"When the dust clears, it's time for life to move forward with Sean Ferro. His beautiful wind swept hair and his jaw dusted with dark stubble makes me want to roll back with him into the sand. I don't want to face what's waiting at home. Not yet. Life is about to shift again. Some parts happy, like expecting a beautiful baby and a second chance at love. My blue-eyed soul mate is eager, ready to begin anew. Other parts of life are unknown. Like where do I stand in the mess I left behind? How do I go on from here? It feels like we're waking on demon husks, treading on our past sins so carefully so we do not rouse them. But in the end it doesn't matter. Fate has already decided. It's not until we're back in New York that I realize the chain of events that were set in motion. By me. Billionaires can't save me. The Ferro name can't protect us. If I want to ensure my family is safe, I have to be the one to do it. Surviving justifies anything, right? I finally understand the lengths to which I must go to ensure our survival. FML. Things are about to get hard again."--

By NEW YORK TIMES Bestselling Author H.M. Ward Blackmail. Sex. Ferro. His dark hair, bright eyes, and cocky grin look just the way I remembered. The last time I saw Bryan's Ferro's beautiful body, he was naked and shimmering with sweat. This time he's wearing a tux and a wicked smirk that makes my heart beat too fast. It's been so long since I've seen him, the moment feels supercharged. But, the words that fall out of his mouth aren't what I expect and shock me to the core. They aren't light and pleasant, like ex-lovers who decided to part ways. His tone is clipped, and if his jaw locked any tighter, it would crack. He doesn't care about my personal life, my recent loss, or my boyfriend. Bryan makes his intentions clear--if I don't sleep with him, he'll ruin me.

Planning algorithms are impacting technical disciplines and industries around the world, including

robotics, computer-aided design, manufacturing, computer graphics, aerospace applications, drug design, and protein folding. This coherent and comprehensive book unifies material from several sources, including robotics, control theory, artificial intelligence, and algorithms. The treatment is centered on robot motion planning, but integrates material on planning in discrete spaces. A major part of the book is devoted to planning under uncertainty, including decision theory, Markov decision processes, and information spaces, which are the 'configuration spaces' of all sensor-based planning problems. The last part of the book delves into planning under differential constraints that arise when automating the motions of virtually any mechanical system. This text and reference is intended for students, engineers, and researchers in robotics, artificial intelligence, and control theory as well as computer graphics, algorithms, and computational biology.
