GAGE RICE

A - N ILRI (aka ILCA and ILRAD)

Le guide le plus complet du marché. Cette nouvelle édition aborde plus de 110 pathologies et présente plus de 70 huiles essentielles pour soigner et soulager les maux du quotidien en toute sécurité mais aussi pour votre bien-être et pour une maison plus saine et plus agréable. La nouvelle approche est résolument très pratique avec un classement par ordre alphabétique, des encadrés, des recommandations et mises en garde pour les enfants ou femmes enceintes.

Potentialities for Industrial Development in Saurashtra Region Springer Nature

Topics in detail to be covered are: Smarandache multi-spaces with applications to other sciences, such as those of algebraic multi-systems, multi-metric spaces; Smarandache geometries; Differential Geometry; Geometry on manifolds; Topological graphs; Algebraic graphs; Random graphs; Combinatorial maps; Graph and map enumeration; Combinatorial designs; Combinatorial enumeration; Low Dimensional Topology; Differential Topology; Topology of Manifolds; Geometrical aspects of Mathematical Physics and Relations with Manifold Topology; Applications of Smarandache multi-spaces to theoretical physics; Applications of Combinatorics to mathematics and theoretical physics; Mathematical theory on gravitational fields; Mathematical theory on parallel universes; Other applications of Smarandache multi-space and combinatorics.

Journal of the Indian Chemical Society Marabout

Papers on Non-Solvable Spaces of Linear Equation Systems, Roman Domination in Complementary Prism Graphs, On Pathos Total Semitotal and Entire Total Block Graph of a Tree, Distance Two Labeling of Generalized Cacti, Degree Splitting Graph on Graceful, Felicitous and Elegant Labeling, and other topics. Contributors: Agboola A.A.A., Adeleke E.O. Akinleye S.A., B.Chaluvvaraju, V.Chaitra, P.Selvaraju, P.Balaganesan, J.Renuka, V.Balaj, Suhua Ye, Yizhi Chen, Hui Luo, and others.

Bulletin - Association pour l'etude taxonomique de la flore d'Afrique tropicale OrangeBooks Publication

Includes entries for maps and atlases.

Methods of Functional Analysis in Approximation Theory Unesco

Has appendices.

Quaternary Geology Walter de Gruyter GmbH & Co KG

Vol. 5 has also special t.-p.: V.S. Sukthankar memorial volume, 21st January 1944.

Indian Science Abstracts CRC Press

This book provides a comprehensive research on Ancient Indian glass. The contributors include experienced archaeologists of South Asian glass and archaeological chemists with expertise in the chemical analysis of glass, besides, established ethnohistorians and ethnoarchaeologists. It is comprised of five sections, and each section discusses different aspects of glass study: the origin of glass and its evolution, its scientific study and its care, ancient glass in literature and glass ethnography, glass in South Asia and the diffusion of glass in different parts of the world. The topic covered by the different chapters ranges from the development of faience, to the techniques developed for the manufacture of glass beads, glass bangles or glass mirrors at different times in south Asia, a major glass producing region and the regional distribution of key artefacts both within India and outside the region, in Africa, Europe or Southeast Asia. Some chapters also include

extended examples of the archaeometry of ancient glasses. It makes an important contribution to archaeological, anthropological and analytical aspects of glass in South Asia. As such, it represents an invaluable resource for students through academic and industry researchers working in archaeological sciences, ancient knowledge system, pyrotechnology, historical archaeology, social archaeology and student of anthropology and history with an interest in glass and the archaeology of South Asia.

In this thesis we have discussed variants of domination like vertex covering, Independent domination, K domination, K dependent set, K-dependent K domination, Total domination, Extended total domination, K-tuple domination, Total K domination, Restrained domination and Total restrained domination. We have characterized edges whose removal affects or does not affect these variants. We have also discussed changing and unchanging of these variants in terms of edge addition between two non-adjacent vertices. From history we can see that much work has been done for critical graphs but existing work is related to all edges of graph. But for application point of view sometimes we require to delete or add any particular edge. So our work is related to any particular edge but it is applicable for all graphs. When existing work for critical graphs is applicable for any edge but in some particular graph. In this way our results carry more important when any particular edge is to be focused. We have also discussed bondage number for some variants. Our results are related to relation between vertices and edges whose removal affects all these variants. Many research papers have been published for criticalness of graph with respect to vertex removal. So our results may be link between vertices and edge removal. It will insist many research scholars to do work in this direction. We believe our study will become instrumental in making the relation between edge removal and vertex removal more transparent and effectively. We hope our thesis provide row material for other research scholars of engineering field also.

National Union Catalog Infinite Study

Graph Theory is a branch of discrete mathematics. It has many applications to many different areas of Science and Engineering. This book provides the most up-to-date research findings and applications in Graph Theory. This book focuses on the latest research in Graph Theory. It provides recent findings that are occurring in the field, offers insights on an international and transnational levels, identifies the gaps in the results, and includes forthcoming international studies and research, along with its applications in Networking, Computer Science, Chemistry, and Biological Sciences, etc. The book is written with researchers and post graduate students in mind.
