he sheds critical light on the motivations of the prosecutors, diplomats, and military strategists who championed the fledgling prohibition on unjust war—and those who tried to sink it. He untangles the complex history behind the measure, tracing how the crime of aggression was born at the Nuremberg trials only to fall dormant during the Cold War, and he draws lessons from such pivotal events as the collapse of the League of Nations, the rise of the United Nations, September 11, and the war on terror. The power to try leaders for unjust war holds untold promise for the international order, but also great risk. In this incisive and vitally important book, Weisbord explains how judges in such cases can balance the imperatives of justice and peace, and how the fair prosecution of aggression can humanize modern statecraft.

Northern Albania and Montenegro are the only regions in Europe to have retained a true tribal society up to the mid-twentieth century. This book provides the first scholarly investigation of this tribal society, a pioneer work that offers a detailed survey of all the major Albanian-speaking tribes in Albania, Montenegro and Kosovo. Robert Elsie provides comprehensive material on the 69 different tribes, including data on their locations, religious affiliations, tribal structures and relations, population statistics, tribal folklore, legends and history. Also included are excerpts from the works of prominent nineteenth and early-twentieth century writers, such as Edith Durham and Johann Georg von Hahn, who travelled through the tribal regions, as well as short biographies on prominent figures linked to the tribes. As the first book of its kind, The Tribes of Albania will be of interest to scholars and students of the Balkans, of southeastern European anthropology, ethnography and history.
