This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

Protecting designs is complex and diverse; it involves deciding whether to protect them by design law, copyright law, or by both laws. A single protection may be under- or overprotective but two or more can be overprotective if there are no rules regulating the overlap. Legal systems in Europe and abroad have struggled to find the most adequate solution to this problem. This book traces the history of the design/copyright interface of fifteen countries, selected for their diversity in the way they dealt with the interface. It examines how these countries have coped with the problems engendered by the interface, the rules they applied to it over time and the reasons for legislative changes. This analysis reveals the most appropriate rules to regulate the interface at EU and global level and will appeal to academics, practising lawyers, judges, students and policymakers all over the world.

It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in *Setting the Standard for Project Based Learning* and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free videos provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together. Dino Joannides is a consummate food fanatic and bon Vivreur. With an Italian mother and half Greek half Corsican father he spent his first years in Italy before moving to the UK. Over the last 30 odd years he has traveled and eaten all over Italy in people's homes, simple trattorias and the finest restaurants. Dino believes that good quality ingredients, in small quantities, are what make a perfect meal. Whilst growing up, he had fascinating gastronomic encounters with producers, chefs, cooks and fellow epicureans and he has a unique network of contacts and over 30 years of food related knowledge and experience. If you've ever bought olive oil in a supermarket and wondered about the

difference between Cold Pressed and not cold pressed, or ever bought dried pasta, and wondered if it would be difficult or worthwhile to make your own, then this book is for you. Dino will let you in on the secrets that make Culatello di Zibello the best possible cured meat, and will show you that it is worth seeking out pecorino Romano for your pasta carbonara. Taking different elements of Italian cooking and exploring their origin and provenance, Dino will explode myths and expound facts surrounding some of the key ingredients in Italian cooking. There are also 100 delicious recipes to show you how to put your well-sourced ingredients together to make the most amazing, achievable and authentic Italian possible.

Goods made or designed in Italy enjoy a profile which far outstrips the country's modest manufacturing output. Italy's glorious design heritage and reputation for style and innovation has 'added value' to products made in Italy. Since 1945, Italian design has commanded an increasing amount of attention from design journalists, critics and consumers. But is Italian design a victim of its own celebrity? Made in Italy brings together leading design historians to explore this question, discussing both the history and significance of design from Italy and its international influence. Addressing a wide range of Italian design fields, including car design, graphic design, industrial and interior design and ceramics, well-known designers such as Alberto Rosselli and Ettore Sottsass, Jr. and iconic brands such as Olivetti, Vespa and Alessi, the book explores the historical, cultural and social influences that shaped Italian design, and how these iconic designs have contributed to the modern canon of Italian-inspired goods.

"There has never been a book provoking more delirium, foolishness and irrational movements, without any relationship to Jesus Christ [than the Book of Revelation]." —Jacques Ellul, Introduction Known for his trenchant critique of modernity and of those Christians who celebrate their captivity to it, Ellul here cuts to the heart of the theological intention of the Book of Revelation, and thereby reveals the liberating gospel in all its offensiveness. Neither an exhaustive commentary nor a work of historical-exegetical analysis, *Apocalypse* is a provocative, independent interpretation. Ellul seeks to rescue Revelation from the reassuring and orthodox banality to which commentators often reduce it. The goal is to perceive the totality of the book in its movement and structure. "Architecture in movement" is the key to understanding Revelation's puzzling but simple message. This edition also comes with a new foreword by Jacob Marques Rollison who provides an essential aid for guiding readers through Ellul's thorough engagement with Revelation.

Some say Demiel ben Yusef is the world's most dangerous terrorist, personally responsible for bombings and riots that have claimed the lives of thousands. Others insist he is a man of peace, a miracle worker, and possibly even the Son of God. His trial in New York City for crimes against humanity attracts scores of protestors, as well as media and religious leaders from around the world. Cynical reporter Alessandra Russo heads to the UN hoping for a piece of the action, but soon becomes entangled in controversy and suspicion when ben Yusef singles her out for attention among all other reporters. As Alessandra begins digging into ben Yusef's past, she is already in more danger than she knows—and when she is falsely accused of murder during her investigation, she is forced to flee New York. On the run from unknown enemies, Alessandra finds herself on the trail of a global conspiracy and a story that could shake the world to its foundations. Is Demiel ben Yusef the Second Coming or the Antichrist? The truth may lie in the secret history of the Holy Family, a group of Templars who defied the church, and a mysterious relic stained with the sacred blood of Christ

Himself.

