Language learning is a complex and challenging endeavor. For students to achieve the desired proficiency in English as a Foreign Language (EFL) their institutions need to invest time, effort and huge resources in order to cater for different learning styles. To be cost effective, many language-teaching institutions strive to provide intensive foreign language (FL) instruction to reduce the time period needed to learn the target language. This explains the current interest in combining

Teaching English as a Foreign Language For Dummies Corwin Press
Written by translation practitioners, teachers and researchers, this edited volume is a much-needed contribution to the under-researched area of community translation. Its chapters outline the specific nature and challenges of community translation (e.g. language policies, language variation within target communities, literacy levels), quality standards, training and the relationship between community translation as a professional practice and volunteer or crowd-sourced translation. A number of chapters also provide insights into the situation of community translation and initiatives taking place in different countries (e.g. Australia, South Africa, Spain, the USA or the UK). The book is of interest to translation practitioners, researchers and trainers, particularly those working or interested in the specific field of community translation, as well as to translation students on undergraduate, postgraduate or further education courses covering translation in general or community

translation in particular.

This Research Handbook offers a comprehensive study of jurilinguistics that not only presents the latest international research findings among academics and practitioners, but also provides a new approach to the phenomena and nature of communicative flexibility, legal genres, vulnerability of interlingual legal communication, and the cultural landscape of legal translation.

Engaging English Learners Through Access to Standards Routledge
La publicación de este volumen representa un caso relativamente insólito. Un pequeño grupo de jóvenes investigadores de menos de treinta años convence a un grupo mucho más numeroso de la misma edad para celebrar en Salamanca la First Conference of Young Researchers on Anglophone Studies. El resultado es deslumbrante. No solo demuestran una gran capacidad organizativa, sino que los resultados individuales de las

aportaciones científicas son sobresalientes. Este volumen, *Current Trends in Anglophone Studies*, recoge una selección revisada de las propuestas presentadas en el Encuentro y gira en torno a una estructuración tripartita clásica: estudios culturales, lingüísticos y literarios. En ella caben todos aquellos que se mueven en el campo de los estudios anglófonos. Cada uno de estos campos podría haber sido suficiente para celebrar un congreso, pero parece razonable que en este tipo de encuentros tengan cabida todos. De ese modo, este volumen se convierte en un ejemplo de aproximación interdisciplinar a los estudios anglófonos. Desde un punto de vista cuantitativo, los estudios culturales ocupan sin duda un espacio menor. Sin embargo, sobresale la variedad de temas tratados, así como la internacionalización de los autores, dentro de este apartado. Estudiantes españoles e italianos acometen estudios relacionados con la música, la pintura, el cine, la traducción, la marginalidad social o el impacto de las nuevas tecnologías en la producción artística. Si no

pareciera demasiado atrevido, podría decirse que estos jóvenes estudiosos irían más allá de lo que un día ya lejano pudieron imaginar Richard Hoggard o Raymond Williams. Los estudios aquí presentados reflejan, sin duda, la evolución que la propia sociedad ha experimentado en estos últimos cincuenta años y exploran la relación entre las prácticas culturales, la vida diaria, y los contextos económicos, políticos e históricos. No es de extrañar que una gran parte de las contribuciones presentadas en este volumen se centren en el estudio de la lengua, ya que la demanda del inglés se ha incrementado de forma considerable en los últimos años. Sobresalen los análisis puramente filológicos y sobre todo los relacionados con el aprendizaje del inglés como segunda lengua. Por eso, destacan estudios que contemplan rasgos morfológicos, léxicos o sintácticos. Sin embargo, el mayor número de participaciones hace referencia al ya citado aprendizaje del inglés como L2, tanto desde el análisis de materiales, como desde la práctica oral o escrita. Las contribuciones literarias

ofrecen una evaluación teórica, formal e interpretativa de distintas tendencias desde perspectivas tanto interdisciplinares como interculturales. Cronológicamente los estudios abarcan textos desde el siglo XVIII hasta nuestros días, con un acento especial en los autores más contemporáneos y en el género narrativo. En general estos estudios se fijan en textos concretos y los analizan desde perspectivas culturales, sociológicas o psicológicas. Pero abundan menos las aproximaciones desde la teoría literaria, desde la técnica narrativa o, como tal vez cabría esperar al tratarse de estudiantes tan jóvenes, desde la aplicación de las nuevas tecnologías. Por el contrario, se repiten temas como los traumas heredados de la Guerra de Vietnam, las cicatrices del 11 de septiembre o los problemas de género. En definitiva, se trata de una selección de artículos claramente prometedora, que transmite la seguridad de que el futuro de la Filología Inglesa está en buenas manos y podrá experimentar una positiva evolución en los próximos años. Por todo ello, hay

que felicitar a todos los participantes individuales y, sobre todo, a los organizadores del evento, y editores de este volumen, que han demostrado una enorme capacidad de trabajo y de saber hacer.

