So You Think You Know About Diplodocus? Indiana University Press
 Imagine if instead of getting the usual lollipop or sticker everywhere you go, there was something bigger on offer... something much, much bigger! This is exactly what happens when a little boy accompanies his mum on a busy shopping trip. Just when the little boy thinks he's going to die of boredom, something very unusual happens... shops everywhere are giving away a very special treat with every purchase ~ a free dinosaur! It's a dream come true... except, what exactly do you do with these Jurassic treats? And how do you convince mum to let you keep them?
Dinosaurs: 101 Super Fun Facts And Amazing Pictures (Featuring The World's Top 16 Dinosaurs) Random House Books for Young Readers
 The next edition in the Everything You Need to Know About series takes readers to the prehistoric era when creatures like Smilodons, Pterodactyls and the Megatooth Shark ruled the land,

air, and sea. Everything You Need to Know about Dinosaurs includes images, games, size comparisons, timelines, a glossary, an index, and more that will satisfy the curious minds of dinosaur-crazed kids, and be a trusted source for parents wanting to introduce their young readers to the world of dinosaurs. From the earliest fossils to the death of the dinosaurs and everything in between. Everything You Need to Know about Dinosaurs will intrigue readers and provide an experience that will redefine natural history for kids. Supports the Common Core State Standards.

101 Amazing Facts about Dinosaurs Scholastic Inc.
 Dictionary of Dinosaurs is a fact-packed guide to the prehistoric world, from the Triassic to the Cretaceous periods—as well as from A to Z.
Dinosaur Facts and Figures University of Chicago Press
 Biologist and TV scientist Professor Ben Garrod's fun, funny, informative and collectable series of books about dinosaurs is the most up-to-date on the market. This pocket-size series launches with Tyrannosaurus rex, Triceratops and Diplodocus, introduced by Steve Backshall, and is also available in audio download. The series continues with Velociraptor, Stegosaurus and Spinosaurus, introduced by Dr Jane Goodall. These are the most up-to-date

dino books in 66 million years! Did you know that not all dinosaurs were green and scaly, some were ginger and feathered, or that they didn't all roar, they cooed like pigeons, or that the ultimate prehistoric predator was actually not a dinosaur? TV scientist, Ben Garrod, is proud to be a geek as he mixes hard science and humour to prove that science is for everyone. Looking at the evolutionary arms race, prey, predators, place, time, groups and species, Ben reveals new-look dinosaurs. Additional sections include: Ask an Expert, New Science and Fossil Finder as well as quizzes to test your dinosaur knowledge. Praise for Professor Ben Garrod: 'A celebration of everything that science is really about' NatSCA. 'A perfect primer for kids to learn more about the amazing "terrible lizards"' BBC Wildlife Magazine. 'He's the man! The genius is his knowledge; the genius is the man himself!' Chris Evans, Virgin Radio Breakfast Show. 'Shines a fresh, contemporary light on this ever-popular topic' The Bookseller. 'Collectable and eye-catching, with plenty of diagrams and illustrations' Books for Keeps.

Where Did All the Dinosaurs Go? Random House Books for Young Readers

Sidebar topics, fun activities, and quick quizzes make learning about dinosaurs even more fun! Divided into sections for quick access to the easy-to-understand definitions and amazing full-color illustrations, Dinosaur Dictionary for Kids is a must-have for any kid's home library. Grades 3-6

The Dinosaur Book Princeton University Press

An encyclopedia of dinosaurs and prehistoric creatures, containing descriptions of their key features, evolutionary adaptations and details of fossil evidence, reconstructed in stunning expert illustrations.

Everything You Know about Dinosaurs Is Wrong! National Geographic Books

An illustrated record book of theropod facts and figures—from the biggest to the fastest to the smartest The theropod dinosaurs ruled the planet for millions of years, with species ranging from the mighty Tyrannosaurus rex to feathered raptors no bigger than turkeys. Dinosaur Facts and Figures is a stunningly illustrated book of records for these marvelous creatures—such as the biggest, the smallest, and the fastest theropods, as well as the ones with the most powerful bite. This one-of-a-kind compendium features more than 3,000 records, covers some 750 theropod species, and includes a wealth of illustrations ranging from diagrams and technical drawings to full-color reconstructions of specimens. The book is divided into sections that put numerous amazing theropod facts at your fingertips. "Comparing Species" is organized by taxonomic group and gives comparisons of the size of species, how long ago they lived, and when they were discovered. "Mesozoic Calendar" includes spreads showing the positions of the continents at different geological time periods and reconstructions of creatures from each period. "Prehistoric Puzzle" compares bones, teeth, and feathers while "Theropod Life" uses vivid, user-friendly graphics to answer questions such as which dinosaur was the smartest and which had the most powerful bite. Other sections chart theropod distribution on the contemporary world map, provide comprehensive illustrated listings of footprints, compile the physical specifications of all known theropods and Mesozoic birds, and much more. The essential illustrated record book for anyone interested in dinosaurs Features thousands of records on everything from the smartest and fastest theropods to the largest theropod eggs Includes more than 2,000 diagrams and drawings

and more than 300 digital reconstructions Covers more than 750 theropod species, including Mesozoic birds and other dinosauromorphs Provides detailed listings of footprints, biometric specifications, and scholarly and popular references

Triceratops - The Three-Horned Dinosaur Table of Contents

Introduction Chapter 1: Appearance and Behavior Chapter 3: Environment Conclusion Bonus Dinosaur Content Introduction to Dinosaurs Facts about Dinosaurs Dinosaur Extinction Dinosaur Fossils Dinosaur Eggs Dinosaur Names Dinosaur Diet Feathered Dinosaurs Plant Eating Dinosaurs The Weirdest Dinosaurs The Deadliest Dinosaurs Flying Dinosaurs Kinds of Dinosaurs The Biggest Dinosaurs The Smallest Dinosaurs Author Bio Publisher Introduction Salutations young reader! Today we are going to embark on a journey back to the age of the dinosaurs. The dinosaurs are some of the most incredible animals that ever lived on our planet. They lived nearly 200 million years ago and thrived for about 165 million years. We humans have only been around for about 60,000 years and we have only been using computers for about 75 years. The dinosaurs mysteriously became extinct and disappeared from our earth, but left their fossilized remains behind. Dinosaur fossils have been constantly discovered in human history; the Chinese thought they were dragon bones and Europeans thought they were the bones of biblical monsters. Luckily, the scientific study of dinosaurs began between 1815-1824 with the discovery of an Iguanodon fossil. Since then dinosaurs have been discovered all over the world. Their immense size, strange shapes, and wonderful natures make them inherently worthy of interest. The study of dinosaurs requires depth of imagination, analytical skills, and thought. The many unanswered questions about their lives, behavior, and disappearance provoke the curious to seek answers and ask even more questions. I hope this book fuels your imagination and makes you want to learn even more about dinosaurs. I hope you learn to appreciate the value of the dinosaurs and that you bring a spirit of openness and wonder on your journey back to the age of the dinosaurs.

Weird But True! Dinosaurs Mitchell Lane

Presents the different types of dinosaurs and reconstructs their habits and behavior. Also describes important fossil finds in Mongolia and Montana.

The Last Dinosaur Book Random House Books for Young Readers Mitchell shows why we are so attached to the myth and the reality of the "terrible lizards."