Rhubarb Raspberry Polenta Cake and Pavlova Roulade with Sour Cherry Sauce and Toasted Almonds give new life to market and garden staples. And stories of local chef, farmers, and others pay tribute to the Treasure State's abundance. *Flavors Under the Big Sky* offers a fresh take on Big Sky Country's finest fare.

Casa Susanna A&C Black

When former Australian Gourmet Traveller food editor Rodney Dunn moved from Sydney to Tasmania, he and his wife Severine set about transforming a nineteenth-century schoolhouse into a sustainable farm-based cooking school. Nestled in a misty valley outside Hobart, The Agrarian Kitchen struck a chord with people seeking respite from fast-paced lives and a meaningful connection with the food we eat and the land that produces it. This collection of recipes from the phenomenally popular cooking school celebrates the simple pleasures of cooking and eating in tune with the seasons, and the rhythm of a life lived close to the earth.

A coming-of-age memoir of addiction, ambition and redemption in the high-stakes world of Michelin star kitchens. From reckless drug addict to one of Australia's top chefs and television stars: MasterChef judge Jock Zonfrillo's powerful life story will shock and inspire. Jock's life spiralled out of control when he tried heroin for the first time as a teenager while growing up in 1980s Glasgow. For years he balanced a career as a rising star amongst legendary chefs with a crippling drug addiction that took him down many dark paths. Fired from his job at a Michelin star restaurant in Chester, England, after a foul-mouthed rant, Jock made his way to London looking for work and found himself in front of the legendary Marco Pierre White. He credits White for saving his life, but Jock continued to struggle with addiction in a world of excess, celebrity, and cut-throat ambition. On New Year's Eve 1999, Jock shot up his last shot of heroin before boarding a plane to Sydney, where he would find passion and new meaning in life in the most unexpected places. There would be more struggles ahead, including two failed marriages, the closure of his prized restaurant during COVID-19, his time on-country, and some very public battles. This is the unforgettable story of an incredible life cut short too soon. Praise for Last Shot 'I've known Jock for 25 years. He is not only a great mate but an incredibly talented chef - in Australia and around the world. Last Shot really shows how resilient Jock is and how far he has come in his personal and professional life. I'm inspired by how brave Jock has been for putting this biography out there. I couldn't put it down. Loved it!' Matt Moran 'Zonfrillo

climbed his way to the top of the gastronomic ladder only to abdicate his position. He still inspires chefs worldwide.' Marco Pierre White 'An amazingly candid story of a prolific but complicated chef who made it back from the brink despite the obstacles, surely one of the best comeback stories there is!' Gordon Ramsay 'Jock absolutely lives and breathes his passion for food, which began in childhood. And between the incredible ups and downs of his life that we read about in Last Shot, what really comes through for me is his search for knowledge of Indigenous foods - I so admire how the depth of his learning combined with his amazing skill and creativity has allowed him to celebrate the uniqueness of the cultures he has embraced.' Machine design is one of the important subjects in mechanical engineering and a thorough knowledge of the design aspects of machine elements is essential for all design engineers. Working out the design of a machine as a whole, or its components, usually involves the use of several formulae, graphs, standard tables and other relevant data. Availability of all such information in one handbook not only eliminates the unnecessary task of remembering the required formulae and equations, but also helps design engineers to solve the problems in machine design quickly and efficiently. This handbook has been prepared keeping these basics in mind. References have been made to several standard textbooks on machine design while compiling the data of this book. In the preparation of the fourth edition, most of the chapters and topics have been upgraded and improved by adding additional information on current design.
