The Civilization of France, an Introduction Martinus Nijhoff Publishers

The world has changed radically since 1989, when the General Assembly declared the period from 1990 to 1999 as the United Nations Decade of International Law. During that time, the international community claimed some major achievements as reflected by the adoption of conventions and treaties. This publication presents a collection of essays from legal advisers of States and international organizations, all of whom are among those committed to promoting respect for international law. Their contribution provides a practical perspective on international law, viewed from the standpoint of those involved in its formation, application and administration.

Emile is a treatise on the nature of education and on the nature of man written by Jean-Jacques Rousseau, who considered it to be the "best and most important of all my writings". Due to a section of the book entitled "Profession of Faith of the Savoyard Vicar," Emile was banned in Paris and Geneva and was publicly burned in 1762, the year of its first publication. During the French Revolution, Emile served as the inspiration for what became a new national system of education. The work tackles fundamental political and philosophical questions about the relationship between the individual and society— how, in particular, the individual might retain what Rousseau saw as innate human goodness while remaining part of a corrupting collectivity. Its opening sentence: "Everything is good as it leaves the hands of the Author of things; everything degenerates in the hands of man." Rousseau seeks to describe a system of education that would enable the natural man he identifies in The Social Contract to survive corrupt society He employs the novelistic device of Emile and his tutor to illustrate how such an ideal citizen might be educated. Emile is scarcely a

detailed parenting guide but it does contain some specific advice on raising children.[5] It is regarded by some as the first philosophy of education in Western culture to have a serious claim to completeness

The Absence of Grace is a study of male fantasy, representation anxiety, and narratorial authority in two sixteenth-century books, Baldassare Castiglione's *Il libro del Cortegiano* (1528) and Giovanni Della Casa's *Galateo* (1558). The interpretive method is a form of close reading the author describes as reconstructed old New Criticism, that is, close reading conditioned by an interest in and analysis of the historical changes reflected in the text. The book focuses on the way the Courtier and Galateo cope with and represent the interaction between changes of elite culture and the changing construction of masculine identity in early modern Europe. More specifically, it connects questions of male fantasy and masculine identity to questions about the authority and reliability of narrators, and shows how these questions surface in narratorial attitudes toward socioeconomic rank or class, political power, and gender. The book is in three parts. Part One examines a distinction and correlation the Courtier establishes between two key terms, (1) sprezzatura, defined as a behavioral skill intended to simulate the attributes of (2) grazia, understood as the grace and privileges of noble birth. Because sprezzatura is negatively conceptualized as the absence of grace it generates anxiety and suspicion in performers and observers alike. In order to suggest how the binary opposition between these terms affected the discourse of manners, the author singles out the titular episode of Galateo, an anecdote about table manners, which he reads closely and then sets in its historical perspective. Part Two takes up the question of sprezzatura in the gender debate that develops in Book 3 of the Courtier, and Part Three explores in detail the characterization of the two narrators in the Courtier and Galateo, who are represented as unreliable and an object of parody or critique.

Combining superb investigative reporting with incisive analysis, Jerry Mashaw and David Harfst provide a compelling account of the attempt to regulate auto safety in America. Their penetrating look inside the National Highway Traffic Safety Administration (NHTSA) spans two decades and reveals the complexities of regulating risk in a free society. Hoping to stem the tide of rising automobile deaths and injuries, Congress passed the National Traffic and Motor Vehicle Safety Act in 1966. From that point on, automakers would build cars under the watchful eyes of the federal regulators at NHTSA. Curiously, however, the agency abandoned its safety mission of setting, monitoring, and enforcing performance standards in favor of the largely symbolic act of recalling defective autos. Mashaw and Harfst argue that the regulatory shift from rules to recalls was neither a response to a new vision of the public interest nor a result of pressure by the auto industry or other interest groups. Instead, the culprit was the legal environment surrounding NHTSA and other regulatory agencies such as the EPA, OSHA, and the Consumer Product Safety Commission. The authors show how NHTSA's decisions as well as its organization, processes, and personnel were reoriented in order to comply with the demands of a legal culture that proved surprisingly resistant to regulatory pressures. This broad-gauged view of NHTSA has much to say about political idealism and personal ambition, scientific commitment and professional competition, long-range vision and political opportunism. A fascinating illustration of America's ambivalence over whether government is a source of--or solution to--social ills, *The Struggle for Auto Safety* offers important lessons about

the design and management of effective health and safety regulatory agencies today.

With this widely acclaimed work, Michael Fried revised the way in which eighteenth-century French painting and criticism are viewed and understood. Analyzing paintings produced between 1753 and 1781 and the comments of a number of critics who wrote about them, especially Dennis Diderot, Fried discovers a new emphasis in the art of the time, based not on subject matter or style but on values and effects.

Richard Wagner's Prose Works Wentworth Press

This book explores the problematic relationship between education, social justice and the State, against the background of comparative education research. The book critiques the status quo of stratified school systems, and the unequal distribution of cultural capital and value added schooling. The authors address one of today's most pressing questions: Are social, economic and cultural divisions between the nations, between school sectors, between schools and between students growing or declining?
