SHERLYN BRENDEN

Healthcare-Associated Infections in Australia Elsevier Health Sciences

In *Infection Prevention and Control in Healthcare Settings*, a team of distinguished researchers deliver an accessible and authoritative introduction to infection control and prevention in hospital and community settings. This is a key resource as professionals deal with the ongoing impact of the COVID-19 pandemic, and require the latest and most up-to-date information. Central topics are discussed at the individual and population levels, with direct links to lessons learned throughout the COVID-19 pandemic. The book is written from an evidence-based perspective that utilises modern approaches, reflecting current decision making methods like GRADE and WHO Evidence to Decision Frameworks. Readers will also find: A thorough introduction to the chain of infection and the main groups of micro-organisms causing infection Comprehensive explorations of the application of evidence-based practice principles to infection prevention and control Practical discussions of immunity, microbiology laboratories, antimicrobial drugs, and policies and protocols for infection prevention and control The role of epidemiology and public health in the prevention and control of infectious disease Perfect for student nurses and students of allied health professions, *Infection Prevention and Control in Healthcare Settings* will also benefit practitioners and managers in the health services seeking to update their knowledge of infection control and prevention in healthcare settings.

Emergency and Trauma Care for Nurses and Paramedics Lippincott Williams & Wilkins

Kozier and Erb's *Fundamentals of Nursing* prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern.

Foundations of Infection Control and Prevention Pearson Higher Education AU

Microbiology and infection control for health professionals.

Molecular Techniques for the Study of Hospital Acquired Infection John Wiley & Sons

Endorsed by the College of Emergency Nursing Australasia CENA is the peak professional association representing emergency nurses and has endorsed this text in recognition of the relevance it has to emergency nursing across Australasia. Led by an expanded editorial team of internationally recognised clinicians, researchers and leaders in emergency care, the 3rd edition of *Emergency and Trauma Care for Nurses and Paramedics* continues to be the foremost resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of

multidisciplinary emergency care. The text provides nursing and paramedicine students and clinicians with the opportunity to understand the best available evidence behind the treatment that is provided throughout the emergency care trajectory. This unique approach ultimately seeks to strengthen multidisciplinary care and equip readers with the knowledge and skills to provide safe, quality, emergency care. The 3rd edition builds on the strengths of previous editions and follows a patient journey and body systems approach, spanning the pre-hospital and hospital environments. Expanded editorial team, all internationally recognised researchers and leaders in Emergency Care Chapter 6 Patient safety and quality care in emergency All chapters revised to reflect the most up-to-date evidence-based research and practice Case studies and practice tips highlight cultural considerations and communication issues Aligns to NSQHSS 2e, NMBA and PBA Standards An eBook included in all print purchases

Kozier & Erb's Fundamentals of Nursing Australian Edition Jones & Bartlett Learning

Providing a broad overview of the microbial pathogens associated with hospital-acquired human illness, *Techniques for the Study of Hospital Acquired Infection* examines the cost-effective use of laboratory techniques in nosocomial infectious disease epidemiology and control. This concise guide addresses the cost benefits of combining modern molecular techniques with the traditional activities of infection control departments. The book is useful as a guide to hospital infection control programs as well as a text for medical practitioners, grad/medical students, researcher scientists, population biologists, molecular biologists, and microbiologists.

Emergency and Trauma Care for Nurses and Paramedics - EBook Elsevier

Reviews of first edition: "This book tells every healthcare professional all they need to know about infection control... A user-friendly, valuable source of knowledge on a subject that can be confusing and complicated." *Nursing Standard* "A valuable contribution within any health or social environment." *Journal of Community Nursing* Infection prevention and control is an essential component of nursing care, and a crucially important subject area for both nursing students and qualified nurses. *Fundamentals of Infection Prevention and Control* gives readers a firm grasp of the principles of infection control, how they relate to clinical practice and the key issues surrounding the subject. It provides a comprehensive guide to the prevention, management and control of healthcare associated infections, and the basic elements of microbiology, immunology and epidemiology that underpin them. Thoroughly revised in line with current policy, this new edition contains brand-new chapters on a range of topics including the role of the Infection Prevention and Control Team, audit and surveillance, and the management of outbreaks. Also incorporating a range of case studies and examples as well as additional online content, it is essential reading for all nursing students as well as qualified nursing and healthcare professionals. Explores both principles and practice of a crucial subject area Accessible and user-friendly, with a range of features to help study including key definitions, links back to clinical practice, and chapter learning outcomes and summaries Accompanied by an online resource centre featuring MCQs, weblinks, case scenarios and downloadable fact sheets Features an increased clinical focus, with more application to practice This

