How to Live Safely in a Science Fictional Universe (Enhanced Edition) Random House

A MAJOR MOTION PICTURE FROM ALEX GARLAND, STARRING NATALIE PORTMAN AND OSCAR ISAAC The Southern Reach Trilogy begins with Annihilation, the Nebula Award-winning novel that "reads as if Verne or Wellsian adventurers exploring a mysterious island had warped through into a Kafkaesque nightmare world" (Kim Stanley Robinson). Area X has been cut off from the rest of the continent for decades. Nature has reclaimed the last vestiges of human civilization. The first expedition returned with reports of a pristine, Edenic landscape; the second expedition ended in mass suicide; the third expedition in a hail of gunfire as its members turned on one another. The members of the eleventh expedition returned as shadows of their former selves, and within weeks, all had died of cancer. In Annihilation, the first volume of Jeff VanderMeer's Southern Reach trilogy, we join the twelfth expedition. The group is made up of four women: an

anthropologist; a surveyor; a psychologist, the de facto leader; and our narrator, a biologist. Their mission is to map the terrain, record all observations of their surroundings and of one another, and, above all, avoid being contaminated by Area X itself. They arrive expecting the unexpected, and Area X delivers—they discover a massive topographic anomaly and life forms that surpass understanding—but it's the surprises that came across the border with them and the secrets the expedition members are keeping from one another that change everything.

The New York Times bestseller with more than 1 million copies sold worldwide Inspired by the incredible true story of one Jewish family separated at the start of World War II, determined to survive—and to reunite—*We Were the Lucky Ones* is a tribute to the triumph of hope and love against all odds. "Love in the face of global adversity? It couldn't be more timely." —Glamour It is the spring of 1939 and three generations of the Kurc family are doing their best to live normal lives, even as the shadow of war grows closer. The talk around the family Seder table is of new babies and budding romance, not of the increasing hardships threatening Jews in their hometown of Radom, Poland. But soon the horrors overtaking Europe will become inescapable and the Kurcs will be flung to the far corners of the world, each desperately trying to navigate his or her own path to safety. As one sibling is forced into exile, another attempts to flee the continent, while others struggle to escape certain death, either by working grueling hours on empty stomachs in the factories of the ghetto or by hiding as gentiles in plain sight. Driven by an unwavering will to survive and by the fear that they may never see one another again, the Kurcs must rely on hope, ingenuity, and inner strength to persevere. An extraordinary, propulsive novel, *We Were the Lucky Ones* demonstrates how in the face of the twentieth century's darkest moment, the human spirit can endure and even thrive.

From the New York Times bestselling author of Annihilation, Jeff VanderMeer's first novel, *Veniss Underground*, takes readers on a journey to a labyrinthine city of tunnels, and the dangers lurking behind each turn. Set in the mysterious and magical city of

Veniss, a surreal metropolis that sits over an underground labyrinth of tunnels and mines. In this tale, epic and mythological in scope, VanderMeer takes the reader below the surface of the earth to the dark and decadent future. It's a world where Living Artists craft works out of biological material, and humans are either tossed out or recycled into something wholly unrecognizable. Told from three distinct viewpoints—Nicholas, a not-quite-talented-enough Artist; his twin sister, Nicola; and Nicola's former lover, Shadrach—*Veniss Underground* follows these characters as they embark on a journey to hell and back, replete with the blend of horrors (biological, environmental, and ethical) that also animate VanderMeer's subsequent blockbuster novels. *Veniss Underground* explores the limits of love, memory, and obsession in a landscape that defies the boundaries of imagination. This reissue will include a new introduction by the National Book Award-winning author Charles Yu and more new material from Jeff VanderMeer.

A woman commits suicide for no apparent reason. A week later, her son—beautiful, troubled fifteen-year-old Mark Underhill—vanishes from the face of the earth. To his uncle, horror novelist Timothy Underhill, Mark's inexplicable absence feels like a second death. After his sister-in-law's funeral, Tim searches his hometown of Millhaven for clues that might help him unravel this mystery of death and disappearance. He soon learns that a pedophilic murderer is on the loose in the vicinity, and that shortly before his mother's suicide Mark had become obsessed with an abandoned house where he imagined the killer might have taken refuge. No mere empty building, the house on Michigan Street whispers from attic to basement with the echoes of a long-hidden true-life horror story, and Tim Underhill comes to fear that in investigating its unspeakable history, Mark stumbled across its last and greatest secret: a ghostly lost girl who may have coaxed the needy, suggestible boy into her mysterious domain. With lost boy lost girl, Peter Straub affirms once again that he is the master of literary horror.

