 What could be more appealing than taking a small branch from a tree in your garden and, with a few simple tools, making a wooden spoon to use in your kitchen or give to a friend? Carving this way is a very accessible hobby. The tools are reasonably priced, the raw material is everywhere (yes, it grows on trees!) and there is no need for a dedicated workspace. This book is an introduction to a set of knife and axe cuts that will help you use spoon carving tools effectively and safely. The teaching method is unusual in that it initially focuses on the skills needed to use the tools, rather than what you are making.

'No one in Britain knows more about crafting a spoon from greenwood than Barn The Spoon.' Guardian 'London's most famous and charismatic spoon whittler ... King of the whittlers.' Sunday Telegraph Barn The Spoon, as he's affectionately known is a rare master craftsman in the art of spoon carving. In this book he generously shares his extraordinary skill, gentle philosophy and his life's work – designing and carving beautiful spoons that are both a joy to use and hold. The simple,

ordinary spoon is part of our everyday lives, intimately entwined with the acts of eating and socialising, from stirring our first cup of coffee to scraping the last bit of pudding from the bowl. And who doesn't like to spoon in bed? Barn's spoons will take you on a journey into the new wood culture, from understanding the relationship between wood, the raw material and its majestic origins in our trees and woodland, to the workshop and the axe block, and into your own kitchen. Barn will show you how to use the axe and knife, from how they should feel in your hand to honing the perfect edge when carving your own spoons. Featuring sixteen unique designs in the four main

categories of spoon – eating, serving, cooking and measuring spoons, Barn takes you through the nuances of their making, how each design is informed by its function at the table or in the kitchen, and the key skills you will learn – such as creating octagonal handles, manipulating grain patterns and mastering bent branches. Beautiful photography will inspire and act as a blue-print to help perfect your technique.

Sixty years ago, four men parachuted onto a Norwegian glacier, carrying only the most basic equipment. Their mission was to prevent the Nazi regime from building an atomic bomb. Now wilderness expert Ray Mears tells the true story of this gruelling campaign, showing how these men's ability to survive in extreme conditions influenced the outcome of the Second World War. The Telemark campaign was an example of the bravery and skill of the

SOE trainees. The Norwegians transformed a military disaster into a triumph. This book tells the full story for the first time.