Pathophysiology Applied to Nursing Practice Lippincott Williams & Wilkins

Infections, especially those occurring postoperatively, remain a major problem in hospitals. This handy pocket-sized manual provides guidelines and protocols for preventing infections, and managing them if they occur. It covers various types of infection, and is suitable for members of infection control teams.

Infection Control in Home Care Springer

Over the past several decades, "infection control has become a rapidly growing multidisciplinary field of incredible importance with regard to the safety of patients and healthcare workers, regulation and accreditation of healthcare facilities, and finances. The focus of this field has increasingly turned to prevention rather than control of hospital-acquired infections. This issue will bring the infectious disease specialist up to date on important topics such as hand hygiene, sterilization, methicillin-resistant *Staphylococcus aureus*, antibiotic stewardship, and specific infections of particular concern.

Hospital Epidemiology and Infection Control Jones & Bartlett Learning

Lewis's Medical-Surgical Nursing ANZ 5th edition continues as the most comprehensive, go-to reference for developing the core aspects of professional nursing care in Australia and New Zealand. With a clear framework of person-centred care, critical thinking, clinical reasoning and evidence-based practice underpinning the assessment and management of adults with complex, acute and chronic healthcare issues, the 5th edition provides nursing students with the foundations for developing expert clinical practice. Thoroughly revised, the new edition responds to key health priorities, providing an innovative approach to addressing Indigenous health in Australia and New Zealand. Greater emphasis is also given to the issues of: self-care; examination of the nurse's role within an interprofessional team; and management of the deteriorating patient, to reflect the changing nature of nursing practice in the contemporary healthcare environment. Additional resources on Evolve eBook on VitalSource Student and Instructor Resources Review Questions Conceptual Care Map creator Student Case studies Fluids and Electrolytes tutorial Nursing Care Plans Instructor Resources Test Bank PowerPoint slides Image bank Now available in either hard cover or 2-volume set paperback formats New chapters: Chapter 3: Stress and coping. This chapter explores theoretical models of stress, the impact of stress on human functioning, and strategies for coping with stress in the context of nursing practice and healthcare delivery Chapter 5: Working with Indigenous peoples of Australia and New Zealand. Co-authored by highly respected Indigenous and non-Indigenous academics from Australia and New Zealand, the chapter role-models Indigenous and non-Indigenous health professionals working alongside each other to improve health outcomes, and

the practical role that nurses can play to improve the healthcare experiences of Indigenous people. Chapter 69: Recognising and responding to the deteriorating patient. Authored by one of Australia's leaders in emergency response education, this chapter is designed to develop capability in relation to the National Safety and Quality Health Service Standards 2017, specifically Standard 8: Recognising and responding to acute deterioration. Chapter 70: Cardiopulmonary resuscitation: basic and advanced life support. Based on the Australian and New Zealand Committee on Resuscitation (ANZCOR) guidelines, this chapter promotes a problem-solving approach to the management of a patient in cardiac arrest by providing the science behind the techniques and interventions used to treat a patient in cardiac arrest.

Hospital Infection Control PMPH-USA

"It has been estimated that in developed countries up to 10% of hospitalized patients develop infections every year. Not only is there a substantial cost to healthcare systems, but some healthcare associated infections (HCIA) can be fatal. Since the majority of HCIA are preventable, reducing HCIA is now considered to be an integral part of patient safety and quality of care provided by all healthcare institutions worldwide. Unlike other books on infection control, the main strength of this book is to provide clear, up-to-date and practical guidance in infection control in an easy to read format which can act as a quick source of reference on all aspects of HCIA for healthcare workers who are either directly or indirectly involved in prevention and control of HCIA. Although the book's main audience is infection control practitioners such as doctors, nurses, public health physicians, it is also a valuable reference for environmental health officers, health educators, practice managers in GP surgeries, and health service managers"--