Current trends in anglophone studies: cultural, linguistic and literary research:

Multilingual Matters Translating Change explores and analyses the impact of changes in society, culture and language on the translation and interpreting process and product. It looks at how social attitudes, behaviours and values change over time, how languages respond to these changes, how these changes are reflected in the processing and production of translations and how technological change and economic uncertainty in the wake of events such as the

COVID-19 pandemic and Brexit affect the translation market. The authors examine trends in language change in English, French, German, Italian and Spanish. The highly topical approach to social, cultural and language change is predominantly synchronic and pragmatic, based on tracking and analysing language changes and trends as they have developed and continue to do so. This is combined with an innovative section on developing transferable translation-related skills, including writing and rewriting, editing, abstracting, transcreation and summary writing in view of a perceived need to expand the skills portfolio of translators in a changing market and at the same time to maximise translation quality. Each chapter features Pause for Thought/activity boxes to encourage active reader participation or reflection. With exercises, discussion questions, guided further reading throughout and a glossary of key terms, this innovative textbook is key reading for both students and translators or interpreters, in training and in practice.

A New Hand-dictionary of

the English Language for the Germans and of the German Language for Englishmen Houghton Mifflin Harcourt

"In the second half of the twentieth century, Reiki went from an obscure therapy practiced by a few thousand Japanese and Japanese Americans to a global phenomenon. By the early twenty-first century, people in nearly every corner of the world have undergone the initiations that authorize them to channel a cosmic energy--known as Reiki--to heal body, mind, and spirit. They lay hands on themselves and others, use secret symbols and incantations to send Reiki to distant recipients, and strive to follow five precepts to cultivate their spiritual growth. Reiki's international rise and development is due to the work of Hawayo Takata (1900-1980), a Hawai'i-born Japanese American woman who brought Reiki out of Japan and adapted it for thousands of students in Hawai'i and North America, shaping interconnections across the North Pacific region as well as cultural transformations over the transwar period spanning World War II. Alternate Currents: Reiki's Circulation in the

Twentieth-Century North Pacific analyzes how, from her training in Japan in the mid-1930s to her death in Iowa in 1980, Takata built a vast trans-Pacific network that connected Japanese American laborers on Hawai'i plantations to social elites in Tokyo, Hollywood, and New York; middle class housewives in American suburbs; and off-the-grid tree planters in the mountains of British Columbia. Using recently uncovered archival materials and original oral histories, Stein examines how these relationships between healer and patient, master and disciple, became deeply infused with values of their time and place and how they interplayed with Reiki's circulation, performance, and meanings along with broader cultural shifts in the twentieth-century North Pacific. Highly readable and informative, each chapter is structured around a period in the life of Takata, the charismatic, rags-to-riches architect of the network in which Reiki spread for decades. Alternate Currents explores Reiki as an exemplary transnational spiritual therapy, demonstrating how lived practices

transcend artificial distinctions between religion and medicine, and circulate in global systems while maintaining strong connections with the practices' homeland"--

Different regions of the world are making increasing demands for educational reform, especially when institutions are dissatisfied with the level of proficiency of their graduates. Since the realization of how important English education is to global success, reform to English education is becoming progressively vital in societies all over the world. The Handbook of Research on Curriculum Reform Initiatives in English Education provides research exploring the theoretical and practical aspects of a variety of areas related to English education and reform, as well as applications within curriculum development and instructional design. Featuring coverage on a broad range of topics such as teachers' roles, teaching methods, and professional development, this book is ideally designed for researchers,

educators, administrators, policymakers, interpreters, translators, and linguists seeking current research on the existing body of knowledge about curriculum reform in English education in an international context.

