This book is suitable for those preparing for the examinations of ICB, AAT, IAB, OCR, AQA and all other

courses in computerised accounting. Learning computerised book-keeping skills is very different from manual accounting. It can seem more like learning computer studies than book-keeping, and it is often difficult to connect it with what may have been previously learned in manual book-keeping. In this book Dr Marshall resolves this problem with the same skill and insight that made his book on manual book-keeping, *Mastering Book-keeping*, so useful to readers over the years. Deliberately constructing a clear and continuous bridge between the methods so that the student never loses sight of the double entry concept, he presents the

material in a way that makes computerised book-keeping clear and easy to understand.

A memoir from Charles Campisi, who, "from 1996 through 2014 ... headed NYPD's Internal Affairs Bureau, working under four police commissioners and gaining a reputation as hard-nosed and incorruptible. When he retired, only one man on the 36,000-member force had served

longer. During Campisi's IAB tenure, the number of New Yorkers shot, wounded, or killed by cops every year declined by almost 90 percent, and the number of cops failing integrity tests shrank to an equally startling low. But to achieve those exemplary results, Campisi had to triple IAB's staff, hire the very best detectives, and put the word out that bad apples wouldn't be tolerated"-