Infection Prevention and Control Guide for Health Care Professionals Garland Science

This practical, state-of-the-art guide to infection control for the hospital team reviews the entire spectrum of practice, from patient surveillance to isolation techniques to epidemic investigations. Relating basic clinical information in infectious disease and epidemiology to modern practice, it outlines common nosocomial infections and the role of the team in identifying them, provides a detailed analysis of how to manage nosocomial infections, and describes the structure of an effective infection control program. This edition reflects the expansion of scientific data on infection control and the impact of computer-use in aiding this process as well as major revisions in IC policies, largely in response to AIDS. Also addressed are the ways in which the introduction of DRGs and other changes in the healthcare system have affected IC programs.

Infection Prevention and Control in Healthcare Settings Elsevier Health Sciences

Infection control is a major issue in clinical practice. The revised third edition of this highly successful book provides a comprehensive guide to the principles and practice of infection control and prevention, and the basic elements of microbiology and epidemiology that underpin them. The contents are firmly based in clinical practice and are relevant to both hospital and community settings. The information is research-based and extensively referenced and therefore provides an invaluable resource for evidence-based practice. Presentation is clear, concise and accessible to a wide audience including diploma and degree course students, nurses and allied health professionals working in clinical settings, and infection control specialists. This revised third edition includes completely updated source material and references, along with extensive revision of chapters on

prevention of surgical site infection, IV device and urine catheter associated infections to incorporate the most recent evidence. There are updates to many other sections including new microbiological methods, application of protective isolation, Clostridium difficile, gram negative pathogens, VHF and blood-borne viruses, the management of sharps injuries and management of waste, as well as entirely new sections on: . Implementation of infection prevention and control policies . Infection risks of water systems . Protective clothing - use of gloves and masks . Hand hygiene compliance . Prevention of ventilator-associated pneumonia . Management of norovirus outbreaks . Decontamination of isolation rooms . Emerging pathogens including MERS-CoV and Zika . Antimicrobial stewardship

Infection Control in Clinical Practice John Wiley & Sons

Infection prevention and control (IPC) is everybody's responsibility. Healthcare-associated Infections in Australia is the first Australian text to address the challenges posed by infectious diseases and healthcare-associated infections (HAIs) for all members of the multidisciplinary healthcare team. Drawing on the expertise of a wide author team, and based on current research, this important and comprehensive text provides a clear pathway for the reader to increase their knowledge and understanding of IPC. The text is designed for both students and practising clinicians, and is presented in two sections - Principles and Practice - for ease of use. With IPC principles and guidelines now embedded into all health-related curricula, and mandated by standards and guidelines across all areas of healthcare, this is a book no health professional should miss. - Includes practice tips, case studies and video-based learning materials providing real-life examples across more than 20 health professions - Suitable for increasing IPC knowledge across all members of the multidisciplinary team. Content is pitched at different levels, with examples ranging from novice to expert - Aligned to the Australian National Infection Control Guidelines 2019 and the NSQHS Standard Preventing and Controlling Healthcare Associated Infections, as well as the nine hospital-acquired complication (HAC) HAIs addressed in specific chapters - Endorsed by the Australian College for Infection Prevention and Control (ACIPC) and the Australian Society for Infectious Diseases (ASID) - Supported by a companion text, Epidemiology of Healthcare-associated Infections in Australia, providing data on the epidemiology of healthcare-associated surveillance in Australia Instructor and Student resources on Evolve: Multiple Choice Questions Case Studies Abbreviations and Glossary Useful Websites / Resources Video-based learning materials

Control of Hospital Infection Elsevier Health Sciences

For over three decades, Bennett & Brachman's Hospital Infections has been a respected and influential resource in the prevention and control of healthcare-associated infections (HAIs). Now in its Sixth Edition, the book continues to provide readers with the latest information in the field of healthcare epidemiology, infection control, patient safety, and the prevention and control of HAIs. Many of the current contributors are or were employed by or trained at the Centers for Disease Control and Prevention (CDC) and have a thorough knowledge of healthcare epidemiology. Topics covered include HAI epidemiology; surveillance; control programs; antimicrobial stewardship; antimicrobial resistance; mechanisms of resistance; sterilization and disinfection; food-borne diseases; the role of the laboratory, intensive care unit, operating room, dialysis, and nursery settings; and specific hospital-acquired infections.

