You may be surprised to find out that there are only four chords that make up most of the songs you hear. In fact, one of those four is just the fundamental chord, but with a shifted down bass note and sounds darker. This means that you only need to learn-and you absolutely can learn-how to recognize three main chords with just your ear. You'll be able to play most songs without needing any sheet music or searching for the chords online. If you've ever wanted to know how to hear a song and play the chords by ear, *Piano Chords Three: Numbers* is a way to do that! Here's how it works: Professionals listen for the chords in a song as numbers instead of the chord names. Each key changes the names of the chords, but not the numbers. For instance, in the key of C, the 1 chord is C. In the key of G, the 1 chord is G. The 1 chord is a very simple

chord to hear. Once you hear the fundamental, distinct tone of the 1 you can then find the key by testing several chords until you find the right one. Then you not only know what key you are in but also the fundamental 1 chord for that key. All the other chords in the song build from that one! *Piano Chords Three: Numbers* includes: -Welcome: Why Numbers and What Are They? -One: The 1 Chord and Its Dominance -Two: The 4 and 5: The Other Pillars -Three: The 6m: Just A Dark 1 Chord -Four: The 2m: The New 4-Five: The "Over" or Passing Chords: 1/3, 5/7, and 4/1 -Six: The 3m and 7dim -Seven: The 7, 2, and 3: The Accidentals -Eight: The Most Common Chord Patterns (You'll Hear These Everywhere) -Nine: Going A Little Beyond: Chord Suffices -Final Greetings and Pop Quiz Everyone can do this! New players and seasoned!

(Berklee Guide). Learn the nuances of music notation, and create professional looking scores. This reference presents a comprehensive look at contemporary music notation. You will learn the meaning and stylistic practices for many types of notation that are currently in common use, from traditional staves to lead sheets to guitar tablature. It discusses hundreds of notation symbols, as well as general guidelines for writing music. Berklee College of Music brings together teachers and students from all over the world, and we use notation in a great variety of ways. This book presents our perspectives on notation: what we have found to be the most commonly used practices in today's music industry, and what seems to be serving our community best. It includes a foreword by Matthew Nicholl, who was a long-time chair of Berklee's Contemporary Writing and Production Department. Whether you find yourself in a Nashville recording studio, Hollywood sound stage, grand concert hall, worship choir loft, or elementary school auditorium, this book will help you to create readable, professional, publication-quality notation. Beyond understanding the standard rules and definitions, you will learn to make appropriate choices for your own work, and generally how to achieve clarity and consistency in your notation so that it best serves your music.

How to Read Music Scarecrow Press
This sheet music book was written to help the beginner, be they, child or adult, learn to play music in a simple and easy way that requires no previous knowledge of music. Just by following the circles with letters, you will sound like an experienced musician. Playing music can be effortless and an enjoyable game. There are 3 levels in this book: Level 1 and 2 are for beginners and use circles with letter

notation, instead of notes. Level 3 has letter notation and traditional musical notes. Level 1. Songs that are possible to play within the main octave. Level 2. Songs that need to be played in an octave other than the main octave, or songs that involve the flat notes. Now you will need to select the proper note/key by ear. Level 3. These songs have been written for one octave with ordinary "adult" musical notes and symbols. To begin to play right away without any musical knowledge, you just need to obtain and apply the stickers with letter-notation and on each key of your melodica. Most melodicas include these stickers, but you can buy them separately or create your own using common peelable paper stickers.
