In the 8th edition of this market-leading title, *The World Today* continues to break new ground in the interpretation and teaching of world regional geography. The text explains the contemporary world's geographic realms in terms of their natural environments and human dimensions in a clear and concise fashion. The authors look at the ways people have organized their living space,

adapted to changing social as well as environmental circumstances, and continue to confront forces largely beyond their control, ranging from globalization to climate change. This book offers an approach to Geography that meshes theoretical concepts with regional realities. The evolving regional content of the chapters in the 8th edition of *The World Today* reflects the dynamic nature of the world's geography; the changing and growing number of concepts mirror the progress of the discipline; and the ongoing introduction of new digital features reflects the instructional possibilities of new