Infection Control Skidmore-Roth Pub.

The fifth edition retains all the strengths that have made Microbiology and Infection Control for Health Professionals a best-selling title: A sound scientific orientation Continual application to the clinical setting Coverage of emerging and re-emerging infectious diseases Current statistical information of disease patterns Up-to-date terminology An emphasis on Australian and New Zealand data and clinical settings A central theme of highlighting the relevance of microbiology to patient care Full colour photographs and illustrations throughout

Russell, Hugo and Ayliffe's Principles and Practice of Disinfection, Preservation and Sterilization Elsevier Health Sciences

Lewis's Medical-Surgical Nursing 6th Australia and New Zealand Edition UniversityOfHealthCare

"This book seeks to provide a ready reference to health care professionals on how to enhance their infection control practice. Contained within the book is an introduction to infections including healthcare-associated infections and multidrug-resistant organisms, how they are transmitted, methods to control the spread, epidemiology, surveillance, antimicrobial resistance, antimicrobial stewardship, standard precautions, transmission-based precautions, asepsis, the environment of care, decontamination and equipment reprocessing."--Page 4 of cover

Bennett & Brachman's Hospital Infections Elsevier

This comprehensive book covers every aspect of infection control nursing, from clinical work to management and education. It addresses the control and prevention of infection in the community at large, including primary health care as well as the hospital sector -- making it essential reading for infection control students and instructors, ICNs, and ICDs. This new 2nd edition has been thoroughly revised and restructured and now also includes chapters on infection control in developing countries and on knowledge management.

Essentials of Hospital Infection Control Elsevier Health Sciences

This book is a text-only version of the acclaimed CD on the subject, made for those who prefer books. The purpose of this guidebook is to help the user understand and implement important standards for an infection control program. Upon the completion of this manual, the reader will be able to list JCAHO standards and requirements for infection control, illustrate JCAHO's primary focus areas of surveillance, prevention, and control, describe personnel issues in infection control, demonstrate detailed prevention procedures, summarize the hierarchy of decontamination, and describe emergency management concerns. This is a concise and practical guide for the public as much as for clinicians. - Publisher.

Informed Infection Control Practice OUTFOX Prevention LLC

Lewis's Medical-Surgical Nursing has long been considered a comprehensive and reliable resource for nursing students preparing for their transition into clinical practice. This sixth edition has been fully updated to incorporate the latest research, data, current clinical practice, procedures and guidelines. The text addresses core skills and knowledge that students need to pass their exams and go on to provide expert clinical care. It prepares nurses to assess patients, understand underlying diseases and their signs and symptoms, and go on to plan and deliver care. The text encourages readers to develop their clinical reasoning and problem-solving skills in order to apply theory to their

work. This edition has been produced by leading expert nursing academics and clinicians who bring a strengthened focus on inclusion and diversity. Provides a person-centred holistic approach to patient assessment and care. Complex concepts are illustrated with figures, tables, summaries and reflections of best practice. Case studies throughout—based on real-life medical-surgical scenarios—help students to apply theory to real life. Clinical practice features offer practical guidance for students. Underpinned by the nursing process framework. Instructor resources on Evolve: Image collection PowerPoint slides Student and Instructor resources on Evolve: Answer guidelines for clinical reasoning questions in case studies Student case studies Fluids and electrolytes tutorial eNursing Care Plans Clinical Cases Case Study Review questions and answers with answer rationale Conceptual Care Map Create Refreshed and up-to-date evidence, statistics, standards and procedures. Updated chapters on the deteriorating patient and advanced life support to reflect recent international (ILCOR) and national (ARC) practice guidelines. New chapter on caring for individuals with intellectual disability and autism. Increased focus throughout on culturally safe care that aims to improve access to services and improved health outcomes for Maori, Aboriginal and Torres Strait Islander people. Focus on the impact of COVID-19. Enhanced content on gender equity, mental health, intellectual disability and autism, harm minimisation for people experiencing the effects of alcohol and other drugs, patient safety and nurses' wellbeing and safety at work. Updated Evolve resources for students and instructors