This World Is Full of Monsters Laura Morelli

Having set global warming in irreversible motion, we are facing the possibility of ecological catastrophe. But the environmental emergency is also a crisis for our philosophical habits of thought, confronting us with a problem that seems to defy not only our control but also our understanding. Global warming is perhaps the most dramatic example of what Timothy Morton calls "hyperobjects"—entities of such vast temporal and spatial dimensions that they defeat traditional ideas about what a thing is in the first place. In this book, Morton explains what hyperobjects are and their impact on how we think, how we coexist with one another and with nonhumans, and how we experience our politics, ethics, and art. Moving fluidly between philosophy, science, literature, visual and conceptual art, and popular culture, the book argues that hyperobjects show that the end of the world has already occurred in the sense that concepts such as world, nature, and even environment are no longer a meaningful horizon against which human events take place. Instead of inhabiting a world, we find ourselves inside a number

of hyperobjects, such as climate, nuclear weapons, evolution, or relativity. Such objects put unbearable strains on our normal ways of reasoning. Insisting that we have to reinvent how we think to even begin to comprehend the world we now live in, *Hyperobjects* takes the first steps, outlining a genuinely postmodern ecological approach to thought and action.

Area X has been cut off from the rest of the continent for decades. Nature has reclaimed the last vestiges of human civilization, and the government is involved in sending secret missions to explore Area X. The first expedition returned with reports of a pristine, Edenic landscape; all the members of the second expedition committed suicide; the third expedition died in a hail of gunfire as its members turned on one another; the members of the eleventh expedition returned as shadows of their former selves, and within months of their return, all had died of aggressive cancer. *Annihilation* opens with the twelfth expedition. The group is composed of four women, including our narrator, a biologist. Their mission is to map the terrain and collect specimens; to record all of their observations, scientific and otherwise; and, above all, to avoid succumbing to the unpredictable effects of Area X itself. What they discover shocks them: first, a massive topographic anomaly that does not appear on any map; and second, life forms beyond anything they're equipped to understand. But it's the surprises that came across the border with them that change everything—the secrets of the expedition members themselves, including our narrator. What do they really know about Area X—and each other?

"A strange plague called the 'Gets is decimating humanity on a global scale. It causes people to forget--small things at first, like where they left their keys, then the not-so-small things like how to drive or the letters of the alphabet. In order to study this phenomenon, a special research lab has been built eight miles under the sea's surface. Annihilation is the first volume in Jeff VanderMeer's Southern Reach trilogy, Authority is the second, and Acceptance is the third. Area X—a remote and lush terrain—has been cut off from the rest of the continent for decades. Nature has reclaimed the last vestiges of human civilization. The first expedition returned with reports of a pristine, Edenic landscape; all the members of the second expedition committed suicide; the third expedition died in a hail of gunfire as its members turned on one another; the members of the eleventh expedition returned as shadows of their former selves, and within months of their return, all had died

of aggressive cancer. This is the twelfth expedition. Their group is made up of four women: an anthropologist; a surveyor; a psychologist, the de facto leader; and our narrator, a biologist. Their mission is to map the terrain and collect specimens; to record all their observations, scientific and otherwise, of their surroundings and of one another; and, above all, to avoid being contaminated by Area X itself. They arrive expecting the unexpected, and Area X delivers—they discover a massive topographic anomaly and life forms that surpass understanding—but it's the surprises that came across the border with them, and the secrets the expedition members are keeping from one another, that change everything. After the disastrous twelfth expedition chronicled in Annihilation, the Southern Reach—the secret agency that monitors these expeditions—is in disarray. In Authority, John Rodriguez, aka "Control," is the team's newly appointed head. From a series of interrogations, a cache of hidden notes and hours of profoundly troubling video footage, the secrets of Area X begin to reveal themselves—and what they expose pushes Control to confront disturbing truths about both himself and the agency he's promised to serve. And the consequences will spread much further than that. It is winter in Area X in Acceptance. A new team embarks across the border on a mission to find a member of a previous expedition who may have been left behind. As they press deeper into the unknown—navigating new terrain and new challenges—the threat to the outside world becomes more daunting. The mysteries of Area X may have been solved, but their consequences and implications are no less profound—or terrifying.

Jonathan Lamshead stands to inherit his deceased grandfather's overstuffed mansion—a veritable cabinet of curiosities—once he and two schoolmates catalog its contents. But the three soon discover that the house is filled with far more than just oddities: It holds clues linking to an alt-Earth called Aurora, where the notorious English occultist Aleister Crowley has stormed back to life on a magic-fueled rampage across a surreal, through-the-looking-glass version of Europe replete with talking animals (and

vegetables). Swept into encounters with allies more unpredictable than enemies, Jonathan pieces together his destiny as a member of a secret society devoted to keeping our world separate from Aurora. But as the ground shifts and allegiances change with every step, he and his friends sink ever deeper into a deadly pursuit of the profound evil that is also chasing after them.