This book represents the first systematic study of the certification of lunacy in the British Empire. Considering a variety of legal, archival, and published sources, it traces the origins and dissemination of a peculiar method for determining mental unsoundness defined as the 'Victorian system'. Shaped by the dynamics surrounding the clandestine committal of wealthy Londoners in private madhouses, this system featured three distinctive tenets: standardized forms, independent medical examinations, and written facts of insanity. Despite their complexity, Victorian certificates achieved a remarkable success. Not only did they survive in the UK for more than a century, but they also served as a model for the development of mental health laws around the

world. By the start of the Second World War, more than seventy colonial and non-colonial jurisdictions adopted the Victorian formula for making lunacy official with some countries still relying on it to this very day. Using case studies from Europe, the Americas, and the Pacific, this book charts the temporal and geographical trajectory of an imperial technology used to determine a person's destiny. Shifting the focus from metropolitan policies to colonial dynamics, and from macro developments to micro histories, it explores the perspectives of families, doctors, and public officials as they began to deal with the delicate business of certification. This book will be of interest to scholars working on mental health policy, the history of medicine, disability studies, and the British Empire.

Living Languages is simply bursting with practical and original ideas aimed at teachers and trainee teachers of foreign languages in secondary schools. Written by a team of experienced linguists, this book will inspire and

motivate the foreign language classroom and the teachers who work within it. *Living Languages* comprises eight chapters and is structured around the integrated classroom, merging language learning with different aspects of the wider curriculum such as multimedia, theatre and music, celebrations and festivals, sport, and alternative approaches to teaching languages. A DVD is also included with the book containing additional teaching materials and the associated films and audio recordings which make this a fully developed and effective teaching resource. Twenty-eight real-life case studies and projects are presented, all of which have been tried and tested in the classroom with many having won recent educational awards. Ideas and activities outlined in this unique resource include: Languages and multi-media projects involving different uses of technology such as film-making, Digital Storytelling and subtitling in different languages; Languages and theatre and music including the work of the Théâtre Sans Frontières with its Marie

Curie Science Project; Motivating pupils to learn languages whilst keeping fit including examples from Score in French, The German Orienteering Festival and Handball in Spanish; Continuing Professional Development to inspire secondary language teachers to continue their individual professional development. The chapter contains concrete examples of others' experiences in this area and includes details of support organisations and practical opportunities. Each project is explored from the teachers' perspective with practical tips, lesson plans and reflections woven throughout the text such as what to budget, how to organise the pre-event period, how to evaluate the activity and whom to contact for further advice in each case. Activities and examples throughout are given in three languages – French, German and Spanish. *Handbook of Research on Curriculum Reform Initiatives in English Education* Cambridge University Press Use this six-part strategy for measurable, cross-curricular EL achievement! language is a central resource in transforming migrant women into transnational domestic workers. Focusing on the migration of women from the Philippines to Singapore, the book unpacks why and how language is embedded in the infrastructure of transnational labor migration that links migrant-sending and migrant-receiving countries. It sheds light on the everyday lives of transnational domestic workers and how they draw on their linguistic repertoires, and in particular on English, as they cross geographical and social spaces. By showing how the transnational mobility of labor is dependent on the selection and performance of particular assemblages of linguistic resources that index migrants as labor and not as people, the book provides a powerful lens with which to examine how migration contributes to relationships of inequality and how such inequalities are produced and challenged on the terrain of language.

This volume gathers contributions in the closely linked fields of English language assessment and language education. The contributors from China and Hong Kong represent a mixture of established and new scholars. Areas covered in the language education section range across major developments in the redefining of Hong Kong's secondary and tertiary curricula, as well as the

huge field of China's vocational education curriculum. Regarding assessment, the contributions reflect major changes in the marking of examinations in Hong Kong, whereby all examinations from 2012 onwards are marked onscreen, to quality control issues in the administration of China's College English Test, which is taken by over 10 million candidates every year.

The Certificate in

Education and Training

University of Hawaii Press
This book fills a critical gap in a neglected area in current educational research: international teacher education. It focuses on the preparation of teachers of English as an additional language (EAL) in several world regions. The book consists of chapters by researchers in well-established teacher education programs in 11 countries: Brazil, Canada, China, Finland, Greece, New Zealand, Russia, Saudi Arabia, South Korea, Turkey and the United States of America. It takes a cross-national, comparative approach around four major focus areas: policy, research,

curriculum and practice, offering critical implications that can help improve EAL teacher education programs in different parts of the world. Teacher education is an area that has great potential for international cross-pollination of ideas and actions, and this book represents an important first step along this road.
