If the Way of the warrior is the soul of Japan, their magnificent swords were the tools utilized to form the nation and

forge their spirit. You'll find an abundance of information in this special anthology in support of this thesis. Kimberley Taylor wrote four chapters, the first being an interview with 7th-dan Matsuo Haruna. Haruna offers great advice for practitioners based on his first-hand experience. Taylor's two highly researched chapters give overviews of two major iaido schools. Excellent photos and descriptions of katas accompany the text. Taylor's finale is a short piece describing two of his favorite techniques, while Deborah Klens-Bigman's chapter deals with two of her favorite techniques. Another top ranking swordsman, Nicklaus Suino, gets to the finicky details of sword-drawing techniques as performed by masters. From his two chapters, we learn how to

watch for telltale signs of expertise and come to a greater appreciation of the art of drawing the sword. Jonathan Seckler's chapter translates and comments on an essay written by Chozanishi Shissai in 1729. He argues that Neo-Confucianism rather than Zen became the foundation of swordsmanship, and illustrates how the sword arts began to be appreciated for their use for self-development. Andrew Bryant's chapter focuses on poems passed down within the Muso Jikiden Eishin-ryu School of Iaido. These poems correspond to techniques contained within the system created in the 17th century. The author presents each poem and offers provides textual descriptions of their corresponding applications with each sword technique illustrated. Joseph Svinth's research

presents the earliest kendo clubs to form in Canada. The socio-cultural settings add much flavor to this chapter. Information is provided regarding notable instructors, training, and competitions. Another way to better understand a martial tradition of one country is to compare it with another. Matthew Galas compares and contrasts sword arts in Germany with the Japanese traditions. The focus is on general principles and combat philosophy. Devotees to sword practice are well aware that scabbards get damaged. Michael Babin's chapter shows "how to" build a serviceable scabbard according talents of anyone moderately handy with tools. The twelve chapters described above should inspire further research and practice in the Japanese sword arts,

plus bring a greater appreciation for their unique place in world history and culture.

Bringing chivalry back into our modern-day world, this book shows us how to inspire today's generation of young boys to pursue honor, courage, and compassion. In an age when respect and honor seem like distant and antiquated relics, how can we equip boys to pursue valor and courageously put the needs of

others before their own? This book helps parents to inspire their boys by captivating their imagination and honoring their love for adventure. Heather Haupt explores how knights historically lived out various aspects of the knights' Code of Chivalry, as depicted in the French epic Song of Roland, and how boys can embody these same ideals now. When we issue the challenge and give boys the reasons why it is worth pursuing, we step forward on an incredible journey towards raising the kind of boys who, just like the knights of old, make an impact in their world now and for the rest of their lives.
